PO Box 30, Mapleton Qld 4560, Australia Website: <http://www.nexusmagazine.com>

CONTENTS

LETTERS TO THE EDITOR.....4 <i>Readers comment on such diverse subjects as mysterious deaths in England in late 1998, The Zeitgeist Movement, UFO sightings over Australia's Snowy Mountains, the rise of the scientific dictatorship, and more.</i>	EARTH PRECESSION AND MICRO BLACK HOLES.....49 <i>By Olaf Thomas Raabe. There is a link between a series of unexplained explosions, the Earth's precessional orbit and the inadvertent creation of micro black holes at the Large Hadron Collider in Geneva, Switzerland.</i>
GLOBAL NEWS.....6 <i>We report on the Earth's past magnetic pole shifts, IMF standover tactics against Pakistan, the "Top Secret America" investigation, miscarriages linked to the H1N1 vaccine, the "Satellitegate" cover-up, and more.</i>	CROP CIRCLES 2010: TWENTY YEARS ON.....57 <i>By Andy Thomas. This season's global tally of 110 crop glyphs featured artistic masterpieces including complex mandalas, optical illusions and binary codes. The year 2010 marked two decades of pictograms in the fields.</i>
THE IMPERIAL ANATOMY OF AL-QAEDA.....11 <i>By Andrew Gavin Marshall. In response to the CIA's need for more discretion, the Safari Club international intelligence network was formed and went on to finance and organise a global conglomerate of terrorist groups.</i>	THE TWILIGHT ZONE.....65 <i>This edition we present prophecies and drawings by the little-known Argentinian clairvoyant and artist Benjamin Solari Parravicini, covering contact with ETs, atomic era warnings, the new space age and major social changes.</i>
HEMP: OUR LIFELINE TO THE FUTURE.....17 <i>By Dr Andrew Katelaris. The widespread legalisation of cannabis production for commercial and medical uses would have profound benefits for our economies and our health as well as our environment.</i>	REVIEWS—Books.....71 <i>"Twilight of the Gods" by Erich von Däniken "Lost Knowledge of the Ancients" edited by Glenn Kreisberg "Mass Contacts" by Stefano Breccia "Beyond the Heavens" by Maurizio Cavallo (Jhlos) "Have You Got the Guts to be Really Healthy?" by Don Chisholm "Healthy Sun" by Casey Adams, PhD "World Gnosis" by Mark Amaru Pinkham "Approaching Chaos" by Lucy Wyatt "Magnetic Reversals and Evolutionary Leaps" by Robert W. Felix "Ancient Egypt 39,000 BCE" by Edward F. Malkowski "The Cross of Bethlehem: The Memoirs of a Refugee" by Ro'i Tov "The Energy Solution Revolution" by Brian O'Leary, PhD "The Untrained Environmentalist" by John Fenton "The Self-Sufficiency Bible" by Simon Dawson</i>
HOMEOPATHY'S SUCCESS IN EUROPE.....23 <i>By Dana Ullman. Despite attempts to discredit it, homeopathy has widespread use and rising popularity in Europe. Its increasing acceptance among medical practitioners and the public is proof that it works.</i>	REVIEWS—DVDs.....78 <i>"The Friendship Case" from Studio3TV "Science Art Foundations for Human Survival" with Robert Pope "One Answer to Cancer" from Fair Go Productions</i>
HEALING WITH ELECTROMEDICINE—Part 3.....31 <i>By Dr Nenah Sylver. Devices utilising lasers and LEDs as well as far-infrared heat and sound can target living cells with the precise frequency needed to restore cellular balance and return the body to good health.</i>	REVIEWS—Music.....79 <i>"Music of the Honey Gatherers" by Paban Das Baul "Infinite Sky" by Wendy Grace "Eternity" by Deuter "A New Day" by Laya Project</i>
BIG LIES OF MONEY, MEDICINE AND SCIENCE.....39 <i>By Dr Denis G. Rancourt. The established orthodoxy in economics, medicine and science is intended as a web of lies to maintain power structures, says this tenured Canadian physics professor who was fired for dissidence.</i>	NEXUS BOOKS, DVDs, ADS, SUBSCRIPTIONS.....87–96
SCIENCE NEWS.....45 <i>This edition we include items on the Sun's role in changing the rate of decay of radioactive isotopes, and on electrically charged plasma bands that circle the Earth.</i>

STATEMENT OF PURPOSE

NEXUS recognises that humanity is undergoing a massive transformation. With this in mind, NEXUS seeks to provide 'hard-to-get' information so as to assist people through these changes. NEXUS is not linked to any religious, philosophical or political ideology or organisation.

PERMISSION-TO-REPRODUCE POLICY

While reproduction and dissemination of the information in NEXUS is actively encouraged, anyone caught making a buck out of it, without our express permission, will be in trouble when we catch them!

Editorial

Well, spring has sprung again in the land down under, and as I sit here, wondering what editorials can be found lurking in my brain, the warm aromas of honeysuckle and jasmine in full bloom are evident in my office.

The article in our last edition regarding strange events occurring in the Gulf of Mexico triggered a lot of interest in both the story and the origin of the story found at a notorious website called Godlike Productions. I say "notorious" because it is literally a free-for-all of strange and unusual information—and equally strange and interesting people can be found lurking there. As you may have guessed, the saga continued on from where we left off with the article—and it is still unfolding.

For those who came in late, the "Bezerk" thread, as it has come to be known around the world, is based upon selectively leaked classified intelligence chatter being broadcast over an alleged French embassy communications channel. It describes the working together of various national naval forces to observe—and combat—a new organism recently found at the bottom of the Gulf of Mexico and elsewhere. It is purported that the oil "leak" was a massive cover operation to mask the activities of so many submarines in the Gulf from April this year. My assessment is that the leakers are intelligence people who are genuinely freaked out at the global security threat posed by this organism, which they claim is originally not of this world. Throw in the idea that this organism shows intelligence, looks like crude oil but can morph into other chemical elements at will, and is being activated/stimulated by incoming frequencies and wavelengths from deep space...and you have the reason why hundreds of thousands of people have been reading this thread. Whatever the "thing" is down there, it has put many global geopolitical agendas on standby while factions and nations struggle to deal with it and each other—all away from the public eye. For this edition, I have no article updating events—so interested people should visit the Bezerk thread itself to stay informed.

Meanwhile, back at the office, this edition includes an article about how various agencies set out to create Al-Qaeda and terrorism in order to justify wars and vast military budgets, keep the supply of drugs and cheap oil flowing, ensure access to resources, and so on. Right now, the western propaganda machines are churning out anti-Muslim material as fast as they can—a prelude to the outbreak of full-scale war. Read this article and circulate it. Tell people that the powers-that-be are using terrorism as a tool to shackle innocent populations and steal resources the world over.

Homeopathy has been under a concerted attack lately, and as usual the ignorant media only spout the spoon-fed negative reports fed into the wire services by drug company lackeys and sceptics. Many readers in North America and Australasia may be surprised to learn just how widely used, accepted and successful homeopathy is across Europe. In this day and age when science is becoming the new religion, homeopathy will be at the front line in debates about matter, energy and consciousness. Homeopathy works; it is inexpensive, very successful and has no adverse side effects. The only ones unhappy about it are the drug companies, which are using their vast influence to have it eradicated as an alternative medicine of choice.

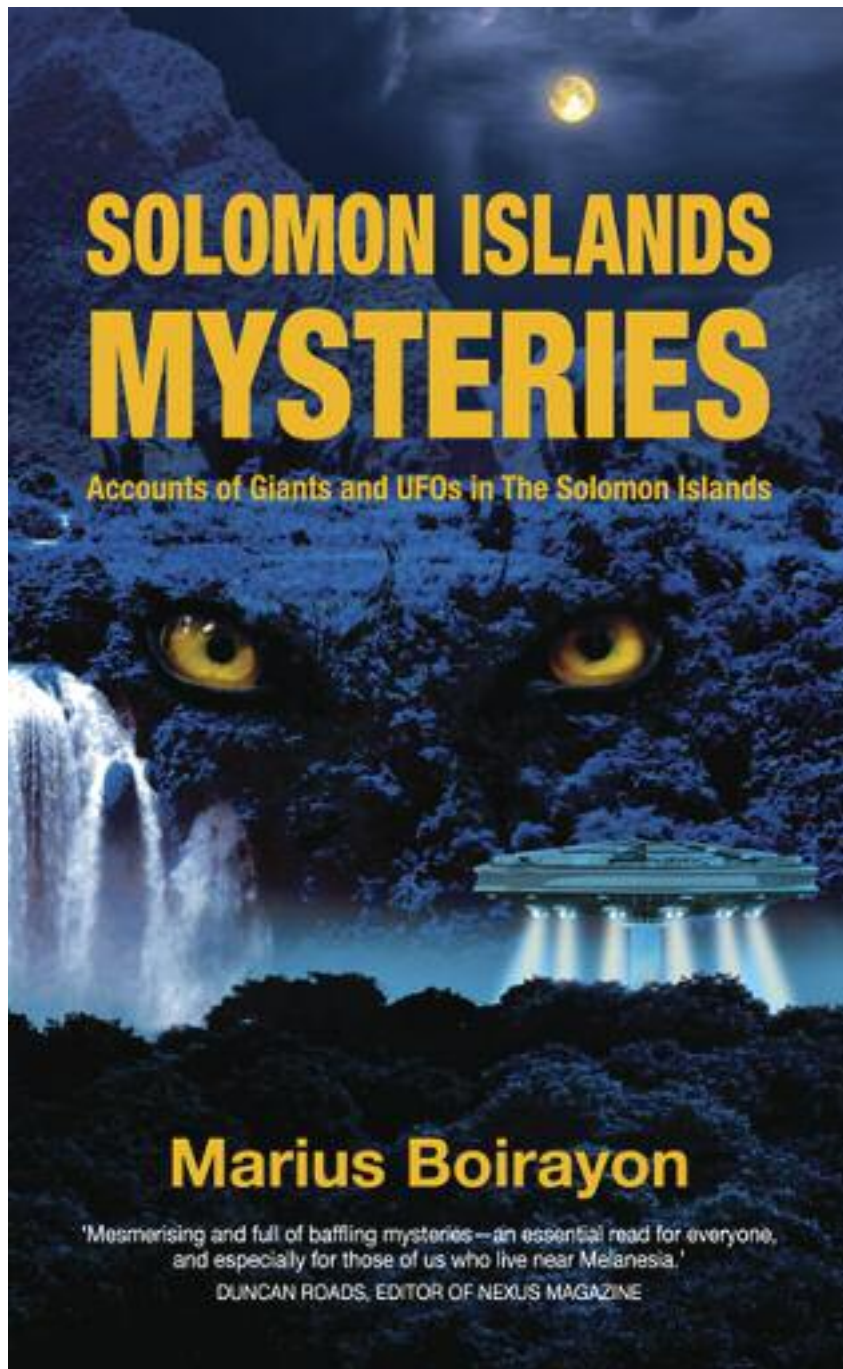

Finally, a big thank-you to everyone who came to the NEXUS Conference in Australia recently. We're already planning the next one. Till next time...

Duncan

Letters to the Editor ...

Farewell, Laurence Gardner

Dear Duncan: Sorry to be the bringer of sad news to your readers. The researcher and author Laurence Gardner died on 12 August 2010 in Exeter, England, after a long illness.

Laurence was well known in the world of "alternative history", with eight published books which presented often controversial revisionist theories, challenging orthodox views of world history.

My tribute to him in the *Independent* can be found at: <http://tinyurl.com/27z73lk>.

Yours faithfully,

Marcus Williamson, UK

[Dear Marcus: *We, too, are very sad to learn of Laurence Gardner's passing. Laurence contributed many times to NEXUS over the years and gave well-received talks at our conferences. He was a prodigious talent (we've reviewed all his books) and an inspiration to so many people. He is deeply missed.* Ed.]

Mystery Deaths in England

Dear Duncan: From 1996 to 1999, I worked as a craft design technician at Rawthorpe High School, Huddersfield, West Yorkshire, in the UK.

Towards the middle of November 1998, both the school staff and pupils fell ill due to some kind of super bug which was sweeping the north of England.

The main hospitals of both Leeds and Liverpool tried in vain to get the Department of Health to declare a state of emergency due to the high death rate.

The department stated at the time that 447 persons had to die before any state of emergency could be

declared! Both hospitals and their outer districts were seeing 5,000 bodies being refrigerated each week because the hospitals just could not cope! And still the department would not budge!

This epidemic lasted six weeks, with 30,000 dead. The worst hit were the very young and the aged. Some school children fell ill to a secondary illness which affected their nervous systems. The school I worked at did not see a full roll-call, even when I left in February 1999.

The amazing thing was that I didn't get ill at all. Either it was due to the fact that I was the only person in the school who was a vegetarian or I'd had 32 years of good Kiwi foods.

When I got back to New Zealand in 1999, I was amazed to find that there had been no news from the UK that there had been an influenza-type epidemic nor that 30,000 people had died from it.

This plague, whatever it was, seemed to have been confined to a swath of 40 to 50 miles wide across the north of England. It was almost as if the area had been sprayed with some kind of chemical from East Yorkshire to Liverpool!

The *Huddersfield Daily Examiner* will have the story in its archives because it showed the containers being used to house the dead until the coroner could get to them to determine the cause of death.

My reading a little about chemtrails and other experiments upon the public has made me think

about the possibility that the British government killed its own people in the name of science and about just how powerful the media are at keeping news from the outside world.

Yours faithfully,

David S., New Zealand

[Dear David: *It makes you wonder if vaccines were involved, too. I'd love to hear from any readers who could shed more light on this event.* Ed.]

UFOs over the Snowy

Duncan: It never ceases to amaze me how many people don't believe that UFOs are real—and what their reaction is when they see one.

I do a lot of night fishing in the Blowering Dam in the Snowy Mountains area of NSW, and when you are floating around a dam for six or seven hours at night, you tend to look at the sky.

I usually fish with my youngest son, J.J., who first brought my attention to these UFOs when he asked me what one looked like and pointed one out—which nearly made me fall off my perch!

On average, I will see two to 10 per night scooting across the sky, going from horizon to horizon in about two to three minutes, and at the altitude they are flying at (which is high) they are really moving.

Sometimes they stop and then start again; sometimes they zigzag all over the place or they turn at right angles or with just smooth curves, two or three in the time we're watching them. They are very bright lights moving at incredible speeds.

One night we pointed one

out to another bloke. His reaction before was to call us liars; his reaction after he saw it was to start his motor up and go and hide in his tent!

Amazingly enough, we witnessed a UFO dogfight one night. I was with J.J. and one of my elder sons and we were watching one UFO coming from the south when we spotted one coming from the east. They met right above us and started circling each other when sparks started to fly between them. Then one of them blew up in a shower of sparks like fireworks over Sydney Harbour! When I looked around, my elder son was on the floor of the boat in the foetal position, rocking back and forth.

John F., NSW, Australia

The Zeitgeist Movement

Dear Editor: If there are any NEXUS readers who do not yet know of this movement for radical social change, then they should immediately look at the website and spend a bit of time watching the two videos on YouTube. These are well put together to make a powerful message, even shocking to some.

The Zeitgeist Movement is the activist wing of The Venus Project, which is a serious attempt to visualise, in practical terms, what a better society could be like.

Local groups are springing up around both of these and seem to be attracting young people eager for an equitable and peaceful alternative society, one in which individual innovation is no longer stymied by the dead hand of big business.

... more Letters to the Editor

NB: Please keep letters to approx. 150 to 250 words in length. Ed.

I feel it to be urgent to bring these projects to your attention.

For more information, visit <http://www.thezeitgeistmovement.com>.

Roger T., Guildford, UK
[Thanks, Roger. I think *Zeitgeist* has "gone viral" for anyone using the Internet or its accessories who is interested in conspiracies and the like. I am watching with interest to see how *The Zeitgeist Movement* progresses. Ed.]

Australian Sovereignty

Hi Duncan: I've been a massive fan of your mag for many years. I've studied the ways of the world for longer, and got pissed off that I could find no way to make a change other than grow my own food, be aware and teach my kids to question everything.

Upon doing some research last week, I stumbled across a political party, established in February this year, which wants to bring back and live by the Magna Carta, human rights and common law. I'm not a big fan of any polmie, but after reading their web page I rang them the next day and now await some paperwork.

I was wondering if perhaps you have heard of them (I'm guessing you have): the Australian Sovereignty Association. I think many, many people would be very interested to hear about these guys, and I wondered if you would perhaps do a story on them if you deemed them worthy.

All I ask is this: please have a look at their web page and decide for yourself. Their website is

<http://www.sovereigntyparty.org.au>.

I love your magazine; thank you for it.

Best wishes and regards,
Tracey T., Australia
[Thanks, Tracey: I took a look at their website and found myself quite impressed with many of their ideas and approaches to issues. I will be keeping abreast of what their plans are in the future. Ed.]

NEXUS Conference Praise

Dear Duncan: NEXUS does it again! Having attended the full 2010 NEXUS Conference, I am certain I speak for all fellow guests: it was *absolutely brilliant!* People made spontaneous comments like "so much more than I expected"...

The presenters were of very high quality, the stalls were amazing, the venue was spot on, and a great time was had by all.

Thanks, Duncan and co.
Wolfgang F., Qld, Australia

The Scientific Dictatorship

Dear Duncan: Thanks again for a stimulating and informative issue [17/05].

However, there were a few things which were self-contradictory—more so than sometimes happens.

Andrew Marshall's odd essay on the scientific dictatorship is not consistent with evidence. The story of humanity has never been between the free-thinking individual (a variable description of those who have ideas different from the prevailing statist ones, of which there will be several mutually exclusive and usually ignorable ones until one of them in their

turn becomes the new opposing power) and structures of powers, etc.

It is between rival powers: states against states, civil wars between opposing armies, nobles against kings, palace coups, etc. Of course, alternative ideas have to come from one person initially, but unless taken up by many and then these form a rival power group, such ideas are hidden in the noise of everyday discourse.

Marshall's assertions from either fiction or anti-establishment figures (even as esteemed as Bertrand Russell—who I have time for and corresponded with, demonstrated with and admire) make his whole thesis laughable. If that's the best "evidence" he can concoct, then he has no argument. Where is the scientific dictatorship anywhere in any shape?

There are even fewer scientists in the new UK government than previously, for example. In any government I know of, they form a minority if they are there at all. Not that being a scientist can mean much: there are generally as many such qualified opposing those in power.

"Sciences" cannot be, by their very nature, "directed". Scientists can. Science is a process of determining the truth of the Universe by testable, repeatable evidence; anyone can do it; and, in so doing it, they are doing science; and many non-establishment scientists do (you print some of their stuff, rightly brandishing their credentials if they have

them, though this is incidental to the strength of their case).

Population control is not a science; it is a political program, as is eugenics (not to be confused with genetics). Individual scientists can be as barmy as the next man: being a scientist doesn't make anyone infallible. All science is tentative theories, only as good as the last failed attempt to falsify them.

So Marshall sets up straw men and attempts to knock them down with assertions instead of facts. Quixotic.

Then he proposes that "we" create an alternative. Who does he mean by "we"? Does that include the Taliban?

Next, to Ramiel Nagel's "Living with Phytic Acid in our Diets". When Nagel says things like "[b]ut raw is definitely not nature's way for grains, nuts, seeds, legumes and even some tubers like yams; nor is quick cooking or rapid heat processing such as extrusion". So can Nagel tell me: where do all the animals, reptiles and birds (and even some plants) do their cooking? Not to mention humankind for the first million years or so. It seems to me that evolution got by quite well. It seems it is very much nature's way to eat raw. Now, this isn't to say phytic acid and phytate may not be okay, but such a lead-in undermines Nagel's argument big time—which is a shame, as I think the rest of the article has substance.

Kind regards,
Ian C.

SUPER-FAST FLIP OF EARTH'S POLES FOUND

The Earth's magnetic poles swap every 300,000 years, a process that normally takes up to 5,000 years.

In 1995, an ancient lava flow with an unusual magnetic pattern was discovered in Oregon, USA. It suggested that the field at the time was moving by six degrees a day—at least 10,000 times faster than usual.

"Not many people believed it," says Scott Bogue of Occidental College in Los Angeles.

Such fast flips are impossible, according to models of the Earth's core, but this is now the second time that evidence has been found.

Bogue and his colleague Jonathan Glen of the United States Geological Survey in Menlo Park, California, say that they have found a second example in Nevada.

The lava rock suggests that in one year, Earth's magnetic field shifted by 53 degrees (*Geophysical Research Letters*, DOI: 10.1029/2010GL044286).

At that rate, a full flip would take less than four years, but there could be another interpretation.

"It may have been a burst of rapid acceleration that punctuated the steady movement of the field," says Bogue.

Earth is overdue for a reversal, and rapid shifts would cause widespread chaos—for navigation and migratory birds, for instance.

TOP-SECRET SPACE PLANE "DISAPPEARS" FOR TWO WEEKS

The X-37B was launched in April amid much publicity but scant detail about its true use.

The X-37B was built by Boeing's Phantom Works division, but the program was originally headed by NASA. It was later turned over to the Pentagon's research and development arm and then to a secretive US Air Force unit.

In May, avid skywatcher Ted Molczan studied the X-37B's orbit from his home in Toronto and said that its behaviour suggested it was

testing sensors for a range of new spy satellites. Since then, the X-37B has been arguably the least-secret secret project on the planet, as fellow backyard astronomers joined in the scrutiny, aided by how-to video guides and applications such as the Simple Satellite Tracker. That is, they did until 29 July when the shuttle disappeared, causing all kinds of consternation and conspiracy theories about its fate.

It was spotted two weeks later by a skywatcher in South Africa, who noticed that it was some 30 kilometres higher and on a different trajectory, according to calculations from other colleagues in Rome and Oklahoma.

Mr Molczan believes this may be another small piece of the puzzle about what role the shuttle may play in US military operations. It could drop a spy satellite on one run, then pick it up on the next without the satellite ever having been detected.

The X-37B can theoretically stay airborne for up to 270 days.

Concerned arms control advocates say this is clearly the beginning of the "weaponisation of space".

... GLOBAL NEWS ...

CUBA PREVENTS EPIDEMIC USING HOMEOPATHY

Cuban medical researchers successfully prevented the annual outbreak of leptospirosis in Cuba among a population of five million people across two regions using homeopathy in both 2007 and 2008, a homeopathy conference in Havana, Cuba, heard recently (read the full report at <http://tinyurl.com/2476kgn>).

Using homeoprophylaxis, the equivalent of a vaccine in homeopathy, a nosode of leptospirosis was prepared and administered, along with two Bach flower essences to address the typical mental and emotional effects of the disease.

Two doses were given to a population of five million over a month, bringing the incidence of infection to just under 10 people with no fatalities.

Previously, conventional treatment of the population with a vaccine still resulted in thousands of infections and a number of fatalities, and at a cost of US\$2million. The homeopathic solution cost just 10 per cent of that, at US\$200,000.

IMF DEMANDS BLOOD FROM FLOOD-RAVAGED PAKISTAN

The International Monetary Fund (IMF) and the World Bank are spurning Pakistan's pleas for the release of funds under a 2008 loan agreement until Islamabad implements radical economic policy changes demanded by them.

Earlier this summer, Pakistan was due to receive a US\$1.3 billion tranche from an IMF loan of \$11.3 billion. But the IMF delayed release of the funds after Islamabad failed to meet various IMF performance targets. Since then, more than 20 million people and 79 of Pakistan's 124 administrative districts have been affected by the Indus Valley floods.

Maurizio Giuliano, of the UN

Office for the Coordination of Humanitarian Affairs, described the floods as "one of the worst humanitarian disasters in UN history". According to Giuliano, at least 10 million people are currently without shelter. Much of the country's physical infrastructure—including an estimated 1,000 bridges and 4,000 kilometres of highway—has been destroyed and at least 23 per cent of the country's late summer–fall harvest ruined.

Talks with IMF leaders in Washington ended with IMF Managing Director Dominique Strauss-Kahn publicly saying that the IMF will not release a penny of the \$2.6 billion remaining from the loan negotiated in 2008 until Islamabad makes good on its pledge to implement the requisite reforms—including the elimination of energy price subsidies and the imposition of a general sales tax.

Strauss-Kahn's stance was seconded by World Bank President Robert B. Zoellick, who emphasised the need for Islamabad to implement pro-market reforms before all else.

(Source: *WSWS*, 10 September 2010, <http://tinyurl.com/2brl8kl>)

FRANCE AND GERMANY FORCED GREECE TO BUY ARMS

France and Germany, while publicly urging Greece to make harsh public spending cuts, bullied its government to confirm billions of euros in arms deals, a leading European MP alleged recently.

Daniel Cohn-Bendit, a Franco-German lawmaker and the leader of the Green group in the European Parliament, said that Paris and Berlin are seeking to force Prime Minister George Papandreou to spend Greece's scarce cash on submarines, a fleet of warships, helicopters and war planes.

Cohn-Bendit accused France and Germany of making their contributions to an IMF-led rescue package for the debt-ridden Greek economy contingent on Athens honouring massive arms deals signed by Papandreou's predecessor.

Despite its economic woes, which recently deepened spectacularly when its credit rating was downgraded, Greece is one of Europe's biggest arms buyers, seeking to keep pace with its regional rival Turkey.

... GLOBAL NEWS ...

INSIDE "TOP SECRET AMERICA"

In July, the *Washington Post* published its "Top Secret America" investigation—a sweeping portrait of America's heavily privatised military–corporate–intelligence establishment.

"Top Secret America" (TSA) is based on hundreds of interviews with government officials, contractors and independent experts as well as on satellite imagery, government contracts, property records, promotional materials from contractors, photo reconnaissance of suspected intelligence facilities and more.

Here is a summary of the findings:

At last count, the official US intelligence budget stood at \$75 billion—more than 2.5 times what it was on 10 September 2001.

The US has become utterly dependent on contractors for basic national security and intelligence functions. The National Reconnaissance Office literally couldn't launch satellites without contractors.

Contractors have permeated every sphere of intelligence from aircraft and satellite operations to human intelligence and information technology. Contractors do

everything from recruiting spies and interrogating detainees to processing civil forfeitures in the war on drugs.

About 110 contractors do about 90 per cent of the top-secret work. The biggest of the big are household names: Booz Allen Hamilton, L-3 Communications, CSC, Northrop Grumman, General Dynamics and SAIC. Contractors make up nearly 30 per cent of the workforce of America's intelligence agencies. At the Department of Homeland Security, the ratio of contractors to staffers is 50:50. TSA estimates that of the 854,000 people with top-secret clearances, 265,000 are contractors.

The TSA report found 1,931 intelligence contracting firms doing work classified as "top secret" for 1,271 government organisations at over 10,000 sites around the country, with 533 of the contracting firms founded after the 9/11 attacks.

The TSA investigation also found 18 government organisations contracting with 37 private companies to conduct psychological operations, 16 using 50 companies for "special military operations" (e.g., SWAT teams and unconventional warfare), and 14

contracting with 50 companies for top-secret conventional military operations.

Top-secret projects aren't the exclusive preserve of familiar players like the CIA, the Pentagon, the NSA and the FBI. You might be surprised to learn that the Department of Housing and Urban Development, the US Fish and Wildlife Service, the Department of Labor and the US Postal Inspection Service also do some top-secret work.

The *Washington Post* reports that at least 263 intelligence organisations have been created or reorganised in response to 9/11. The Bush administration created the Office of the Director of National Intelligence (ODNI) in 2004 to keep track of the massive undertaking. Unfortunately, ODNI hasn't been very successful, in part because the agency has no legal or budgetary control over the agencies it is supposedly supervising. The CIA has been known to thwart ODNI by simply classifying reports as too secret for ODNI to see.

MELTING RATE OF ICECAPS LOWER THAN EXPECTED

The Greenland and West Antarctic icecaps are melting at half the speed previously predicted, according to analysis of recent data from the GRACE satellites, GPS measurements on land, and sea floor pressure measurements.

The research results, from a joint American–Dutch team from the Jet Propulsion Laboratory, Delft University of Technology and the Netherlands Institute for Space Research, are published in the September issue of *Nature Geoscience*.

Previous estimates for the Greenland icecap had the ice melting at a rate of 230 gigatonnes (230,000 billion kilograms) a year. That would result in an average rise in global sea levels of around 0.75

"I was forced into early retirement after the Bill Gates Foundation stepped up its anti-malaria campaign."

millimetres a year. For West Antarctica, the estimate was 132 gigatonnes a year. However, it now turns out that these results were not properly corrected for glacial isostatic adjustment—where the Earth's crust rebounds as a result of the melting of the massive icecaps from the last major ice age c. 20,000 years ago.

One of the researchers, Dr Bert Vermeersen (TU Delft), explains: "The corrections for deformations of the Earth's crust have a considerable effect on the amount of ice that is estimated to be melting each year. We have concluded that the Greenland and West Antarctica icecaps are melting at approximately half the speed originally predicted."

The average rise in sea levels as a result of the melting icecaps is also lower, according to their findings.

(Source: *ScienceDaily.com*, 7 September 2010, <http://tinyurl.com/zaldr6v>)

MISCARRIAGES AND STILLBIRTHS LINKED TO H1N1 VACCINE

A shocking report from the National Coalition of Organized Women (NCOW) presented US data from two different sources demonstrating that the 2009–10 H1N1 vaccinations contributed to an estimated 1,588 miscarriages and stillbirths. An upper-range estimate may be as high as 3,587 cases.

NCOW also highlights the disturbing fact that the US Centers for Disease Control (CDC) failed to inform their vaccine providers about the incoming data on suspected A-H1N1 vaccine-related foetal demise, let alone pregnant women.

Capture-recapture statistical methods were used to estimate the true number of miscarriages and stillbirths. Typically, even so-called "complete" studies conducted by the CDC have been shown to miss from 10 to 90 per cent of the actual cases because of under-reporting.

SATELLITEGATE: DEGRADED SENSORS COVER-UP

by John O'Sullivan

US government scientists now admit that sensors on at least five satellites used to provide climate data were "degraded" to the extent that temperature data may be out by 10 to 15 degrees.

In an escalating row dubbed "Satellitegate", further evidence shows that the National Oceanic and Atmospheric Administration (NOAA) knew of these faults for years. The world's top climate scientists and even prior governmental reports cite underfunding and misallocation as the trigger for spiralling satellite data calamities.

NOAA-16 had been commissioned as a polar-orbiting satellite featuring AMSU, AVHRR and High Resolution Infrared Radiation Sounder (HIRS) measuring instruments which were discovered by a member of the public to have suffered catastrophic failure. The official summary shows no report of any "sensor degradation" since its launch in September 2000, yet on the advice of top climate scientists I'm reliably informed that such failures were made known to NOAA years ago.

Nonetheless, the US agency continued to sell its flawed data products to numerous international institutions without making it public that satellite sensors were "degraded" and unreliable for assessing climate change. The automatic readings had been contaminated by hundreds, if not thousands, of false and absurdly high temperature readings, some as high as 612 degrees Fahrenheit. We now know that NOAA was aware of these outrageous anomalies at least in 2006 but did not remedy them.

NOAA has not revealed how many of its users (mostly international meteorologists and climate researchers) were affected, but we know the data was sold throughout the world and its readings of land and ocean temperatures have been used by climate scientists in their models since the satellite's launch. As a consequence and without full disclosure by NOAA, it is feared that innumerable scientific studies about rising global temperatures are now entirely invalid.

It is open to speculation whether NOAA may have been hesitant to admit to longstanding faults for fear of a rash of lawsuits from its customers, mainly national governments and university research institutes.

Based on such data, most scientists agree that our planet may have warmed by 0.6 degrees Centigrade during the 20th century (with a margin of error of 0.5°C, but this error margin now looks way off).

From analysis of the bogus online temperature data before NOAA removed it from view, it may be determined that almost all the false temperature readings were far in excess of expected averages, many by a factor of four or five, and almost none of the bogus temperatures was lower than average.

But it wasn't just a handful of sceptical climatologists sounding the alarm. The National Academy of Sciences, in its 455-page 2007 report, concluded that because of degradation in the US satellite network the country's ability to monitor the climate and severe weather was "at great risk".

Satellitegate points to yet another infuriating government cover-up of fudged global warming numbers. Despite the clamour for years from scientists from all sides of the global warming debate for more transparency and better access to such data, zealous gatekeepers within NASA and Britain's Climatic Research Unit have refused such requests and unlawfully defied Freedom of Information Act demands.

The Ringing Cedars - a stunning series of books from Russia

In 1994 a Siberian elder told the entrepreneur Vladimir Megré a fascinating story about the "ringing cedars" - trees respected from Biblical times for their curative powers and the capacity to reconnect human beings with the Divine. The elder told him where such a ringing cedar was growing in the Siberian backwoods. Vladimir Megré set out on an expedition to find the tree. But his encounter with the elder's granddaughter, Anastasia transformed him so deeply that he abandoned his commercial plans and, penniless went to Moscow to write a book about what she shared with him.

What happened next thrilled and inspired millions with the series selling over 10 million copies in Russian alone. Translated into 20 languages, these highly unusual books provide extraordinary insights into dozens of subjects, from natural child rearing to the production of high-energy, healing foods, from natural child rearing to the amazing potential that awaits every one of us, extraterrestrial civilisations, from ancient megalithic science to the vital importance of breast feeding, and from sacred sexuality to the hidden history of world religions.

- Volume 1: Anastasia
- Volume 2: The Ringing Cedars of Russia
- Volume 3: The Space of Love
- Volume 4: Co-creation
- Volume 5: Who Are We?
- Volume 6: The Book of Kin
- Volume 7: The Energy of Life
- Volume 8.1: The New Civilisation
- Volume 8.2: Rites of Love

THE IMPERIAL ANATOMY OF AL-QAEDA

In response to the CIA's need for more discretion, the Safari Club intelligence network was formed and went on to finance and organise an international conglomerate of terrorist groups including the Taliban and Al-Qaeda.

by Andrew Gavin Marshall

<http://tinyurl.com/39vpfqy>

This is part one of a three-part series, "The Imperial Anatomy of Al-Qaeda: The CIA's Drug-Running Terrorists and the 'Arc of Crisis'", which examines the geopolitical historical origins and nature of what we today know as Al-Qaeda [Al-Qa'ida], which is in fact an Anglo-American intelligence network of terrorist assets used to advance American and NATO imperial objectives in various regions around the world.

The Safari Club

In 1976, a coalition of intelligence agencies was formed, called the Safari Club. This marked a discreet and highly covert coordination among various intelligence agencies which would last for decades. It was formed at a time when the US Central Intelligence Agency (CIA) was embroiled in domestic scrutiny over the Watergate scandal and a congressional investigation into its covert activities, forcing the CIA to become even more covert.

In 2002, the Saudi intelligence chief, Prince Turki bin Faisal, gave a speech in which he stated that in response to the CIA's need for more discretion, "a group of countries got together in the hope of fighting Communism and established what was called the Safari Club. The Safari Club included France, Egypt, Saudi Arabia, Morocco, and Iran [under the Shah]".¹ However, "[t]he Safari Club needed a network of banks to finance its intelligence operations. With the official blessing of George H. W. Bush as the head of the CIA", Saudi intelligence chief Kamal Adham "transformed a small Pakistani merchant bank, the Bank of Credit and Commerce International (BCCI), into a world-wide money-laundering machine, buying banks around the world to create the biggest clandestine money network in history".²

As CIA Director, George H. W. Bush "cemented strong relations with the intelligence services of both Saudi Arabia and the shah of Iran. He worked closely with Kamal Adham, the head of Saudi intelligence, brother-in-law of King Faisal and an early BCCI insider". Adham had previously acted as a "channel between [Henry] Kissinger and [Egyptian President] Anwar Sadat" in 1972. In 1976, Iran, Egypt and Saudi Arabia formed the Safari Club "to conduct through their own intelligence agencies operations that were now difficult for the CIA". It was largely organised by the head of French intelligence, Alexandre de Marenches.³

The "Arc of Crisis" and the Iranian Revolution

When Jimmy Carter became US President in 1977, he appointed over two dozen members of the Trilateral Commission (TC) to his administration. The TC is an international think-tank, formed in 1973 by Zbigniew Brzezinski and David Rockefeller.

In 1978, Brzezinski gave a speech in which he stated: "An arc of crisis stretches along the shores of the Indian Ocean, with fragile social and political structures in a region of vital importance to us threatened with

fragmentation. The resulting political chaos could well be filled by elements hostile to our values and sympathetic to our adversaries." The "arc of crisis" stretched from Indochina to southern Africa, although, more specifically, the particular area of focus was "the nations that stretch across the southern flank of the Soviet Union from the Indian subcontinent to Turkey, and southward through the Arabian Peninsula to the Horn of Africa". "The center of gravity of this arc is Iran, the world's fourth largest oil producer and for more than two decades a citadel of US military and economic strength in the Middle East. Now it appears that the 37-year reign of Shah Mohammed Reza Pahlavi is almost over, ended by months of rising civil unrest and revolution."⁵

With rising discontent in the region, "[t]here was this idea that the Islamic forces could be used against the Soviet Union. The theory was, there was an arc of crisis, and so an arc of Islam could be mobilized to contain the Soviets. It was a Brzezinski concept".⁶

It is important to note that Rockefeller interests "had directed US policy in Iran since the CIA coup of 1953".²⁵ Following the Shah's flight from Iran, there were increased pressures within the United States by a handful of powerful people to have the Shah admitted to the United States. These individuals were Zbigniew Brzezinski, former Secretary of State Henry Kissinger, John J. McCloy, former statesman and senior member of the Bilderberg Group, Trilateral Commission and the Council on Foreign Relations, who was also a lawyer for Chase Manhattan, and, of course, David Rockefeller.²⁶

Chase Manhattan Bank had more interests in Iran than any other US bank. In fact, the Shah had "ordered that all his government's major operating accounts be held at Chase and that letters of credit for the purchase of oil be handled exclusively through Chase. The bank also became the agent and lead manager for many of the loans to Iran. In short, Iran became the crown jewel of Chase's international banking portfolio".²⁷

In February 1979, Iran had been taking "steps to market its oil independently of the Western oil majors. In 1979, as in 1953, a freeze of Iranian assets made this action more difficult".³² This was significant for Chase Manhattan not simply because of the close interlocking of the board with the boards of oil companies, and not to mention Rockefeller himself—patriarch of the family whose name is synonymous with oil—but also because Chase exclusively handled all the letters of credit for the purchase of Iranian oil.³³

The Shah being accepted into the United States,

under public pressure from Henry Kissinger, Zbigniew Brzezinski and David Rockefeller, precipitated the hostage crisis, which occurred on 4 November. Ten days later, Carter froze all Iranian assets in US banks on the advice of his Treasury Secretary, William Miller. Miller just happened to have ties to Chase Manhattan Bank.³⁴

In 1979, "effectively restricting the access of Iran to the global oil market, the Iranian assets freeze became a major factor in the huge oil price increases of 1979 and 1981".³⁵ Added to this, in 1979 British Petroleum cancelled major oil contracts for oil supply which, along with cancellations taken by Royal Dutch Shell, drove the price of oil up higher.³⁶ With the first major oil price rises in 1973 (urged on by US Secretary of State Henry Kissinger), the Third World was forced to borrow heavily from US and European banks to finance development. With the second oil price shocks of 1979, the US Federal Reserve, with Paul Volcker as its new Chairman (himself having served a career under David Rockefeller at Chase Manhattan), dramatically raised interest rates from two

**Developing nations
could not afford to pay
such interest on their loans,
and thus the 1980s debt
crisis spread throughout
the Third World...**

per cent in the late 1970s to 18 per cent in the early 1980s. Developing nations could not afford to pay such interest on their loans, and thus the 1980s debt crisis spread throughout the Third World, with the IMF and World Bank coming to the "rescue" with their structural adjustment programs (SAPs), which ensured western control over the developing world's economies.³⁷

Covertly, the United States helped a radical Islamist government come to power in Iran, the centre of the "arc of crisis", and then immediately stirred up conflict and war in the region. Five months before Iraq invaded Iran, in April 1980 Zbigniew Brzezinski openly declared the willingness of the US to work closely with Iraq. Two months before the war, Brzezinski met with Saddam Hussein in Jordan, where he gave support for the destabilisation of Iran.³⁸ While Saddam was in Jordan, he also met with three senior CIA agents, the meeting arranged by King Hussein of Jordan. He then went to meet with King Fahd in Saudi Arabia, informing him of his plans to invade Iran, and then met with the King of Kuwait to inform him of the same thing. He gained support from America and financial and arms support from the Arab oil-producing countries. Arms to Iraq were funnelled through Jordan, Saudi Arabia and Kuwait.³⁹ The war lasted until 1988 and resulted in over a million deaths.

This was the emergence of the "strategy of tension" in the "arc of crisis"; in particular, the covert support (whether in arming, training or financing) of radical Islamic elements to foment violence and conflict in a region. It was the old imperial tactic of "divide and

conquer": pit the people against each other so that they cannot join forces against the imperial power. This violence and radical Islamism would further provide the pretext for which the US and its imperial allies could then engage in war and occupation within the region, all the while securing its vast economic and strategic interests.

The Arc of Crisis in Afghanistan

In 1978, the progressive Taraki government in Afghanistan managed to incur the anger of the United States due to "its egalitarian and collectivist economic policies".⁴⁰ The Afghan government was widely portrayed in the West as "Communist", and thus a threat to US national security. The government did, however, undertake friendly policies and engagement with the Soviet Union, but it was not a Communist government.

In 1978, as the new government came to power, almost immediately the US began covertly funding rebel groups through the CIA.⁴¹ In 1979, Zbigniew Brzezinski worked closely with his aide from the CIA, Robert Gates (who is currently Secretary of Defense), in shifting President Carter's Islamic policy. As Brzezinski said in a 1998 interview with a French publication: "According to the official version of history, CIA aid to the Mujahadeen began during 1980, that is to say, after the Soviet army invaded Afghanistan, 24 December 1979. But the reality, secretly guarded until now, is completely otherwise: Indeed, it was July 3, 1979 that President Carter signed the first directive for secret aid to the opponents of the pro-Soviet regime in Kabul. And that very day, I wrote a note to the president in which I explained to him that in my opinion this aid was going to induce a Soviet military intervention."⁴²

As author Peter Dale Scott pointed out in *The Road to 9/11*:* "For generations in both Afghanistan and the Soviet Muslim Republics the dominant form of Islam had been local and largely Sufi. The decision to work with the Saudi and Pakistani secret services meant that billions of CIA and Saudi dollars would ultimately be spent in programs that would help enhance the globalistic and Wahhabistic jihadism that are associated today with al Qaeda."⁴⁴

Hafizullah Amin, a top official in Taraki's government, who many believed to be a CIA asset, orchestrated a coup in September 1979 and "executed Taraki, halted the reforms, and murdered, jailed, or exiled thousands of Taraki supporters as he moved toward establishing a

fundamentalist Islamic state. But within two months, he was overthrown by PDP remnants including elements within the military".⁴⁵ The Soviets also intervened in order to replace Amin, who was seen as "unpredictable and extremist", with "the more moderate Babrak Karmal".⁴⁶

The Soviet invasion thus prompted the US national security establishment to undertake the largest covert operation in history. When Ronald Reagan replaced Jimmy Carter in 1981, the covert assistance to the Afghan Mujahideen not only continued on the path set by Brzezinski but it rapidly accelerated, as did the overall strategy in the "arc of crisis". When Reagan became President, his Vice President became George H. W. Bush, who, as CIA Director during the Ford administration, had helped establish the Safari Club intelligence network and the Bank of Credit and Commerce International in Pakistan. In the "campaign to aid the Afghan rebels...BCCI clearly emerged as a US intelligence asset" and CIA Director "Casey began to use the outside—the Saudis, the Pakistanis, BCCI—to run what they couldn't get through Congress. BCCI president Abedi had the money to help" and the CIA director had "met repeatedly" with the president of BCCI.⁴⁷

Thus, in 1981, Director Casey of the CIA worked with Saudi Prince Turki bin Faisal, who ran the Saudi intelligence agency GID, and the Pakistani ISI "to create a foreign legion of jihadi Muslims or so-called Arab Afghans". This idea had "originated in the elite Safari Club that had been created by

French intelligence chief Alexandre de Marenches."⁴⁸

In 1986, the CIA backed a plan by the Pakistani ISI "to recruit people from around the world to join the Afghan jihad".

Subsequently: "More than 100,000 Islamic militants were trained in Pakistan between 1986 and 1992, in camps overseen by CIA and MI6, with the SAS British Special Forces training future al-Qaida and Taliban fighters in bomb-making and other black arts. Their leaders were trained at a CIA camp in Virginia. This was called Operation Cyclone and continued long after the Soviets had withdrawn in 1989."⁴⁹

CIA funding for the operations "was funneled through General Zia and the ISI in Pakistan".⁵⁰ Interestingly, Robert Gates, who previously served as assistant to Brzezinski in the National Security Council, stayed on in the Reagan–Bush administration as executive assistant to CIA Director Casey, currently Secretary of Defense.

This was the emergence of the "strategy of tension"... It was the old imperial tactic of "divide and conquer": pit the people against each other so that they cannot join forces against the imperial power.

The Global Drug Trade and the CIA

As a central facet of the covert financing and training of the Afghan Mujahideen, the role of the drug trade became invaluable. The global drug trade has long been used by empires for fuelling and financing conflict with the aim of facilitating imperial domination.

It was during the 1980s that "the CIA's covert war in Afghanistan transformed Central Asia from a self-contained opium zone into a major supplier of heroin for the world market". "Until the late 1970s, tribal farmers in the highlands of Afghanistan and Pakistan grew limited quantities of opium and sold it to merchant caravans bound west for Iran and east to India. In its decade of covert warfare against the Soviet

occupation of Afghanistan, the CIA [with its] operations provided the political protection and logistics linkages that joined Afghanistan's poppy fields to heroin markets in Europe and America."⁵⁵

In 1977, General Zia-ul-Haq launched a military coup in Pakistan, "imposed a harsh martial-law regime" and executed former President Zulfikar Ali Bhutto (father to Benazir Bhutto). When Zia came to power, the Pakistani ISI was a "minor military intelligence unit" but, under the "advice and assistance of the CIA", General Zia transformed the ISI "into a powerful covert unit and made it the strong arm of his martial-law regime".⁵⁶

The CIA and Saudi money flowed not only to weapons and training for the Mujahideen but also into the drug trade. Pakistani President Zia-ul-Haq appointed General Fazle Haq as the military governor of Pakistan's North-West Frontier Province (NWFP) who would "consult with Brzezinski on developing an Afghan resistance program" and who would become a CIA asset. When CIA Director Casey or Vice President George H. W. Bush reviewed the CIA Afghan operation, they went to see Haq, who by 1982 was considered by Interpol to be an international narcotics trafficker. Haq moved much of the narcotics money through the BCCI.⁵⁷

In May 1979, prior to the December invasion of the Soviet Union into Afghanistan, a CIA envoy met with Afghan resistance leaders in a meeting organised by the ISI. The ISI "offered the CIA envoy an alliance with its own Afghan client, Gulbuddin Hekmatyar", who led a small guerrilla group. The CIA accepted, and over the following decade half of the CIA's aid went to Hekmatyar's guerrillas.⁵⁸

Hekmatyar became Afghanistan's leading Mujahideen drug lord and developed a "complex of six heroin labs in an ISI-controlled area of Baluchistan (Pakistan)".⁵⁹

The US subsequently through the 1980s, in conjunction with Saudi Arabia, gave Hekmatyar more than US\$1 billion in armaments. Immediately, heroin began flowing from Afghanistan to America. By 1980, drug-related deaths in New York City rose 77 per cent since 1979.⁶⁰

By 1981, the drug lords in Pakistan and Afghanistan supplied 60 per cent of America's heroin. Trucks going into Afghanistan with CIA arms from Pakistan would return with heroin "protected by ISI papers from police search".⁶¹

By 1981, the drug lords...supplied 60 per cent of America's heroin. Trucks going into Afghanistan with CIA arms from Pakistan would return with heroin "protected by ISI papers from police search".

Haq, the CIA asset in Pakistan, "was also running the drug trade", of which the bank BCCI "was completely involved". In the 1980s, the CIA insisted that the ISI create "a special cell for the use of heroin for covert actions". "This cell promoted the cultivation of opium and the extraction of heroin in Pakistani territory as well as in the Afghan territory under Mujahideen control for being smuggled into Soviet controlled areas in order to make the Soviet troops heroin addicts."⁶² This plan

apparently originated at the suggestion of French intelligence chief and Safari Club founder Alexandre de Marenches, who recommended it to CIA Director Casey.⁶³

In the 1980s, one program undertaken by the United States was to finance Mujahideen propaganda in textbooks for Afghan schools. The US gave the Mujahideen \$43 million in "non-lethal" aid for the textbook project alone, which was given by USAID.

"The US Agency for International Development, USAID, coordinated its work with the CIA, which ran the weapons program" and "[t]he US government told the AID to let the Afghan war chiefs decide the school curriculum and the content of the textbooks".⁶⁴ The textbooks were "filled with violent images and militant Islamic teachings" and "filled with talk of jihad and featured drawings of guns, bullets, soldiers and mines". Since the covert war of the 1980s, the textbooks "have served...as the Afghan school system's core curriculum. Even the Taliban used the American-produced books". The books were developed through a USAID grant to the "University of Nebraska-Omaha and its Center for Afghanistan Studies" and, when the books were smuggled into Afghanistan through regional military

leaders, "[c]hildren were taught to count with illustrations showing tanks, missiles and land mines". USAID stopped this funding in 1994.⁶⁵

The Rise of the Taliban

When the Soviets withdrew from Afghanistan in 1989, the fighting continued between the Afghan government, backed by the USSR, and the Mujahideen, backed by the US, Saudi Arabia and Pakistan. When the Soviet Union collapsed in 1991, so too did its aid to the Afghan government, which itself was overthrown in 1992. However, fighting almost immediately broke out between rival factions vying for power, including Hekmatyar.

In the early 1990s, an obscure group of "Pashtun country folk" had become a powerful military and political force in Afghanistan, known as the Taliban.⁶⁶ The Taliban "surfaced as a small militia force operating near Kandahar city during the spring and summer of 1994, carrying out vigilante attacks against minor warlords". As growing discontent with the warlords grew, so too did the reputation of the Taliban.⁶⁷

The Taliban acquired an alliance with the ISI in 1994, and throughout 1995 the relationship between the Taliban and the ISI accelerated and "became more and more of a direct military alliance". The Taliban ultimately became "an asset of the ISI" and "a client of the Pakistan army".⁶⁸ Further, "[b]etween 1994 and 1996, the USA supported the Taliban politically through its allies Pakistan and Saudi Arabia, essentially because Washington viewed the Taliban as anti-Iranian, anti-Shia, and pro-Western".⁶⁹

Selig Harrison, a scholar with the Woodrow Wilson International Center for Scholars and "a leading US expert on South Asia", said at a conference in India that the CIA worked with Pakistan to create the Taliban. Harrison has "extensive contact" with the CIA, as "he had meetings with CIA leaders at the time when Islamic forces were being strengthened in Afghanistan" while he was a senior associate of the Carnegie Endowment for International Peace.

As he further revealed in 2001, "[t]he CIA still has close links with the ISI".⁷⁰ By 1996, the Taliban had control of Kandahar, but, still, fighting and instability continued in the country.

Osama bin Laden and Al-Qaeda

Between 1980 and 1989, roughly \$600 million was passed through Osama bin Laden's charity front organisations, specifically the Maktab al-Khidamat (MAK), also known as Al-Kifah. The money mostly originated with wealthy donors in Saudi Arabia and

other areas in the Persian Gulf, and was funnelled through his charity fronts to arm and fund the Mujahideen in Afghanistan.⁷¹

In the 1980s, the British Special Forces (SAS) were training Mujahideen in Afghanistan, as well as in secret camps in Scotland, and the SAS was largely taking orders from the CIA. The CIA also indirectly began to arm Osama bin Laden.⁷² Osama bin Laden's front charity, the MAK, "was nurtured" by the Pakistani ISI.⁷³

Osama bin Laden was reported to have been personally recruited by the CIA in 1979 in Istanbul. He had the close support of Prince Turki bin Faisal, his friend and head of Saudi intelligence, and also developed ties with Hekmatyar in Afghanistan,⁷⁴ both of whom were pivotal figures in the CIA-Safari Club network.

General Akhtar Abdur Rahman, the head of the Pakistani ISI from 1980 to 1987, would meet regularly with Osama bin Laden in Pakistan, and they formed a partnership in demanding a tax on the opium trade from warlords so that, by 1985, bin Laden and the ISI were splitting the profits of over \$100 million per year.⁷⁵ In 1985, Osama bin Laden's brother, Salem, stated that Osama was "the liaison between the US, the Saudi government, and the Afghan rebels".⁷⁶

In 1988, bin Laden discussed "the establishment of a new military group" which would come to be known as Al-Qaeda [Al-Qa'ida].⁷⁷ Osama bin Laden's charity front, the MAK, (eventually to form Al-Qaeda) founded the Al-Kifah [Refugee] Center in Brooklyn, New York, to recruit Muslims for the jihad against the Soviets. Al-Kifah Center was founded in the late 1980s with the support of the US government, which provided visas for known terrorists associated with the organisation, including Ali Mohamed, the "blind sheikh" Omar Abdel-Rahman and possibly the lead 9/11 hijacker, Mohamed Atta.⁷⁸

This coincided with the creation of Al-Qaeda, for which Al-Kifah Center was a recruiting front. Foot soldiers for Al-Qaeda were "admitted to the United States for training under a special visa program". The FBI had been surveilling the training of terrorists; however, "it terminated this surveillance in the fall of 1989". In 1990, the CIA granted Sheikh Omar Abdel-Rahman a visa to come and run Al-Kifah Center; he was considered an "untouchable" as he was "being protected by no fewer than three agencies" including the State Department, the National Security Agency (NSA) and the CIA.⁷⁹

Robin Cook, a former British MP and Foreign Secretary, wrote that Al-Qaeda, "literally 'the database',

...throughout 1995 the relationship between the Taliban and the ISI accelerated and "became more and more of a direct military alliance".

DEMOCRACY AND THE RIGHT TO CHOOSE FREELY

We who live in Australia have long thought that our nation was a democracy. We vote in elections; we have a Prime Minister and a Parliament that supposedly represent our views and pass laws for our protection; and we have the right to learn, congregate, raise our families and worship as we see fit.

At least, that's what we've been led to believe.

Recent attacks against the Australian Vaccination Network (AVN), a small, volunteer-run non-profit organisation composed of parents and health professionals who question the safety and effectiveness of vaccines, have revealed that our democratic rights are neither assured nor guaranteed by government or society.

The AVN has been the victim of a coordinated campaign starting with a group called Stop the AVN that is closely associated with the Australian Skeptics – an organisation that has violently opposed any form of natural therapy for years – and extending up to the NSW Health Care Complaints Commission (HCCC), the Office of Liquor, Gaming and Racing (OLG&R), the Australian Medical Association (AMA), the Federal Department of Health and other government and non-government bodies whose role is to protect the current thinking on vaccination and medicine at all costs.

These moves have revealed the sinister nature of our country's inability to deal with opposition – even when that opposition is legally-based and intended to support and inform a very important sector of our society – Australia's parents.

The AVN needs your help – and trust me, you need the AVN too. At this time, we are standing firm to protect you from the coming of health fascism – as evidenced by the opinion of most mainstream medical bodies and practitioners that you are not capable of deciding what is best for yourself and your family when it comes to your health.

If you believe that these are important issues; if you feel that we are on the razor's edge and about to tip over into a totalitarian system of compulsory vaccination and medication, then please consider joining the AVN and throwing your support behind freedom, democracy and the right to choose freely. If we are not prepared to support freedom now, we will surely lose it forever.

YES - I support freedom and democracy. I want to be a member of the AVN for \$50 (\$75 to receive Living Wisdom magazine in the post).

YES - I want to support you with a donation of \$_____.

The Consequences of Hemp Prohibition

It is often said that in war the first casualty is truth. Nowhere is this more accurately seen than in the so-called War on Drugs. Beginning with an hysterical "reefer madness" media campaign by the Hearst press in the early 1930s, the image of cannabis (*Cannabis sativa*), or hemp, was transformed from a valuable fibre crop and important source of oil and medicine to "a heathen devil weed with its roots in hell". Whether by design or circumstance, the suppression of cannabis paved the way for a dramatic transformation of the world's economy.

Prior to the late 19th century, the world operated on a carbohydrate-based system, where all the fibre, fuel and medicine required to meet human needs was produced by photosynthesis, with the Sun's energy utilised to combine carbon dioxide and water into cellulose, the basic building material of the natural world. During the 20th century, much of this carbohydrate was replaced by hydrocarbons generated by the extractive coal and oil industries. In place of natural hemp fabrics came the petrochemical fabrics. Nylon, polyester and other synthetics were manufactured on a massive scale and promoted by aggressive advertising. In place of the paper bags and boxes came the ubiquitous plastic bags.

Billions of these toxic, non-degradable items have been manufactured only to be used once and then discarded, to find their way into streams and waterways and eventually to coalesce into massive submerged islands of garbage in the Pacific and other oceans, releasing a toxic time bomb of hormone-disrupting chemicals into the marine and human ecosystems. Instead of paper being made from annual fibre crops, vast tracts of ancient forest have been felled and chipped, then cooked with chlorine and other hazardous chemicals to produce an inferior product when compared to what it replaced.

The destruction and contamination of the natural world is not the only adverse effect of the suppression of cannabis. Again, whether by design or circumstance, the legislation put in place to enforce the prohibition has served as a template towards the establishment of a repressive police state with an incremental curtailment of individual liberty. Under the guise of preventing damage from the "scourge of drugs", the population has been subjected to phone-tapping and other methods of surveillance, intrusive and often violent police raids and a range of chemical surveillance including enforced testing of hair, urine and saliva. The majority of the current prison population comprises non-violent drug offenders, especially in the United States where the privatisation of the prison industry has created a repressive but highly profitable industry for the Wackenhut Corporation and other prison industry players.

The damaging consequences of the prohibition are not restricted to individuals but are felt across the geopolitical sphere.

Because much of the cannabis and the other plant-based drugs are grown in Third World countries, political intervention under the guise of drug interdiction has been and continues to be manipulated for political purposes by serving as a pretence for military action. The invasion of Panama and the political turmoil in Afghanistan, Mexico and Colombia, to name a few countries, are the results of the militarisation of the War on Drugs. Despite the mass of evidence implicating the American military in massive-scale drug-dealing, including the importation of many tonnes of cocaine from South America to the USA to help fund covert activities, the drug war warriors continue to claim the moral high ground.

The Growth of Hemp Industries

However, due to the tireless efforts of thousands of hemp activists around the world, the tide is slowly starting to turn. Cannabis hemp can now be grown legally in most countries, although the United States remains a notable exception. Whilst hemp industries are still a minor player on the world scene, their scale and range of products are steadily rising due to the increasing acceptance of the concept of industrial agriculture. In order to produce true sustainability, industrial agriculture seeks to use annual crops as the starting point for factory production, replacing mined inputs such as iron ore and coal. But can hemp and other select crops really make an impact on the looming environmental catastrophe?

Imagine your country one generation into the future, following the passage of a law requiring all industrial production to be completely non-toxic, biodegradable and sustainable. In this world, cars and many other things are now made of hemp bio-plastic. This material is not new. It was developed in 1941 by Henry Ford, who made a car body that was one-sixth the weight of steel but had 10 times the impact resistance. Documentary footage of this remarkable achievement is available on the Internet. Future generations will never know what a panel beater actually did, and the insurance industry will be much downsized. Perhaps, in this future world, those responsible for suppressing such valuable green technology will finally be brought to task.

• Paper and textiles

Australia earns about \$400 million a year by selling chips from old growth forests, but we import finished paper products to the value of \$1.4 billion.

In the future world, the use of trees and chlorine in paper-making is now a receding memory.

Modern non-wood paper-making factories operate surrounded by green fields of hemp. The billions of dollars saved on imports are invested into massive reforestation programs, stabilising erosion and facilitating the return of biodiversity. Synthetic fabrics are long gone, replaced by breathable natural textiles of hemp, ramie and bamboo.

• Building and construction

Hempcrete is a building material manufactured from the chipped inner fibre of the hemp stalk. Mixed with lime, ground slag or other additives, it forms a cellulose cement lighter than conventional materials but with improved thermal and acoustic insulation properties. The material is fireproof and completely resistant to termites.

Hempcrete revolutionises home building in the future. It sets like concrete but can be cut like timber. Any

unwanted structure can simply be ground up and thrown into the new mix. A more "organic" style of building can develop, because it is now a straightforward process to rearrange internal walls and make any other changes to a home to suit changing family needs. In some European countries, nearly half of all dwellings are owner built.

Furthermore, hempcrete dramatically reduces the cost of

housing by simplifying construction; for example, a roof cast of hempcrete reinforced with bamboo can replace a tiled roof, fascia and guttering. This roof will have better thermal and acoustic insulation than the tiles, will be resistant to hail and will greatly reduce the risk from bushfire.

In addition to its direct benefits in construction, hempcrete functions very efficiently to sequester carbon dioxide. Bio-sequestration is the process by which plants take up carbon dioxide and water and use the Sun's light to synthesise glucose and then cellulose. If the cellulose is used in long-lasting structures, then the atmospheric carbon dioxide is effectively removed or "sequestered", improving the weather health on Earth. The average Australian family generates about 10 tonnes of carbon dioxide each year. One hectare of hemp can sequester up to 20 tonnes of carbon dioxide annually. The average hempcrete house would sequester about 40 tonnes. When a house is made of hempcrete, it is not only this direct carbon dioxide which is saved.

Using bricks, tiles and other fired ceramics, though, generates a huge amount of carbon dioxide in manufacture. An average brick house generates up to 500 tonnes of carbon dioxide in its total construction,

In addition to its direct benefits in construction, hempcrete functions very efficiently to sequester carbon dioxide.

and the housing industry generates a large proportion of the country's domestic carbon dioxide output. A large-scale change in building methods would facilitate our compliance with targets such as, or preferably exceeding, Kyoto Protocol levels. The doomsayers may claim that compliance with the Protocol would harm the economy, but a large-scale transition to hemp-based paper, textiles and building industries would provide a massive economic stimulus, creating quality employment and export opportunities—unlike the short-sighted consumer-based stimulus strategies currently in use.

Hemp Seed in Health and Medicine

In the areas of health and medicine, the use of hemp could lead to dramatic improvements in society.

Hemp seed is one of the richest sources of ALA (alpha-linolenic acid), the plant-based form of the essential fatty acid omega-3. ALA has an 18-carbon backbone, which is elongated in the body to a 22-carbon chain to form DHA (docosahexaenoic acid) and EPA (eicosapentaenoic acid). In this form, omega-3 is incorporated into the brain, forming a critical part of the neuronal membrane.

Omega-3 from marine sources occurs as DHA and EPA, and taking omega-3 in this form bypasses the need for the conversion. However, ALA has beneficial effects itself, and using marine-derived omega-3 places a severe strain on the aquatic environment. Further, omega-3 is a very reactive molecule, and the harsh industrial conditions used in the extraction and deodorisation of the oil leave it with less than optimal activity, with detectable levels of contaminants including mercury and polychlorinated biphenyls (PCBs) found in many commercial samples.

Fortunately, most individuals can readily convert ALA to DHA and EPA in sufficient quantity for optimal brain development. Luckily, two groups with particular need for DHA and EPA—pregnant women and young children—are particularly efficient at this conversion. The enzymes responsible for the conversion can be impeded by an excess of saturated fats, so for optimal results these must be reduced in the diet.

There are two essential fatty acids: omega-3 and omega-6. They are referred to as "essential" because they cannot be synthesised by the body but must be obtained from food. The ideal ratio for optimal health between the intake of omega-3 and omega-6 is one part

omega-3 for each three parts of omega-6 (1:3). The industrialisation of the western diet and the consumption of mass-marketed canola and other inferior oils—which have little omega-3 content in any case—have had the critical effect of seriously reducing the omega-3 intake whilst at the same time dramatically increasing the omega-6 intake.

The body maintains homeostasis by a dynamic balance between opposing forces; for example, the musculoskeletal system balances opposing flexion and extension muscles to maintain posture. Biochemically, the body maintains its interior homeostasis by delicately balancing pro-inflammatory and anti-

inflammatory effects. The body must be able to mount an effective inflammatory response to repel microbial invaders and as an adjunct in wound healing, but it must then be able to down-regulate this inflammation to prevent unwanted collateral damage to adjacent tissue.

In general terms, the omega-6 fatty acids and their derivatives are pro-inflammatory, whilst the omega-3s produce mediators which down-regulate the inflammatory response. With a predominance of omega-6 and a deficiency of omega-3, the body is in a permanent state of excess inflammation.

The release of inflammatory cytokines initiates the process of tissue damage which, if the process continues long enough, manifests as illness such as vascular disease, loss of vision and dementia. When the synovial joints are affected, osteoarthritis results, causing much pain and suffering for a large proportion of the

There are two essential fatty acids: omega-3 and omega-6. They are referred to as "essential" because they cannot be synthesised by the body but must be obtained from food.

population.

Like knights in shining armour, the pharmaceutical corporations offered their response: the non-steroidal anti-inflammatory drugs (NSAIDs). These chemicals are based on aspirin but have been modified to exhibit a more rapid effect, better analgesic properties or some other characteristic to give their product a marketable edge over the competition. NSAIDs have generated an industry with multibillion-dollar sales annually, despite the fact that they are responsible for the deaths of hundreds of thousands of people globally. As a spin-off advantage for the corporations, the most frequent side effect of the NSAIDs is gastric irritation, often leading to ulceration. To the NSAIDs billions were added the billions of dollars from the sales of antacids like Zantac® and more recently the proton pump inhibitors.

All this expensive medicine and the progression of the disease is barely slowed, with the hapless patient then requiring complex surgery to manage the damaged joint. Is any of this really necessary?

People who strive to maintain a reasonable omega-3 to omega-6 balance and also keep their bodies free of oxidative stress by regular intake of natural plant-based antioxidants are generally not troubled by osteoarthritis or other degenerative diseases. Also, they are rarely troubled by blood pressure problems and they have no need for antidepressants—two major money-spinning drug groups for the global pharmaceutical companies.

The modern pharmaceutical industry appears to be bent on a course to medicalise the population for conditions which are often caused in the first place by their subsidiary companies in the food industry.

Over the last century, cane sugar has gone from being a rare luxury food to a massively overconsumed health risk. Added in large quantities to soft drinks and most processed foods, in the sedentary body it causes wild swings in blood sugar with mood disturbances and widespread oxidative stress as the excess glucose attaches to haemoglobin and tissue or is transported to adipose stores where it adds to a swelling girth.

The type II diabetes epidemic continues unabated, while key culprits like McDonald's use PR gurus to re-invent itself as a health food restaurant whilst still peddling the same toxic mass of saturated and *trans*- fats and sugar that they call food. The derangement of the diet leads to disturbances in blood chemistry, especially the lipid profile, with increases in low-density lipoproteins and total cholesterol.

Based on pathological studies showing cholesterol in artery-narrowing atheroma, the medical and pharmaceutical establishment devised the cholesterol theory of heart disease, claiming that high levels of serum cholesterol impregnates itself into the arterial wall, thereby causing disease. With cholesterol as the number-one bogeyman, the pharmaceutical industry then presented the frightened public with magic bullets—the statin drugs—certain to cure all their problems. These drugs cause serious side effects but, despite this, the statins have grown into a multibillion-dollar industry. Yet there are many weaknesses in the cholesterol theory, and the observed facts are better

described by considering oxidative stress as the key initiating event in atheroma formation.

Oxidative stress results from the action of oxygen free radicals. Free radicals are unstable molecules with unbalanced electron clouds that can damage any tissue with which they come into contact. These free radicals are an inevitable result of biochemical respiration. However, oxidative stress is dramatically increased by exposure to toxic chemicals, additives, volatile fumes and electromagnetic radiation.

Like sparks flying from a campfire, free radicals can cause damage to the tissues in which they occur if they are not quenched. In its well state, the body is equipped with an impressive endogenous antioxidant system, and exogenous antioxidants are found abundantly in tree- and vine-ripened fruits and berries as well as vegetables.

According to the oxidative stress theory, disease results from an inflammatory reaction occurring around sites of oxidative injury. When atheromatous plaques are subjected to careful biochemical analysis, it is found that the cholesterol in the plaques, ingested by immune cells known as foamy macrophages, is actually rancid. Rancidity is the state of an oil that has been subjected to oxidative stress from excess light, heat or chemical exposure, in the absence of sufficient protective antioxidants. It is the rancidity of the oil that initiates the inflammatory reaction to cause the plaque, not the cholesterol itself. The proper treatment should be to address the oxidation, not to manipulate the level of cholesterol artificially.

Additionally, oxidative stress on the membrane of the platelets renders them overly "sticky", setting the stage for a vascular event, whether a myocardial infarction, a cerebrovascular accident or ischaemia of a limb. Whilst certain genetic characteristics of an individual or a group may render them susceptible to oxidative stress in a particular site or tissue, the underlying pathology remains oxidative stress.

Without wholesale dietary and lifestyle changes, the health of the population will continue to deteriorate. People will fall victim to a range of chronic degenerative illnesses until society is unable to afford the health care costs involved. The current unbalanced, devitalised, demineralised and generally deficient national diet has led to preventable conditions imposing a serious social and economic cost on the community.

It is the rancidity of the oil that initiates the inflammatory reaction to cause the plaque, not the cholesterol itself. The proper treatment should be to address the oxidation, not to manipulate the level of cholesterol artificially.

It is estimated that up to 90 per cent of Australian schoolchildren are not getting optimal quantities of omega-3, and this can be expected to impact on brain development and intellectual functioning.

An ideal intake of omega-3 is also required for the optimal functioning of the immune system. Deficiencies can manifest as allergies, autoimmune diseases and other expressions of immune dysfunction.

Hemp seed offers a unique combination of important nutrients, including a balanced ratio of omega-3 and omega-6 and an impressive array of vitamins and minerals.

Hemp seed has a particularly high level of vitamin E, which is a potent antioxidant protecting the omega-3 from rancidity. Vitamin E, so often deficient in a diet of processed foods, is critical for vascular health by maintaining the pliability of the blood vessel walls. The protein in hemp is balanced and easily absorbed.

The Politics of Hemp Foods

Australia is the only country on Earth which still has restrictions on advertising the food uses of hemp seed. It is permissible to use the product topically but not as food—such as hemp seed butter, ice cream and health bars. (This is a similar situation as with raw milk, where overzealous regulators have restricted a product based on poor science, economic self-interest and political bias.)

Hemp seed is currently not licensed as a human food in Australia. In 2002, an application was made to include hemp foods, but it was rejected after political intervention by the previous conservative government. In 2009, Food Standards Australia New Zealand accepted an application to have the code modified; the decision on this application is pending.

However, in our future world, things are running more smoothly. The legislation requiring all products to be completely non-toxic has seen the end of the junk food industry. After only a few years of eating a wide range of hemp seed-based foods and adopting other health-promoting practices, the benefits are being seen in the population.

With the reversal of the diabetes epidemic, there are huge savings in health care. The surplus is spent on expanding the cycle networks around the cities and other public health amenities. Maternal and perinatal health improves, and there is a reduction in the currently alarmingly high level of asthma in children.

Optimised nutrition brings many advantages. Like a fire that is brightly stoked instead of smouldering and smoky, the metabolism becomes more efficient at

converting food to energy. The mental and physical vigour of the population increases and we are ushered into a renaissance of learning and creativity. Released from the shackles of junk food toxicity, the human mind is free to explore new ways of interacting and dealing with formerly intractable problems and we are ushered into a new era of peace and prosperity.

But how likely is it that we will ever see the passage of legislation aimed at ensuring the health and prosperity of the Earth and all the people on it? The economic and political systems at the present time appear to be controlled by a cabal of crooks with the moral integrity of reptiles. In a world crying out for satisfaction of the basic needs of food, clean water and shelter, over 70 per cent of the world's scientists are employed by the military.

The financial stresses imposed by the current economic situation make it a full-time occupation for most people just to feed, clothe, shelter and educate

their families. Having the time and energy to engage constructively in the political process is a luxury few can afford and, with the media's focus on one irrelevant issue after another, it has become the 21st-century version of bread and circuses.

The interpretation that all plants and animals have been created for the use of humans has reinforced the message of separateness and paved the way

for the ruthless exploitation of the natural world that is now a looming threat for the entire biosphere. The industrial use of hemp and other fibre plants on a massive scale can cure many of the global environmental ills while generating significant economic benefits.

The use of hemp foods can heal and revitalise the population. But can the juggernaut of avaricious capitalism, with its indoctrination to mindless consumerism, be overcome in time to save what precious remnants we have of the natural world before they are obliterated?

What is required is a complete revolution. No adjustments, amendments or other tinkering made to the current economic system can begin to approach a solution. A revolution in humanity's relationship with the natural world needs to be the starting point for this process. Then we may have a chance to pass that critical piece of legislation that prohibits products that are not completely safe and non-toxic, rather than continuing with the current situation of prohibiting the solution. ∞

The industrial use of hemp and other fibre plants on a massive scale can cure many of the global environmental ills while generating significant economic benefits.

HOMEOPATHY: EUROPE'S LEADING ALTERNATIVE MEDICINE

The use of homeopathy has been on the rise for decades across Europe, which suggests that the modality is increasingly being regarded as an effective alternative health treatment.

The Growing Threat to Conventional Medicine

Numerous surveys over the past 150-plus years have confirmed that people who seek homeopathic treatment tend to be considerably more educated than those who don't.¹ What is not as well known is the fact that homeopathic medicine is the leading "alternative" treatment used by European physicians as well as by growing numbers of the citizenry.

And despite homeopathy's impressive popularity in Europe, it is actually even more popular in India where over 100 million people depend solely (!) on this form of medical care.² Further, according to an ACNielsen survey in India, 62% of current homeopathy users have never tried conventional medicines and 82% of homeopathy users would not switch to conventional treatments.³

Sceptics of homeopathy, who insist that homeopathic medicines do not work, obviously cannot explain how so many people use and rely upon this system of medicine to treat themselves for so many acute and chronic diseases...and why a very large number of these people do not have to use anything else. The fact that these sceptics assert that homeopathic medicines are "placebos" is simply more indicative of their hyper-denialism of reality, and yet these sceptics maintain great arrogance and ignorance about homeopathy.

The entire field of "complementary and alternative medicine" (CAM) was so hot in Europe in the 1980s that, according to a respected market survey, it was second only to the computer industry for growth during this decade.⁴ This explosion of interest in natural medicine has continued in the 21st century.

In 1998, homeopathy (also spelled "homoeopathy") was the most frequently used CAM therapy in five out of 14 surveyed countries in Europe and among the three most frequently used CAM therapies in 11 out of 14 surveyed countries.⁵ Three out of four Europeans know about homeopathy and, of these people, 29% use it for their own health care. In other words, approximately 100 million Europeans use homeopathic medicines.⁶

The sales of homeopathic and anthroposophical medicines grew by 60% between 1995 and 2005, from 590 euros in 1995 to 775 euros in 2001 and to 930 euros in 2005.⁷ Because of homeopathy's impressive and growing popularity in Europe, this alternative treatment poses a significant threat to conventional medicine, which may explain why there are ongoing efforts to attack it (and homeopaths) using devious and questionably ethical means.

France

Homeopathy is particularly popular in France, where it is the leading alternative therapy. In 1982, 16% of the population used homeopathic medicine, rising to 29% in 1987 and to 36% in 1992.⁸ In 2004, 62% of French

mothers used homeopathic medicines in the previous 12 months.⁹ A survey of French pharmacists was conducted in 2004 and found that an astounding 94.5% reported advising pregnant women to use homeopathic medicines.¹⁰

A survey in November 2007 was carried out by a leading French insurance company in collaboration with a French market research business.¹¹ They found that the largest group of users of natural medicine in France tend to be people belonging to the socio-professional categories (50%), more so than employees (41%), pensioners (37%) and workmen (31%). More than one out of two (55%) consider natural medicines effective in conjunction with the treatment of diseases such as cancer, Parkinson's and Alzheimer's. One of the most surprising discoveries of the above survey is that it also found that 82% of the users of homeopathic and natural medicines think that their use of these treatments contributes to the economic savings of the health system in France. And more surprisingly, 60% of non-users were similarly convinced of these benefits from the use of natural medicines.

Homeopathy is popular not only among the French public but also among the French medical community. As many as 70% of physicians are receptive to homeopathy and consider it effective, and at least 25,000 physicians prescribe homeopathic medicines for their patients. Homeopathy is taught in at least seven medical schools—Besançon, Bordeaux, Lille, Limoges, Marseille, Paris Nord and Poitiers—and there are numerous postgraduate training programs. Courses in homeopathy are taught in 21 of France's 24 schools of pharmacy, and also in two dental schools, two veterinary medical schools and three schools of midwifery.

United Kingdom

Members of Britain's Royal Family have been among homeopathy's strongest advocates, thereby confirming that this system of natural medicine is not some "new age" therapy. In the UK, there are five homeopathic hospitals working within the National Health Service, some of them with a two-year waiting list for non-emergency visits to a homeopath.

According to the 2000 report of the House of Lords Select Committee on Science and Technology, 17% of the British population use homeopathic medicines.¹² The respect accorded homeopathy and homeopathic practice by British physicians is evidenced by a 1986 survey in the *British Medical Journal* which showed that 42% of physicians referred patients to homeopathic

doctors. Other evidence of support from health professionals is a 1990 survey of British pharmacists which found that 55% considered homeopathic medicines "useful" while only 14% considered them "useless".¹⁴ The normally conservative Association of the British Pharmaceutical Industry held a debate in 1992 to decide whether pharmacists should promote homeopathic medicines. The conclusion by a large majority was that they should.¹⁵

The field of complementary medicine gained much support in the 1990s. In 1993, the British Medical Association published a book entitled *Complementary Medicine: New Approaches to Good Practice*.¹⁶ In 1994, Britain's then Minister of State for Health Services, Dr Brian Mawhinney, stated: "Complementary medicine has generally proved popular with patients, and a recent survey found that 81 per cent of patients are satisfied with the treatment they received." Another health

minister stated that 80% of general practitioners want training in complementary therapies; 75% now refer patients to complementary therapists.¹⁷

Despite the use and acceptance of homeopathy throughout the UK, there is a very active group of sceptics, with unknown sources of funding, who work incessantly to attack this system of natural medicine. Even though there is

a wide variety of serious and significant pressing issues in British medicine and science today, in October 2009 an active group of homeopathy sceptics successfully resurrected a governmental committee, the House of Commons Science and Technology Committee, with the intention of having a report issued on homeopathy.

A leading sceptics organisation, Sense About Science, which was pushing for the re-creation of this committee, is led by a former public relations professional who worked for a PR company that represents many Big Pharma companies. Of additional interest is the fact that other directors of Sense About Science are a mixture of former or present libertarians, Marxists and Trotskyists (ironically, libertarians normally advocate a "live and let live" philosophy, but in this instance it seems that they prefer to take choice in medical treatment away from British consumers). Sense About Science is a registered UK charity, despite being a political pressure group. As such, it has to divulge its sources of income, which it does on its website. Not surprisingly, much of this income comes from named pharmaceutical manufacturers.

One of the investigators for the Science and Technology Committee was the now former Liberal Democrat MP (Member of Parliament) Dr Evan Harris.

Homeopathy is popular not only among the French public but also among the French medical community.

(At the UK general election in May, Harris lost his seat to a 20-something-year-old challenger who had no previous elected position.) He is involved with Sense About Science, and he was also one of the sceptic demonstrators against the national pharmacy chain Boots, which sells homeopathic medicines. This advocacy role does not make him an unprejudiced observer, as is required for this type of investigation.

On 22 February, this kangaroo court issued a report recommending that the National Health Service stop funding for homeopathy and homeopathic doctors, despite the support for homeopathy and for consumer choice from Mike O'Brien, the then Minister of State for Health Services. This report is only of an advisory nature, and because the Minister had already expressed his support for the consumers' right to choose their own health care, it seemed unlikely that the British government would change its policies...and *that* is precisely what happened. In July, Anne Milton, the new health minister, welcomed the MPs' report but asserted that homeopathy has a long and established tradition in their country and should remain a choice for British doctors and patients. (To see the report, go to tinyurl.com/yg6o97m.)

What is most surprising about this initial report is that it verified that when people repeat a lie frequently enough, such as "there is no research on homeopathy", many people actually believe it despite its transparent falsity.

Any rational person should and must be very suspicious of this "report". The MPs who were part of the Science and Technology Committee which voted for this anti-homeopathy report comprised 14 members and, believe it or not, only four members voted, with a majority of three voting for the report. Of the three votes, two members did not attend *any* of the investigational meetings and one of them was such a new member of the committee that he hadn't even been a member during the hearings; the remaining "yes" vote was from Evan Harris, a medical doctor and devout antagonist of homeopathy. This report was not exactly a vote *of* and *for* the people.

In Scotland, 12% of general practitioners use homeopathic medicines and 49% of all general practitioner practices (at least one medical doctor in a group practice) prescribe them.¹⁸

The use of homeopathic medicines is not simply popular in the treatment of humans but also animals. Although there is little data presently available on this

subject, one survey discovered that 20% of Irish milk producers have tried homeopathic medicines to treat mastitis or cows with high white-cell counts, and 43% believe that they work. In the herds surveyed, 50% of producers added homeopathic medicines to the cows' drinking water, 27% administered medicines via injection, 6% gave oral doses, and 6% placed the medicines in the cows' vagina.¹⁹

A survey in Ireland was conducted at 13 paediatric settings over a four-month period.²⁰ The researchers found that 57% of parents reported using CAM for their child. Use was significantly higher in the 2–4 years age group (34/105, 32%, $p=0.005$). The most common medicinal CAMs used were vitamins (88%), fish oils (27%) and echinacea (26%). The most common non-medicinal CAMs used were homeopathy (16%) and craniosacral therapy (14%). Only 13% of parents had informed their paediatrician of their child's CAM use.

Germany

The German people are so supportive of natural medicine that the German government has mandated that all medical school curricula include information about natural medicines. Approximately 10% of German doctors specialise in homeopathy, with approximately 10% more prescribing homeopathic remedies on occasion. In 1993, there were 1,993 medical doctors who had formally qualified in homeopathy; by 2006, this number had jumped over 100% to 6,073. In 1993, there were 9,000 natural health practitioners (called *heilpraktikers*); by 2007 this had increased to over 20,000. Approximately 20–30% of *heilpraktikers* specialise in homeopathy.²¹

In November and December 2005, as part of a national healthcare survey, a cross-sectional survey was conducted of a large random sample of 516 German outpatient care physicians with qualifications in 13 medical fields, representative of a basic population of 118,085 statutory health insurance physicians. According to this survey, 51% were in favour of CAM use (26% were very much in favour, 25% were in favour). This survey found that 38% of the medical doctors prescribed homeopathic medicines.²²

A survey of obstetrics departments at hospitals in the state of North Rhine-Westphalia found that acupuncture and homeopathic medicine were the two most commonly used CAM practices. A total of 187 obstetrics departments were identified, and 138 (73.4%) responded

to a questionnaire. Almost 96% of the obstetrics departments offered homeopathic medicines for obstetric care, including 7.2% exclusively for prophylaxis and 4.8% for birth complications.²³

The 2003–2006 German Health Interview and Examination Survey for Children and Adolescents (KiGGS) found a higher than expected use of homeopathic medicine amongst German children. The survey found that paediatric homeopathy is quite popular in Germany, particularly amongst children from families with a higher socio-economic status. Nearly half of the homeopathic preparations were obtained by prescriptions from medical doctors or *heilpraktikers* (non-medical practitioners) and used most often to treat certain self-limiting conditions. About 60% of homeopathy users concomitantly received conventional medicines. Homeopathy use was closely related to socio-economic factors, with a significantly higher prevalence rate found in the 0–6-year age group (prevalence 6.2%, odds ratio 2.2, 95% confidence intervals [CI] 1.7–2.9), among children residing in the former West Germany (5.1%, 2.2, 1.5–3.2) or the south of Germany [6.6%, 1.7, 1.3–2.4), among children with a poor health status (6.8%, 3.0, 2.2–4.2), with no immigration background (5.3%, 3.7, 2.2–6.1), who received breastfeeding for more than six months (7.6%, 2.1, 1.6–2.9), were from upper social-class families (7.4%, 1.8, 1.1–2.8), and whose mothers were university educated (7.2%, 1.6, 1.2–2.2).²⁴

In 2002, the *British Medical Journal* (BMJ) reported that 75% of Germans have used complementary or natural medicine. It also reported that, by 1994, 5,700 doctors had received specialised training in natural medicine, with this number doubling to 10,800 by 2000. Homeopathic medicine was practised by 4,500 medical doctors in Germany as at 2002, almost twice as many as in 1994. According to the report, the German government, which conducted this survey, discovered that there was a 33% reduction in sick days if people used natural therapies, especially homeopathy or acupuncture. It was also reported that women used natural therapies more than men did, but when men used them they benefited more than women did.²⁵

In 2009, a survey of Germans who used homeopathy or acupuncture was published. This survey found that 7% of the population used homeopathy and 10% used acupuncture. Of individuals who had a high education level, 68% used homeopathy as compared with 53% who

used acupuncture.²⁶ A survey of patients in Germany with chronic lymphocytic leukaemia found that 44% had used alternative treatments. No correlation was seen with educational level, gender, or previous or current chemotherapy. The most common alternative or complementary treatment modality was vitamin supplementation (26%), followed by mineral (18%), homeopathic (14%) and mistletoe (9.2%) therapy.²⁷

A 2008 survey of German children with cancer found that 35% of the responders had used CAM. The most frequently used methods were homeopathy, dietary supplements and anthroposophical medicine including mistletoe therapy. Factors which increased the probability of using CAM were the previous use of CAM, higher social status and poor prognosis of a child's disease. An impressively high percentage (89%) of parents of these patients reported that they would recommend CAM to other parents.²⁸

The use of homeopathy and CAM in Germany by people with other chronic diseases is also high, as was observed in a survey of Germans with multiple sclerosis. A 53-item survey was mailed to members of the Baden-Württemberg chapter of the German Multiple Sclerosis Society. Surveys of 1,573 patients (48.5 ± 11.7 years, 74% women, duration of illness 18.1 ± 10.5 years) were analysed. In comparison with conventional medicine, more patients displayed a positive attitude towards complementary and alternative medicine (44% vs 38%, $p < 0.05$), with 70% reporting lifetime use of at least one method. Among a wide variety of complementary and alternative medicine options, diet modification (41%), omega-3 fatty acids (37%), vitamins E (28%), B (36%) and C (28%), homeopathy (26%) and selenium (24%) were cited most frequently. Most respondents (69%) were satisfied with the effects of complementary and alternative medicine.

Use of CAM was associated with religiosity, functional independence, female sex, white-collar job and higher education ($p < 0.05$). Compared with conventional therapies, complementary and alternative medicine rarely showed unwanted side effects (9% vs 59%, $p < 0.00001$). Sales of homeopathic medicines in Germany were approximately US\$428 million in 1991, growing at a rate of about 10% per year. Evidence of the significant support from the German medical community is the fact that 85% of these sales are prescriptions from physicians. Surveys indicate that 98% of pharmacies sell homeopathic medicines.²⁹

In comparison with conventional medicine, more patients displayed a positive attitude towards complementary and alternative medicine..., with 70% reporting lifetime use of at least one method.

Switzerland

A Swiss government-sponsored survey evaluated patient satisfaction and side effects in primary care and also compared homeopathic treatment and conventional medical treatment.

A total of 3,126 adult patients responded to a questionnaire, 1,363 of whom received conventional medical treatment and 1,702 of whom received homeopathic treatment.

This survey found that a higher percentage of the homeopaths patients had chronic and severe conditions than did the conventional medical patients, that homeopaths patients were more often "completely satisfied" with their treatment (53% vs 43%), that homeopathic patients experienced significantly fewer side effects (7.3% vs 16.1%), and that the proportion of patients reporting complete resolution of symptoms was non-significantly higher in the conventional medical patients (28% vs 21%).

What is particularly important about this survey is the observation that homeopathic patients had a higher percentage of seriously ill patients, but they expressed a much higher amount of satisfaction with their treatment than the patients who received conventional medical treatment.

This survey also confirmed a common observation about people who seek homeopathic treatment: that they are much more educated than those who don't (32.4% vs 24.7% received "higher education").³⁰

The Swiss Federal Office of Public Health issued a report to the government of Switzerland which concluded that "the effectiveness of homeopathy can be supported by clinical evidence, and professional and adequate application [can] be regarded as safe".³¹

In Switzerland, different surveys have suggested that somewhere between 11% and 27% of general practitioners and internists prescribe homeopathic medicines.

Other European countries in which homeopathy has a relatively strong presence include Italy, where 9% of medical doctors sometimes prescribe homeopathic remedies; and The Netherlands, where 45% of physicians consider homeopathic medicines effective and 47% of medical doctors use one or more complementary therapies, with homeopathy being the most popular (40% among these select doctors).³²

The prevalence of CAM use in a sample of Swiss patients undergoing kidney transplant was 11.8%. The most frequently used alternative therapy among these was homeopathy (42.9%).³³

Italy

According to a 2004 survey, 7.5 million Italians use homeopathic medicines—2.5 million more than in a 2000 survey. Approximately 14% of Italian women and 10% of men prefer homeopathic medicine to conventional medicine, and 9.6% of children between three and five years of age are treated with homeopathic medicines. Almost 90% of Italians who have used such medicines say that these treatments helped them, with 30% saying that they used homeopathic medicines for pain syndromes and 24% for severe or chronic diseases.³⁴

A 2005 survey on the use of CAM among cancer patients in Europe reported that 73% of the Italian cancer patients had used CAM, a number well above the European average of 36%. The most popular treatment modalities used by cancer patients in Italy were high use of homeopathy, herbal medicine and spiritual therapies.³⁵ A 2008 survey in Tuscany, Italy, found that

the incidence of CAM use after cancer diagnosis was 17%, with the most widely used forms being herbal medicine (52%), homeopathy (30%) and acupuncture (13%). Use was higher in the urban area and among women, breast cancer patients and persons with a higher education.³⁶

A survey of Italian children with cancer who were being treated at a conventional paediatric oncology unit found

that 12.4% of the children used at least one type of CAM, with homeopathy being the most popular; 83% of the parents reported benefits in their children, including improved immune defences, regression of diplopia and improved blood values.³⁷ This study confirmed the observation of many other surveys which found that users of CAM tended to be more educated than those who did not use CAM.^{38, 39, 40}

Five hundred and fifty-two patients who had inflammatory bowel disease and who were under treatment at an Italian tertiary medical referral centre completed a questionnaire; 156 (28%) reported using complementary and alternative therapies, which mainly involved homeopathy (43.6%) followed by controlled diets or dietary supplements (35.5%), herbs (28.2%), exercise (25.6%) and prayer (14.7%). Improvements in well-being (45.5%) and inflammatory bowel disease symptoms (40.3%) were the most commonly reported benefits. A higher education, a more frequently relapsing disease and dissatisfaction with the doctor's communication correlated with complementary and alternative therapy use. Non-compliance with conventional drugs, disease severity and curiosity regarding novel therapies were predictors of complementary and alternative therapy use.⁴¹

This survey found that a higher percentage of the homeopaths patients had chronic and severe conditions than did the conventional...

Spain

In Spain, homeopathy has become so popular that INE, the country's statistics institute, has added expenditures on homeopathic medicines to its calculations for monthly inflation rates.⁴² Sales of homeopathic medicines in Spain are growing at 10–15% annually, with approximately 15% of the population saying that they have used a homeopathic medicine and 25% that they would be happy to try one.⁴³

Eastern Europe

When the Iron Curtain was up, Hungary, Czechoslovakia and East Germany banned homeopathy, but this medical iron curtain fell with the fall of communism.

Homeopathy holds a unique place in Russia, where it has been widely accepted but is not sanctioned by the state medical bureaucracy.

Thus, homeopathic care is not free and has been a part of the new Russian economy where fees are paid for health services.

Demand for homeopathic care is so great that Russians prefer to pay for homeopathic care than to receive free conventional medical care.

Some sceptics have asserted that homeopathy and natural medicines are becoming increasingly popular in Russia because "real medicine" is either unavailable or too expensive.⁴⁴

However, this assumption has been disproven, because the trend towards homeopathic and natural medicine is particularly popular among those Russians who are more educated and are in higher economic classes.

Journalists and sceptics tend to assume that homeopathic medicines simply do not work, and thus they create fanciful theories about why the use of homeopathy is increasing.

A survey of Russian physicians in three academic hospitals in St Petersburg was published in 2008. This survey found that 100% of the respondents had practised CAM and/or referred patients to at least two CAM therapies. Each physician had practised or referred patients to an average of 12.7 different CAM treatments.

Homeopathic medicine was the eighth most popular, with 58% using or referring for homeopathic treatment, 31% using it on themselves, 29% using it on their own patients, and 38% referring for homeopathic care.⁴⁵

In Hungary, homeopathic literature was banned for 40 years until 1990.

Homeopathy has now been accepted and integrated

into regular medical education and is taught in two medical schools. The Hungarian Homeopathic Medical Association started with 11 members in 1990, grew to 75 after 18 months, and grew further to 302 members in 1994.

After the fall of communism in Czechoslovakia, a homeopathic organisation in the Czech Republic was established in November 1990, and it was immediately accepted and integrated within the larger conventional medical society. Within a year, the Ministry of Health officially recognised homeopathy as a medical speciality.

Closing Thoughts

Based on the above-described impressive popularity of homeopathy among physicians, health professionals and the general public, it may no longer be appropriate to consider homeopathy to be a part of "alternative medicine". Homeopathy should be considered to be an *integral* part of a comprehensive health care system. Further, the fact that several surveys have confirmed that more educated people tend to choose homeopathic care than do less educated people suggests that homeopathy is in fact the "smart" choice in health care. ∞

About the Author:

Dana Ullman, MPH, is America's leading spokesperson for homeopathy and is the founder of Homeopathic Educational Services, a leading resource centre for homeopathic books, medicines, software, courses and research. He is the author of 10 books, including the bestseller *Everybody's Guide to Homeopathic Medicines*. His most recent book is *The Homeopathic Revolution: Why Famous People and Cultural Heroes Choose Homeopathy*. Dana is a regular writer for The Huffington Post website, where comments on his articles average more than 1,000 per article. His archive of articles is at www.Huffingtonpost.com/dana-ullman. Dana Ullman lives, practises and writes in Berkeley, California. He can be contacted by email at mail@homeopathic.com or via his website <http://www.homeopathic.com>.

Special offer exclusive to Nexus Readers. Price includes shipping to anywhere in Australia.

It's Your Body

You only get one body so look after it. The Melbourne Food Depot have been helping health conscious people, practitioners and major healthcare manufacturers since 1998. Our products are sourced, tested and re tested to maintain quality under our various certification systems.

Instructions

Photocopy or tear out this page and select the items you wish to purchase in section one. If you wish to order multiple items of the one thing just write the number required on the line next to the product. Fill in your address and payment method in section two. Be sure to include a daytime contact telephone number just in case we need to call you. Most orders will leave same day except payments made by personal or business cheque.

1. Select Your Items - These specials change each Nexus issue & are only valid for that issue

	Price	# of bags	Cost
Ascorbic Acid Powder USP 2 x 500g containers - Pure vitamin C powder, an excellent antioxidant.	\$110		
Beetroot Powder 1.2kg pail - 9Kg of raw beetroot goes to make 1 kg of powder. Power packed product.	\$68		
Spinach Powder 1kg pail - Chlorophyll, vitamin & iron rich powder.	\$68		
Carrot Powder 1.2kg pail - Rich source of beta carotene, protein, slow release energy and fibre	\$68		
Broccoli Powder 1.5Kg pail - Used in combination with tomato powder for prostate cancer treatment trials	\$88		
Tomato Powder 1.2kg pail - Very high levels of Lycopene can be used in combination with broccoli powder.	\$68		
N-Acetyl L Cysteine Powder 500g - This highly sort after amino acid is very rarely on special.	\$155		
Magnesium Chloride Flakes 5 Kg bag - The best way for your body to obtain magnesium from Japan.	\$125		
Magnesium Foot Bath Salts 5kg bag - Excellent source of magnesium for external applications only.	\$39		
Magnesium Oil 1.4Kg (approx 2lts) Jerry can - Ideal for practitioner dispense.	\$80		
MSM Powder 2 kg bag - Pure Methyl Sulfonyl Methane powder no colours or flavours.	\$160		
Papain Enzyme Powder 200g - Pure papain enzyme 6000IU strength. One of the strongest digestive enzymes.	\$77		
Citrus Bioflavonoids 100g packet - Can be added to your vitamin C powder to make complete C	\$65		
L- Proline Powder 500g - May be helpful for bone, skin and cartilage formation.	\$140		
Rice Protein Powder 2Kg bag - Great source of protein for vegans or dairy intolerant people.	\$85		
Sodium Ascorbate Powder USP 2 x 500g containers - Gentle on the stomach vitamin C powder.	\$110		
Sodium Bicarbonate Powder 5kg bag - Aluminium free great for alkalisng your body and fighting cancer.	\$36		
CoEnzyme Q10 Powder 5g - Naturally fermented, bio-identical to the body's own CoQ10. (5g = 5,000mg).	\$80		

Order quickly as products have previously sold out. These offers only valid for this edition of Nexus Total Amount due (inc shipping): \$

WELCOME TO THE... **PURE DELIGHT HEMP** **FUTURE SEED OIL**

Hemp Seed Oil is more stable and tastes better than flax or fish oil.

It has over 80% Essential Omega's.

Contains GLA as found in evening primrose oil.

Lowers Cholesterol.

Increases fat burning potential of the body (metabolism). Suitable for long term use.

All degenerative diseases including cancer show low EFA's in blood.

100% Vegetarian, cold pressed Pure Delight Hemp Oil.

Perfect ratio of 20% Omega 3 to 60% Omega 6 (1:3).

Contains EFA's necessary for all cell functions, building cells, oxygen uptake and hormonal balance.

A topical application creates beautiful skin.

Easy to absorb.

Contains Chlorophyll.

PURE DELIGHT HEMP uses a super fresh bottling system (light destroys EFA's).

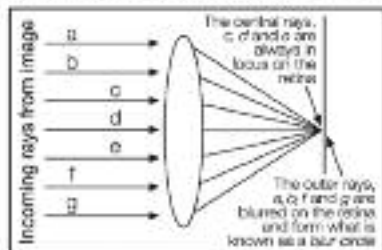

Kept refrigerated under nitrogen.

PURE DELIGHT HEMP - ORGANICALLY GROWN IN AUSTRALIA

See clearly, without strain, using Pinholes No glass, no prescription

Without Pinholes

In a weak eye, light rays entering the eye's lens are not all focussed onto the same place on the retina. For example rays a, b, f and g require more focussing by the lens to hit the same plane as rays c, d and e which are nearer to the centre. Rays c, d and e are usually in focus, regardless of the condition of the eye, and form a clear image on the retina. This clear image is flooded by the blurred image formed by rays a, b, f and g.

Pinholes are suitable for:

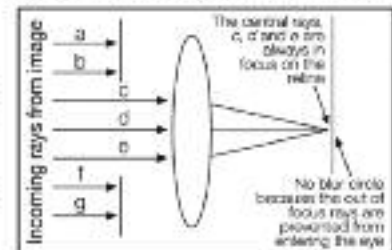

- Short sightedness
- Crossed eyes
- Long sightedness
- Cataracts
- Astigmatism
- Relieving eye strain
- Presbyopia
- Double vision

For best results, please use Pinholes in conjunction with regular eye exercise.

With Pinholes

When the pinhole lens is used, only rays c, d and e are allowed to form an image on the retina and no blurred image is present to block the clear image. Consequently, by using a lens with multiple pinholes, many focussed images form on the retina and a clear, natural image is seen. Also, no effort is required from the eye muscle, as the only rays entering the eye are already in focus.

HEALING WITH ELECTROMEDICINE AND SOUND THERAPIES

Devices utilising lasers and LEDs, far-infrared heat as well as sound can target living cells with the precise frequency needed to restore cellular balance and achieve good health in a remarkably short time.

Monochromatic Visible Light: Laser and LED Therapies

Safe laser therapy has been used by health practitioners all over the world for almost 30 years. Most of the early research and published data, which spanned the late 1970s to the early 1980s, was from Russia. As more medical studies were published, various medical organisations and government agencies around the world (including the National Aeronautics and Space Administration in the USA) also began using this modality.

Lasers and LEDs (light-emitting diodes) can be made to produce any colour wavelength. The emission of the light is due not to glass, paint or pigment; it is solely the wavelength of the light itself that gives the beam its characteristic colour. Since the wavelength is always a single frequency, the colour is known as *monochromatic*. For this discussion, we are interested in lasers and LEDs that utilise, for *phototherapy*, single-wavelength (monochromatic) visible light in the *red* spectrum.

Laser and LED therapies differ in some important ways, but they also share similarities. Both are based on the energetic behaviour of electrons. Normally, electrons occupy a fixed place in one or more orbital rings that sequentially surround the atom's nucleus. When excited, electrons move faster and jump to higher orbits. When they relax and return to their original position, electrons release energy in the form of light (photons). A photon's wavelength—in other words, its colour—is determined by the amount of energy released when the electron drops to a lower orbit. *It is this emitted light that is harnessed in visible-light laser and LED technology.*

Lasers and LEDs are almost always identified by their wavelength rather than their frequency. In the band of visible light, wavelengths are measured in nanometres (nm). One nanometre, the length of one complete wave, is one billionth of a metre and roughly about the size of a human cell.

The lasers and LEDs that emit a red colour have a wavelength ranging from about 630 to 670 nm. Some clinicians prefer a 660-nm wavelength, asserting that this is easiest overall for the tissues to absorb. Others prefer a ruby-red 630- or 635-nm wave. Research published in the *Journal of Clinical Laser Medicine & Surgery* states that a 630-nm wavelength appears to be "most commonly associated with bacterial inhibition", or the retardation of growth and functioning of pathogens.²⁰ "What is good for the body is usually bad for pathogens," says chiropractor and laser therapist Dr Gerry Graham. "The right pH for the body is the wrong pH for pathogens. Similarly, 635 nm is the worst wavelength for most pathogens but is beneficial for human tissue."²¹

All wavelengths of red light work on the principle of *bio-modulation*—turning a cell's function on or off through physiological means. Monochromatic red light stimulates blood circulation, increases lymphatic drainage and promotes cell metabolism by stimulating photoreceptors in the mitochondria within the cell. (Mitochondria are tiny living organelles that control many important cellular processes including energy production.)

Except on the eyes in the case of a laser (explained in a moment), the light can be applied to every part of the body: skin, soft tissue, muscle, bone, brain, organs, lymphatic fluid, glands and blood. Used over an artery, the light can improve the condition of immune cells—leukocytes, T-cells and B-cells within the bloodstream—so that they can more efficiently disable pathogens.

Dr Tiina Karu, of the Institute for Laser and Informatic Technologies in Russia, reportedly discovered that:

*...there are photo-receptors at the molecular-cellular level which, when triggered, activate a number of biological reactions: DNA/RNA synthesis, increased cAMP levels [cyclic adenosine monophosphate, a molecule involved in many biological processes], protein and collagen synthesis, and cellular proliferation. The result is rapid regeneration, normalization and healing of damaged cellular tissue. In essence, light is a trigger for the rearrangement of cellular metabolism.*²²

Single-wavelength light maintains its integrity while radiating. Its ability to travel along the body's meridians without being dispersed into the surrounding tissues makes it useful for Chinese medicine treatments. Only monochromatic light affects the photoreceptors. If different wavelengths are simultaneously applied to the tissue, the cell receives conflicting signals and cannot respond properly.

• LazrPulsr™ 4X LLLT Laser

Laser is an acronym for Light Amplification by Stimulated Emission of Radiation. To produce light, a laser diode can contain argon, helium, neon or krypton.

The monochromatic light emitted by the lasers under discussion is *coherent*. This means, from a physics standpoint, that all the peaks and valleys of the waves line up. The waves are high at the same time, and low at the same time (figure 6). In practical terms, this means that the light is directional and focused—or *collimated*—instead of scattered. This optical arrangement provides the intensity and precision of the beam.

Most people are familiar with the high-intensity, high-power "hard" lasers that are used by industry (to cut

Figure 6: Coherent waves (in phase with each other), an alignment found in lasers.

through steel and other metals) and by doctors during surgery (to make clean cuts into the body, cauterise wounds and remove unwanted tissue). These high-intensity lasers are legally restricted devices because of the damage they can cause.

Genuine low-intensity, low-power lasers—also called "soft" or "cold" lasers—emit far less power than their restricted high-intensity counterparts. Their use in healing is also known as *low-intensity laser therapy* (LILT) or *low-level laser therapy* (LLLT). The legal standard for what constitutes a low-level laser (LLL) can be confusing, however, because in some countries a device legally classified as LLL has enough power to heat tissue.

Some laser therapists maintain that devices affecting cells through bio-modulation should not be categorised with devices that heat tissue. Australian laser experts

Kerry Tume and Sean Tume suggest the following standard: "[T]he energy output is low enough so that the treated tissue does not rise above...normal body temperature."²³

Dr Graham concurs. "Most people still fall for the idea that if 10 milliwatts [mW] will do a job in 10 minutes, then 100 mW will do the same job in one minute, and 1000 mW will do the same job in one-tenth of a

minute. But this isn't true. The majority of lasers used for meridian therapy use [excessively high-powered, tissue-heating] infrared lasers ... [which] can damage the meridians and over-stimulate tissues."²⁴ Here is an instance where "less can be more".

Dr Graham developed the rechargeable hand-held LazrPulsr™ 4X that emits a 635-nm antimicrobial beam (www.lazrpulsr.com). The LazrPulsr 4X contains 10 channels that can be programmed by the user, in addition to over 40 channels that emit pulses shown to restore different tissues and bodily functions.

Laser therapy works on all manner of conditions, including injuries to ligaments, tendons, nerves and other tissue, skin conditions, bone problems (such as osteoarthritis), first-, second- and third-degree burns, dental problems, infections including herpes, and, of course, chronic pain.

The laser beam can be applied without risk to almost any part of the body (including trigger points and fascia). However, due to the precision of the beam, care must be taken to avoid shining the device directly into the eyes or even on the closed eyelid, because this can cause tissue damage and even blindness. "It would take several seconds of continuous direct exposure, shining directly into the eye, to cause significant permanent damage," Dr Graham points out. "This is virtually impossible for any adult to do accidentally."²⁶

Some laser therapists maintain that devices affecting cells through bio-modulation should not be categorised with devices that heat tissue.

Safety features of the LazrPulsr 4X include a laser cover to protect the user from accidentally shining the unit into the eyes, and a low power density (5.0 mW). There is also a digital lock that ensures against accidental use by children and inexperienced users. The unit is designed so that the user can program and operate it with one hand while maintaining control of the direction of illumination with the other.

Dr Graham's LazrPulsr is available for sale by prescription only. With a little practice and training, it can be employed safely and effectively for healing by practitioners and knowledgeable laypersons.

• Good Energy Products LEDs

The light-emitting diode is sometimes erroneously called a soft laser or laser, but it is not. The monochromatic light emitted by LEDs is *incoherent*. This means, from a physics standpoint, that the waves are emitted at random intervals because the peaks and valleys of the waves do not line up (figure 7). In practical terms, this means that the light is multidirectional and diffuse, *not* directional and focused (collimated).

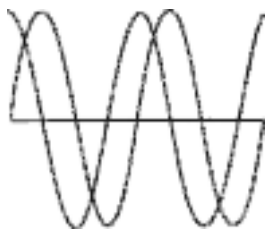

Figure 7: Incoherent waves (out of phase with each other), an alignment found in LEDs.

The lack of beam coherence and precision makes LED therapy safe enough to be used even by children—and difficult to abuse. The advantage of LEDs over lasers is their ability to be used directly on the eyelid to regenerate injured eye tissue. Also, an LED array is much less expensive than a soft laser. It, too, has widespread applications.

"In Israel," report Anna Cocilovo and Ron Rosen, "medical doctors utilize incoherent light transmitted by light emitting diodes (LEDs) in the practice of neurology, dentistry, dermatology, physiotherapy, and in cosmetic applications to promote collagen and elastin formation."²⁷

Until the 1980s, low-level lasers were used almost exclusively for phototherapy, and prior promising research with incoherent light was nearly forgotten. Subsequently, some clinicians determined that coherency did not make a huge difference.

"Dr Karu," write Cocilovo and Rosen, "contends that

coherent light is not necessary, that incoherent light is equally effective at producing clinical results. Furthermore, she found that coherent light is converted to incoherent light in the body. The exact effect depends on the wavelength, dose and intensity."²⁸

There is a question as to whether these conclusions were based on *in vitro* or *in vivo* research: the effects of light can be different in a culture than in a living body. Nevertheless, enough users report benefits with LEDs to warrant its further investigation as a serious therapy. There is one anecdotal report that cannot be contested: this author successfully treated a scratch on the cornea

with an LED after a piece of plastic fell into her eye. After one hour of holding the light onto the closed, tearing eyelid, the pain and tearing were gone, vision was unaffected and no more problems occurred.

Although LEDs are fairly common and easy to obtain, some unique products were developed by naturopath and biological dentist Dr Bill Wolfe (www.drwolfe.com). They use incoherent light, but for a secondary function: they are carriers of frequencies that are imprinted in water. Slightly larger than a fountain pen and smaller than a flashlight, both the Chi Pen® and the Advanced Chi Stimulator® contain water cartridges through which the light shines. When applied to the body, the energy produces different results depending on which frequencies have been programmed into the fluid.

The frequencies in both devices are geared more towards balancing the body than they are

to destroying microbes: most of the energy in the water is from either homoeopathic remedies or frequencies that researchers have established are emitted by healthy tissue. Dr Wolfe has seen major positive changes occur with his clients who use the devices. The 5½-inch [~14-centimetre] Chi Pen operates on two AAA batteries. Embedded in the casing is a vial of water that has been imprinted with the frequencies emitted by healthy organs, glands and bodily tissues. A 625-nm red light, at 900 mW power, passes through the water to the tip of the penlight, carrying regenerative frequencies designed to restore and balance the body's energy meridians. The implications are profound, as blockages in the meridians can cause unlimited symptoms and conditions ranging from inflammation and pain to organ and gland malfunction. This easy-to-use instrument is intended for people to use at home for self-treatment.

The frequencies in both devices are geared more towards balancing the body than they are to destroying microbes: most of the energy in the water is from either homoeopathic remedies or frequencies...

The Advanced Chi Stimulator, which is 10½ inches [~27 cm] long, operates on two AA batteries and contains three light emitters. These lights are in the infrared (IR) spectrum (950 nm at 450 mW power), which promotes deeper penetration into the tissue than does visible light. (When the instrument is turned on, it emits a blue colour, so the user can direct the wave to the targeted area and avoid shining the invisible IR light into the eyes.) Instead of a permanent cartridge in the casing that contains only one program, the Advanced Chi Stimulator is equipped with 11 interchangeable, programmed, water-filled lenses. These discs are screwed onto the tip of the device, allowing the user to select from a range of frequency formulas: Chi Energy, Detox, Infection, Inflammation, Lymphatic, Root Canal, Sinus, Stimulation, Toothache, Trauma and Relaxation.

The LEDs from Dr Wolfe's company, Good Energy Products, stimulate acupuncture and muscle trigger-points and assist with pain management, skin conditions, wound healing and dental problems. To stimulate points, the user places the laser against the skin for about one minute per point. For local pain and swelling, the laser is placed for three minutes on the area with the most intense symptoms, and then for a minute each on spots surrounding the main area. For skin conditions such as acne, burns, insect bites and cold sores, the light is held about ¼ inch [~0.6 cm] above the target area and moved very slowly back and forth for a few minutes, two or three times a day.

For tooth or gum pain, the user places the light against the skin over the most painful region for three minutes. Less painful areas are treated for only a minute each. If the subject experiences pain directly after applying the frequencies, this is a good sign: it signifies a desirable improvement in blood flow and increased waste removal. Relief is usually felt the next day. These instruments can be used on animals as well as humans.

Dr Wolfe has also produced an impressive line of highly effective, frequency-infused dental products and skin creams, including toothpaste, mouthwash and anti-ageing and analgesic preparations. The MSM supplement crystals are infused with neurotransmitter frequencies for mental clarity, to be taken during the day, and frequencies to help with sleep, to be taken before bedtime.

Although the personal care products are made with natural (not synthetic) ingredients, Wolfe considers that the benefits from the botanicals, herbs, essential oils and other materials are secondary compared to their

main purpose: as carriers of frequencies into the body. For those disinclined to use high-tech devices, the skin and dental health products are a wonderful way to administer frequency healing. And those who like devices find that these personal care products augment the effects of whatever else they're using.

Far-Infrared Heat Therapy

Sweat therapy using hot air, steam and hot water is thousands of years old. The ancients understood that when people perspire, they feel better. Sweating is one of the body's chief methods of eliminating waste, whether exogenous (from outside the body) or endogenous (from inside the body).

Poisonous chemicals, heavy metals and metabolic wastes are often encapsulated by the fat cells to protect the bloodstream. These toxins not only exacerbate illness; in many instances, they *cause* illness.

The chemical load we carry was dramatically

illustrated during a Spring 2001 Public Broadcasting System special about the chemical industry's suppression of evidence that their own products cause cancer. When newsman Bill Moyers had his blood drawn and analysed, his sample contained over 80 common industrial chemicals including alcohols, solvents, pesticides, petroleum-based synthetics, polychlorinated biphenyls (PCBs) and persistent

organic pollutants (POPs). It's easy to see why so many people today are ill.

During sweating, the fatty tissue vibrates faster, dumping its toxic load into the interstitial fluid (outside and between the cells). These interstitial wastes—which normally would have to be processed by the lymph system, urinary tract and/or liver—are released through the pores of the skin. This lightens the elimination burden of these other systems, giving them a chance to rest. Sweating also raises the pH of some portions of the body to a more alkaline state, because many chemical and metabolic wastes are acidic.

Although sweat therapy is not identical to having a fever, there are similarities between the two. When infected, the body produces a fever to "cook" microbes, most of which cannot survive in temperatures of over 103°F or 104°F (39.4°C or 40°C). Sauna therapy can also make it too hot for microbes to survive if the core temperature is raised enough. During fever and sauna therapy, the body produces more endorphins (natural pain-killers) as well as more enzymes, which the white blood cells need to destroy pathogens. Body heating alone helps to relax the nerves and tissue fibres.

Modern scientists have discovered that the source of

The MSM supplement crystals are infused with neurotransmitter frequencies for mental clarity...and frequencies to help with sleep...

heat can make a difference between highly effective and less satisfactory detoxification.

Dr John Harvey Kellogg, famous for developing breakfast cereals, is less known for having invented the electric light bath that preceded today's far-infrared (FIR) sauna cabinet. Early in the 20th century, Kellogg measured the toxins in the urine and sweat of healthy volunteers who took Russian baths, Turkish baths and sessions in the doctor's own electric light cabinets. The light bath encouraged the release of more toxins than did the steam. The test subjects also became hotter, faster, because *the heat waves from the light bulbs in Dr Kellogg's sauna were in a particular far-infrared range*. Far-infrared contains among the most beneficial EM frequencies that the body requires for growth, repair and health.

The amount of FIR emitted by a body or object is part of its electromagnetic signature. The movements of atoms, their constituent particles and the chemical bonds between molecules change direction, rotation and orbit depending on their frequency. These changes also correspond to alterations in the electrical and magnetic fields that they emit.

Far-infrared wavelengths range from about 5.6 to 1,000 microns. For healing purposes, we are interested in only a tiny portion of the FIR spectrum that ranges from about 5.6 microns to 9.0 microns in wavelength, radiating heat from, respectively, about 470°F to 120°F (243.3°C to 48.9°C). (The shorter wavelengths are hotter.) A heat source that emits a particular, narrow band of FIR is the most effective for sauna therapy.

Not surprisingly, a wavelength of about 9.35 microns corresponds to a temperature of 98.6°F (37°C).

Water molecules are very efficient absorbers and emitters of far-infrared radiation that's about 9.0 microns in length. This wavelength also causes water clusters to become smaller, more motile and more easily absorbed into the tissues. *Water intrinsically resonates* within these particular wavelengths. Whereas other EM spectrum wavelengths (such as the much longer radio waves) pass through water, a 9.4-micron far-infrared wavelength is absorbed by the water and causes its temperature to rise. People's ability to absorb and emit FIR is related to the water's ability to absorb and emit FIR. The human body is comprised of nearly 70 per cent water, which explains why people respond so positively to FIR.

For the vast majority of people, FIR is the most

effective means of inducing a sweat. There are many FIR saunas on the market today. One sauna cabinet manufacturer, Saunex™, uses heaters that selectively emit only the most beneficial FIR wavelengths, and it also has almost completely eliminated the harmful EM field that normally accompanies electrical wiring (www.saunex.com).

Sound Therapies

During the educational seminars I give on Rife therapy and electromedicine, people often ask me if tones can be substituted therapeutically for various EM frequencies. The answer is: "Yes, under certain conditions."

Sound is commonly defined as existing only if there is a medium (such as air or water) to carry the vibrations, as sound cannot be heard in a vacuum. *But all frequencies in the electromagnetic spectrum—whether in the form of visible light, radio waves, gamma waves, etc.—have a corresponding sound or tone, even if it does not transmit through air or water and even if we are not capable of hearing it.* (This is probably the origin of the phrase, "the music of the spheres".) Since sound and EM radiation are mathematically related, theoretically all electromagnetic waves can be translated into audible sound, and the two modalities might be interchangeable for healing purposes.

• VoiceBio™

We already know that every organ, gland and tissue in the body emits EM radiation, and that this radiation corresponds to tones. A unique use of this principle via sound, called VoiceBio™, was first developed in 1995 by naturopath Dr Kae Thompson-Liu (www.voicebio.com). VoiceBio is a non-invasive way of analysing the function of organs, glands and various body systems, based on the tones (EM radiation) they emit. If we could hear the symphony expressed by a living body, we would hear the liver vibrating to the note of G, the heart vibrating to the note of A#, and so on. Thompson-Liu discovered that the body's frequencies are reflected in the voice, no matter which octave the person uses when speaking or singing.

In an ideal world, each of the 12 notes of a scale would be represented on a graph of the voice (called a voiceprint). But due to poor diet, trauma, injury, infection, chemical poisoning, faulty genetics or a combination of these conditions, most voiceprints show

This wavelength also causes water clusters to become smaller, more motile and more easily absorbed into the tissues. Water intrinsically resonates within these particular wavelengths.

unequally represented notes that have huge variations beyond the normal, expected, uneven "bell curve". The notes can all be present (thus falling within the range of good health) or be overemphasised, weak or missing entirely from the voice (thus falling within the range of compromised health). Assessing the heavy, normal and weak areas of a voiceprint can help pinpoint which body parts or systems are off-balance.

For the VoiceBio assessment, the client records a voice sample into a sensitive microphone connected to a small Walkman®-sized piece of proprietary equipment called VIBE (an acronym for Visual Image of Body Energy). Then VIBE sorts, translates and graphs the tones (ignoring word content) onto a voiceprint that quantifies the frequencies. The graph is displayed on a computer screen connected to the VIBE. Thompson-Liu developed VIBE because she found that the sound cards in computers are unreliable, sometimes varying as much as two tones in accuracy. The actual voice sampling takes five minutes or less.

There are several ways to supply the body with the balancing frequencies. The client can listen, through stereo headphones, to a palm-sized tone box (called a "sonic balancer") encoded with personalised sound formulas. Derived by Thompson-Liu using complex mathematical computations, the sound formulas are different for every person—even those who need the same notes—since they are based on how the client's brain is fundamentally organised.

Although the VoiceBio sound formulas are subjectively experienced by the conscious ear more as white noise than patterned pitches, the effects are like healing music rather than disorganised noise, in part because the notes are in the very low range of human hearing. Most importantly, the tone boxes can be programmed so that the brain learns to produce the weak or missing notes on its own. This brings VoiceBio therapy into the realm of holistic self-regulation rather than allopathic substitution. The client can also listen to the missing notes as either straight musical tones or music in that key. In the case of overemphasised notes, the VoiceBio practitioner suggests detoxification and cleansing of the corresponding organs and systems.

The most powerful of all therapies, however, is for the clients themselves to generate the needed tones by

singing or humming. (This also makes the therapy more cost-effective.)

One might think that a highly depleted or stressed individual cannot muster enough energy to hum, and that the very ill need a "jump-start" from an external source, such as the sonic balancer. However, states Dr Thompson-Liu: "The very ill see the fastest results by even humming the note for just a brief period a day. I have never found a client who could not hum something. Trials conducted in the past year in four states show that having the clients do it themselves is

more effective than the sonic balancers by over 200 percent."²⁹

After a month, the client is re-tested to see what formula is needed or if the client needs to continue at all.

Although results from sound therapy can be felt within days or even hours, the listening or humming continues over a period of weeks and even months, depending on the severity of the condition and the person's ability to respond.

Dr Thompson-Liu's discovery that all notes correspond to specific nutrients and drugs (as well as body parts and systems) brings another level of specificity to VoiceBio. A voiceprint helps the practitioner pinpoint which nutrients are most needed by the client. (The nutrients may have an obvious relationship to the organs or glands whose notes they share, but sometimes they do not. Nevertheless, the system works.) Thus, nutritional support in the form of vitamin, mineral and herbal supplementation is integrated with the VoiceBio therapy. The voiceprint can also show which pharmaceuticals might be useful. If the client is taking a drug whose frequency matches a note that is already too high, continuing to take the drug can further stress the note. However, there may be another drug that produces the same (desired) effect but resonates with a note that's too low (or at least not as high).

There are many nutrients that resonate in any given note (C, C#, D, etc.), because each note has a range of cycles per second. However, the frequency of each nutrient is extremely precise, which is why any transmission device must be accurate to the second decimal point.

Thompson-Liu devoted many years of research (and expensive laboratory testing) to finding the frequencies

...the notes are in the very low range of human hearing. Most importantly, the tone boxes can be programmed so that the brain learns to produce the weak or missing notes on its own.

of nutrients (vitamins, minerals, amino acids, fatty acids, etc.) as well as toxins and drugs.

Some sound treatment systems have nutrient frequencies posted on the Internet that are incorrect because they are based on the molecular weight of the elements that comprise the nutrients, rather than on the wavelengths themselves. (Weight measures how heavy something is, and has nothing to do with oscillation or frequency.) Sound protocols obtain the best results with the exact frequencies.

Healing with sound will become imperative if global government restrictions on supplements become more severe. People could assimilate the frequencies of their chosen supplements via headphones or even sound recordings. Since this user-friendly modality does not make medical claims, it can be implemented by laypeople as well as health practitioners.

Summary

The body emits EM and responds to EM waves. All biological functions correspond to electromagnetic phenomena. The electromagnetic energies that exist in living tissue are extremely potent. When you target a living cell with the precise frequency that it needs, it will

respond favourably and health can be restored in an amazingly short period of time.

Electromedicine covers a vast territory of different energies. The therapies reviewed here—EM radiation, electrical current, pulsed magnetic fields, visible red light and FIR (perceived as heat)—are only a few. Other frequency therapies include radiowaves and microwaves on the benign portion of the EM spectrum, and bands of visible light besides red.

Conventional physics does not regard sound as part of the EM spectrum *per se*. However, every frequency in the EM spectrum has a corresponding sound, even if we cannot hear it. Thus, audible sound has an intricate relationship to EM frequencies and can also be utilised for healing.

The health restoration effects of correctly applied energetics cannot be underestimated.

As with any modality, one must be careful when using frequencies, be they disseminated by electromedical equipment or sound. However, the correct energies, properly used, can be an integral part of one's wellness protocol.

Electromedicine and sound are the healing of the future. Whether you are a health care professional or a seeker of health, these therapies are well worth exploring. ∞

Conventional physics does not regard sound as part of the EM spectrum *per se*. However, every frequency in the EM spectrum has a corresponding sound, even if we cannot hear it.

About the Author:

Nenah Sylver, PhD, is an internationally published author in the fields of holistic health, electromedicine and psychology. She gives educational seminars on electromedicine and frequency healing, and has been a featured speaker at Rife conferences.

Dr Sylver previously contributed to NEXUS with her article "Poisonous Products, Deceptive Labels" (7/02-03). She is the author of *The Holistic Handbook of Sauna Therapy* (The Center for Frequency, 2004, ISBN 978-0-9672491-7-1, 356pp, softcover book and e-book) and *The Rife Handbook of Frequency Therapy, with a Holistic Health Primer* (Desert Gate Productions LLC, 2009, ISBN 978-0-9818075-0-8, 760pp, hardcover book and e-book; reviewed in NEXUS 17/03; previous edition reviewed in 9/05). Both books can be ordered from Bibliotique/Barner Books, 3 Church Street, New Paltz, New York 12561, USA, telephone +1 (845) 255 2635, web pages www.bibliotique.us/si/sauna.html and www.bibliotique.us/si/rife2009.html.

A variation of this article originally appeared in *Townsend Letter*, February–March 2008 and April–May 2008 (www.townsendletter.com). This latest version is Appendix C of *The Rife Handbook of Frequency Therapy, with a Holistic Health Primer* (appendix available as a free download from <http://www.nenahsylver.com>).

Dr Nenah Sylver can be contacted at The Center for Frequency, PO Box 74324, Phoenix, AZ 85087-4324, USA, tel +1 (623) 249 4202, email nenah@nenahsylver.com, website <http://www.nenahsylver.com>.

Editor's Note:

Due to space constraints, we have omitted coverage of several therapeutic devices from Dr Sylver's article. To see these, including the accompanying endnotes and resources, go to <http://www.nenahsylver.com>.

Are you suffering from all sorts of allergies?

If so, you'll want to check out the amazing
LightAir Ionflow 50, Air Purifier & Ioniser.

Take a closer look at just how efficient it truly is!

- * In just 5 hours it eliminates 99% of all indoor nasty pollutants.
- * In just 3 hours it removes up to 90% of all airborne mould.

7 compelling reasons to choose the LightAir Air Purifier

Compare all these money saving advantages

- Cheaper to run than other similar Air Purifiers, uses only 7 watts of power.
- No ongoing costs for replacement filters or needles, like other similar units.
- No noisy fan that will eventually fail.
- Cleans up to 65 sq meters.
- Best 2 year Warranty in Australia.
- Guaranteed **not to produce ozone**.
- Winner of several EU DESIGN AWARDS.

Proven and independently tested to remove all these allergens:

airborne bacteria • dust mites • pet dander • viruses • pollen allergens • airborne mould • smoke odours

SOME BIG LIES OF MONEY, MEDICINE AND SCIENCE

A tenured Canadian physics professor, fired for his dissidence, breaks ranks by asserting that established orthodoxy in economics, medicine and science is intended as a web of lies to shield and maintain power structures.

by Denis G. Rancourt, PhD
© June 2010

Blogsite:
<http://activistteacher.blogspot.com/>

[T]he majority of politicians, on the evidence available to us, are interested not in truth but in power and in the maintenance of that power. To maintain that power it is essential that people remain in ignorance, that they live in ignorance of the truth, even the truth of their own lives. What surrounds us therefore is a vast tapestry of lies, upon which we feed.

— Harold Pinter, Nobel Lecture (Literature), 2005

The maintenance of the hierarchical structures that control our lives depends on Pinter's "vast tapestry of lies, upon which we feed". Therefore, the main institutions that embed us into the hierarchy, such as schools, universities and mass media and entertainment corporations, have a primary function to create and maintain this tapestry. They include establishment scientists and all service intellectuals in charge of "interpreting" reality.

In fact, the scientists and "experts" define reality in order to bring it into conformity with the always-adapting dominant mental tapestry of the moment. They also invent and build new branches of the tapestry that serve specific power groups by providing new avenues of exploitation. These high priests are rewarded with high class status.

The Money Lie

The economists are a most significant example. It is probably not an accident that in the United States at the end of the 19th century the economists were the first professional analysts to be "broken in" in a battle that defined the limits of academic freedom in universities. The academic system from that point on would impose a strict operational separation between enquiry and theorising as acceptable, and social reform as unacceptable.¹

Any academic wishing to preserve her position understood what this meant. As a side product, academics became virtuosos at nurturing a self-image of importance, despite this fatal limitation on their societal relevance, with verbiage such as "the truth is our most powerful weapon", "the pen is mightier than the sword", "a good idea can change the world", "reason will take us out of darkness", etc.

So the enterprise of economics became devoted to masking the lie about money. Bad lending practices, price fixing and monopolistic controls were the main threats to the natural justice of a free market, and occurred only as errors in a mostly self-regulating system that could be moderated via adjustments of interest rates and other "safeguards".

Meanwhile, no mainstream economic theory makes any mention of the fact that money itself is created wholesale in a fractional reserve banking system owned by secret private interests given a licence to fabricate and deliver debt that must be paid back (with interest) from the real economy,

thereby continuously concentrating ownership and power over all local and regional economies.

The rest of us have to earn money rather than simply fabricate it, and we never own more when we die. The middle class either pays rent or a mortgage. Wage slavery is perpetuated and further degraded in stable areas and installed in its most vicious varieties in all newly conquered territories.

It is quite remarkable that the largest exploitation scam (private money creation as debt) ever enacted and applied to the entire planet does not figure in economic theories. Economists are so busy modelling the ups and downs of profits, returns, employment figures, stock values and the benefits of mergers for mid-level exploiters that they don't notice their avoidance of the foundational elements. They model the construction schedule while refusing to acknowledge that the terrain is an earthquake zone with vultures circling overhead.

Meanwhile, the financiers write and rewrite the rules themselves, and again this process does not figure in macroeconomic theories. The only human element that economists consider in their "predictive" mathematical models is low-level consumer behaviour, not high-level system manipulation. Corruption is the norm, yet it does not figure. The economies, cultures and infrastructures of nations are wilfully destroyed in order to enslave via new and larger national debts for generations into the future while economists forecast alleged catastrophic consequences of defaulting on these debts...

Management tools for the bosses, and smoke and mirrors for the rest of us: thank you, expert economists.

The Medicine-is-Health Lie

We've all heard some medical doctor (MD), interviewed on the radio, gratuitously make the bold proposal that life expectancy has increased thanks to modern medicine. Nothing could be further from the truth.

Life expectancy has increased in First World countries thanks to an historical absence of civil and territorial wars, better and more accessible food, fewer work and non-work accidents and better overall living and working conditions. The single strongest indicator of personal health within and between countries is economic status, irrespective of access to medical technology and pharmaceuticals.

It's worse than that because medicine actually has a negative impact on health. Medical errors (not counting misattributed deaths from correctly administered "treatments") are the third leading cause of death in the US after heart disease and cancer, and there is a large gap between this conservative underestimate in the number of medical error deaths and the fourth leading cause of death.² Since medicine can do little for heart disease and cancer, and since medicine has only a small statistically positive impact in the area of trauma interventions, we conclude that public health would increase if all MDs simply disappeared. Think of all the time and stress that sick people would save...

One of the most dangerous places in society is the hospital. Medical errors include misdiagnoses, bad prescriptions, prescriptions for medications that should not be combined, unnecessary surgery and unnecessary or badly administered treatments including chemotherapy, radiotherapy and corrective surgeries.

The lie extends to the myth that MDs anywhere near understand the human body. This well-guarded lie encourages us to put our faith in doctors, thereby opening the door to a well-orchestrated profit bonanza for Big Pharma.

The first thing that Doctors Without Borders (MSF) volunteers need to do in order to contribute significantly in disaster zones is to "forget their medical training" and get to work on the priority tasks at hand: supplying water, food and shelter, and preventing disease propagation—not vaccinating or operating or prescribing medication... Public health comes from safety,

stability, social justice and economic buying power, not MRI (magnetic resonance imaging) units and prescription drugs.

Bonehead MDs routinely apply unproven "recommended treatments" and prescribe dangerous drugs for everything from high blood pressure from a sedentary lifestyle and bad nutrition to apathy at school, anxiety in public places, post-adolescence erectile function, non-conventional sleep patterns and all the side effects from the latter drugs. In professional yet nonetheless remarkable reversals of logic, doctors prescribe drugs to remove symptoms that are risk indicators rather than address the causes of the risks, thereby only adding to the assault on the body.

It's unbelievable the number that medicine has done on us: just one more way to keep us stupid (ignorant

The only human element that economists consider in their "predictive" mathematical models is low-level consumer behaviour, not high-level system manipulation. Corruption is the norm...

about our own bodies) and artificially dependent on the control hierarchy. Economically disadvantaged people don't die from not having access to medical "care": they die from the life constraints and liabilities directly resulting from poverty. How many MDs have stated this obvious truth on the radio?

Environmental Science Lies

Exploitation via resource extraction, land use expropriation and wage slavery creation and maintenance is devastating to indigenous populations and to the environment on continental scales. It is therefore vital for the exploiters to cover up their crimes under a veil of expert analysis and policy development diversion. A valued class of service intellectuals here is composed of environmental scientists and consultants.

Environmental scientists naively and knowingly work hand in hand with corporate and finance shysters, mainstream media, politicians, and state and international bureaucrats to mask real problems and to create profit opportunities for select power elites. Here are some notable examples of specific cases.

• Freon and Ozone

Do you know of anyone who has been killed by the hole in the ozone layer? The 1987 Montreal Protocol banning chlorofluorocarbons (CFCs) is considered a textbook case where science and responsible governance led to a landmark treaty for the benefit of the Earth and all its inhabitants. How often does that happen?

At about the time that the DuPont patent on Freon™—the most widely used CFC refrigerant in the world—was expiring, the mainstream media picked up on otherwise arcane scientific observations and hypotheses about ozone concentration in the upper atmosphere near the poles. There resulted an international mobilisation to criminalise CFCs, and DuPont developed and patented a replacement refrigerant that was promptly certified for use.

A Nobel Prize in Chemistry was awarded in 1995 for a laboratory demonstration that CFCs could deplete ozone in simulated atmospheric conditions. In 2007, it was shown that the latter work may have been seriously flawed by its overestimating the depletion rate by an order of magnitude, thereby invalidating the proposed mechanism for CFC-driven ozone depletion.³ Not to mention that any laboratory experiment is somewhat different from the actual upper atmosphere... Is the Nobel tainted by media and special-interest lobbying?

It gets better. It turns out that the DuPont replacement refrigerant, not surprisingly, is not as inert

as was Freon. As a result, it corrodes refrigerator cycle components at a much faster rate. Where home refrigerators and freezers used to last forever, they now burn out in eight years or so. This has caused catastrophic increases in major appliance contributions to landfill sites across North America, spurred on by the green propaganda for obscenely efficient electrical consumptions of the new appliances under closed-door (zero-use) conditions.

In addition, we have been frenzied into avoiding the sun, the UV index keeps our fear of cancer and our dependence on the medical establishment alive, and a new sunblock industry à la vampire protection league has been spawned. Of course, star university chemists are looking for that perfect sunblock molecule that can be patented by Big Pharma. I predict that as soon as it is, there'll be a surge in media interviews with skin cancer experts...

It is therefore vital for the exploiters to cover up their crimes under a veil of expert analysis and policy development diversion.

• Acid Rain on Boreal Forest

In the 1970s, it was acid rain. Thousands of scientists from around the world (northern hemisphere) studied this "most pressing environmental problem on the planet". The boreal forest is the largest ecosystem on Earth, and its millions of lakes were reportedly being killed by acid from the sky.

Coal-burning plants spewed out sulphides into the atmosphere, causing the rain to be acidic. The acid rain was postulated to acidify the soils and lakes in the boreal forest, but the acidification was virtually impossible to detect. Pristine lakes in the heart of national parks had to be studied for decades in attempts to detect a statistically significant acidification.

Meanwhile, the lakes and their watersheds were being destroyed by the cottage-building industry, agriculture, forestry, mining, overfishing and tourism. None of the local and regional destruction was studied or exposed. Instead, scientists turned their gaze to distant coal-burning plants and atmospheric distribution, and postulated chemical reactions occurring in rain droplets. One study found that the spawning in aquarium of one fish species was extremely sensitive to acidity. Long treatises about cation charge balance and transport were written, and attention was diverted away from the destruction on the ground towards a sanitised problem of atmospheric chemistry that was the result of industrialisation and progress rather than being caused by identifiable exploiters.

As a physicist and an Earth scientist turned environmental scientist, I personally read virtually every single scientific paper written about acid rain and could not find an example of a demonstrated negative impact

on lakes or forests from acid rain. In my opinion, contrary to the repeated claims of the scientist authors, the research on acid rain demonstrates that acid rain could not possibly have been the problem.

This model of elite-forces-coordinated exploiter whitewashing was to play itself out on an even grander scale only decades later with man-made global warming.

• Global Warming as a Threat to Humankind

In February 2007, nearly three years before the November 2009 Climategate scandal burst the media bubble that buoyed public opinion towards acceptance of carbon credits, cap and trade and the associated trillion-dollar finance bonanza which may still come to pass, I exposed the global warming co-optation scam in an essay⁴ (as well as in an interview⁵ and in earlier essays⁴) that Alexander Cockburn, writing in *The Nation*, called "one of the best essays on greenhouse myth-making from a left perspective".⁶

My essay prompted David F. Noble to research the question and write "The Corporate Climate Coup" to expose how the media embrace followed the finance sector's realisation of the unprecedented potential for revenues that going green could represent.⁷

Introductory paragraphs from my essay "Global Warming: Truth or Dare?"⁴ are as follows:

"I also advance that there are strong societal, institutional and psychological motivations for having constructed and for continuing to maintain the myth of a global warming dominant threat (global warming myth, for short). I describe these motivations in terms of the workings of the scientific profession and of the global corporate and finance network and its government shadows.

"I argue that by far the most destructive force on the planet is power-driven financiers and profit-driven corporations and their cartels backed by military might; and that the global warming myth is a red herring that contributes to hiding this truth. In my opinion, activists who, using any justification, feed the global warming myth have effectively been co-opted, or at best neutralised."

Other passages in the essay read this way:

"Environmental scientists and government agencies get funding to study and monitor problems that do not threaten corporate and financial interests. It is therefore no surprise that they would attack continental-scale devastation from resource extraction via the CO₂ back door. The main drawback with this strategy is that you cannot control a hungry monster by asking it not to shit as much."

"Global warming is strictly an imaginary problem of

the First World middle class. Nobody else cares about global warming. Exploited factory workers in the Third World don't care about global warming. Depleted uranium genetically mutilated children in Iraq don't care about global warming. Devastated aboriginal populations the world over also can't relate to global warming, except maybe as representing the only solidarity that we might volunteer."

"It's not about limited resources. ["The amount of money spent on pet food in the US and Europe each year equals the additional amount needed to provide basic food and health care for all the people in poor countries, with a sizeable amount left over." (UN *Human Development Report* 1999)] It's about exploitation, oppression, racism, power and greed. Economic, human and animal justice brings economic sustainability which in turn is always based on renewable practices. Recognising the basic rights of native people automatically moderates resource extraction and preserves natural habitats. Not permitting

imperialist wars and interventions automatically quenches nation-scale exploitation. True democratic control over monetary policy goes a long way in removing debt-based extortion."

The essay is a thorough critique of the science as bandwagon-trumpeting and interested self-deception.⁴ Climategate only confirms what should be obvious to any practising scientist: that

science is a mafia when it's not simply a sleeping pill.

"Recognising the basic rights of native people automatically moderates resource extraction and preserves natural habitats."

Conclusion

It just goes on and on. What is not a lie?

Look at the recent H1N1 scam—another textbook example. It's farcical how far these circuses go: antiseptic gels in every doorway at the blink of an eye; high school students getting high from drinking the alcohol in the gels; outdatedness of the viral strain before the pre-paid vaccine can be mass-produced; unproven effectiveness; no requirement to prove effectiveness; government guarantees to corporate manufacturers against client lawsuits; university safety officers teaching students how to cough; etc.

Pure madness. Has something triggered our genetically ingrained First World stupidity reflex? Is this part of our march towards fascism?⁸

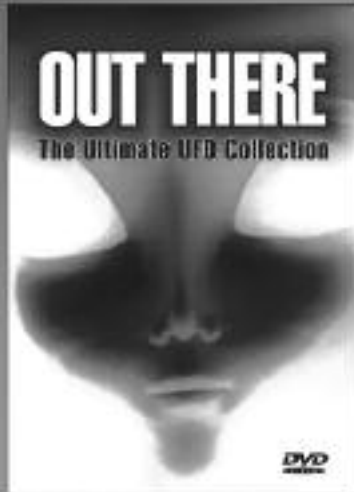

Here is another one. Educators promote the lie that we learn because we are taught. This lie of education is squarely denounced by radical educators.^{9, 10} University professors design curricula as though the students actually learn every element that is delivered, whereas the

PRESENTS

ALL CONSPIRACY, NO THEORY!

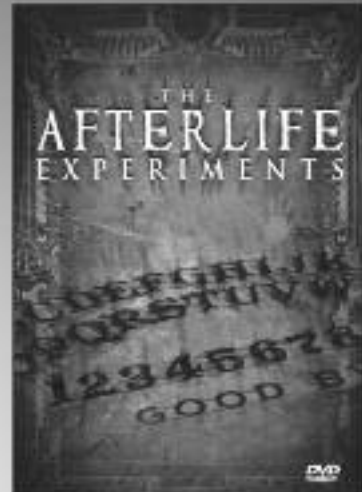

OUT THERE: The Ultimate UFO Collection (6 Disc Box Set)

A powerful collection of the world's most controversial films exploring UFOs and extraterrestrial phenomena. 6 DVD Box Set Includes: 'UFOs & Aliens', 'UFOs: 50yrs of Denial', 'Out of the Blue', 'Life On Mars?', 'Star Dreams' and 'NASA UFO Footage'.

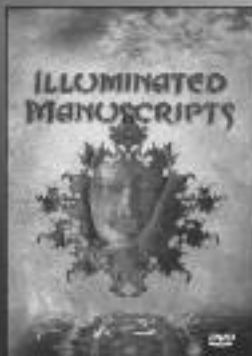

OUT OF THE BLUE: The Definitive Investigation of the UFO Phenomenon

This award-winning feature length documentary reveals through interviews with high-ranking military and government personnel, former U.S. presidents Jimmy Carter & Gerald Ford and also multiple NASA Astronauts, that some UFOs are of extraterrestrial origin.

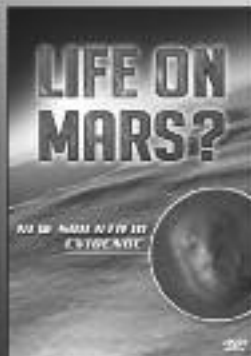

THE AFTERLIFE EXPERIEMENTS

Is there life after death? This award-winning feature length documentary presents the most spectacular scientific evidence for life after death ever presented in any documentary. Evidence very few people have seen before. Captured on film for the first time... The Afterlife Experiments.

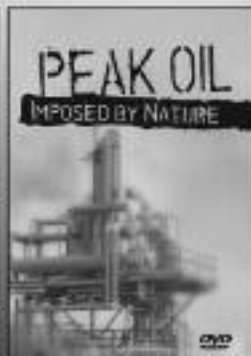

ILLUMINATED MANUSCRIPTS

Explore inter-dimensional visions of ancient worlds. A spiritual voyage of the soul. Beyond the hidden realms of the astral dreamscape, into the afterlife. Alternative dimensions of reality. A journey of self discovery, beyond stillness... a journey like no other.

LIFE ON MARS?

In this historic press conference, scientists announce the discovery of startling artifacts found among the 65,000 recently released NASA/JPL photos by Mars Global Surveyor. They believe these artificial structures are proof that Mars was once inhabited by an intelligent civilization.

PEAK OIL: Imposed By Nature

Peak Oil focuses on the imminent decline in global crude oil production. With record fuel prices on the rise worldwide, this film exposes the sobering truth. Our world is on the verge of an energy crisis of monumental proportions.

NASA UFO FOOTAGE

Rare NASA UFO footage the U.S. Government does not want you to see! Evidence of extraterrestrial visitations to Earth, authentic NASA UFO footage filmed by the Astronauts themselves during numerous space shuttle missions.

STAR DREAMS: Mystery Of The Crop Circles

A feature length documentary revealing the world's most incredibly complex crop circle formations. It also investigates the over-all assumption of hoaxes, balls of light, sacred site connection, media and people's reaction to the phenomena.

ORMUS: MODERN DAY ALCHEMY

is one book that no Esoteric library should be without. Do not miss an opportunity to own the book that finally explains the time-honoured Ormus collection processes.

What is Ormus?

A group of essential minerals previously unknown to modern science.

Why were they unknown?
Because they did not show up in common scientific tests.

What kind of minerals?
Minerals like gold, silver and platinum - but they are in a different form; and in this other form, they are not toxic. We are discovering they are very common in plants, animals, air, soil and water.

How is it beneficial?
It appears to assist communication between cells in the body and between the body and spirit.

Let us imagine, for a moment, that you have not heard of Ormus: While attending a festival, you overhear conversation between four friends. Excitement is in their voices as they talk about something called Ormus. They talk about having more energy and clarity of thought.

You wander, "What is this?" When one asks another, "Have you begun collecting Ormus?" you listen, intent on learning more. They talk about where Ormus can be found and about a book that explains how to collect it.

The friends stop at a food court leaving you with a curiosity and the knowledge of "A Book." That book is Ormus: Modern Day Alchemy.

Here in one book are clear, detailed explanations of time-honoured Ormus collection processes. Included are chapters on the history of Ormus, information about the Ormus material and descriptions of miscellaneous Ormus collection processes.

Ormus: Modern Day Alchemy.
Primer of Ormus Collection Processes.

IMPROVE YOUR HEALTH WITH HEMP SEED

Hemp seed, one of the most nutritionally complete foods on the planet, is now available in Australia. With only the outer hull removed this whole food can supply the family with all the omega 3/6 needed for young brains to grow and old hearts to heal. Hemp seed contains high levels of B group vitamins for healthy nerve function and very high levels of vitamin E, for vascular health. The seed is also rich in magnesium, phosphorus, zinc, manganese and iron.

Very few foods contain such a balance of critical nutrients in a tasty and versatile form. Adequate regular intake can replace multiple expensive supplements and better provide the nutritional factors needed to reduce inflammation and promote healing in a balanced and natural way.

Do the planet a favour - hemp seed production causes no harm, but positive environmental impact, as hemp is nature's perfect way to improve the soil and atmosphere. Eat your way to health and help us heal the planet while you do.

THE SUN IS CHANGING THE RATE OF RADIOACTIVE DECAY AND BREAKING THE RULES OF CHEMISTRY

The Sun is changing the supposedly constant rates of decay of radioactive elements, and we have absolutely no idea why—but an entirely unknown particle could be behind it. Plus, this discovery could help us predict deadly solar flares.

It's one of the most basic concepts in all of chemistry: radioactive elements decay at a constant rate. If that weren't the case, carbon-14 dating wouldn't tell us anything reliable about the age of archaeological materials. It's such a fundamental assumption that scientists don't even bother testing it any more. That's why researchers had to stumble upon this discovery in the most unlikely of ways.

A team at Purdue University needed to generate a string of random numbers—a surprisingly tricky task, complicated by the fact that whatever method you use to generate the numbers will have some influence on them. Physics professor Ephraim Fischbach decided to use the decay of radioactive isotopes as a source of randomness. Although the overall decay is a known constant, the individual atoms would decay in unpredictable ways, providing a random pattern.

That's when they discovered something strange. The data produced gave random numbers for the individual atoms, yes, but the overall decay *wasn't* constant, flying in the face of the accepted rules of chemistry. Intrigued, they checked out long-range observations of

silicon-32 and radium-226 decay, both of which showed a slight but definite variation over time. Intriguingly, the decay seemed to vary with the seasons, with the rate a little faster in the winter and a little slower in the summer.

At first, the researchers tried to rationalise the seasonal fluctuations as the result of instrument error, perhaps caused by changing heat and humidity. But that idea fell apart when nuclear engineer Jere Jenkins noticed that the decay rate of the short-lived isotope manganese-54 dropped slightly during a solar flare. In fact, the decrease began 36 hours *before* the flare occurred.

That suggests two things: one that's theoretically puzzling, and another that's hugely exciting from a practical perspective. If decay rates really are affected by solar flares before the flares even occur, that could provide the first truly reliable early warning system for flares. Considering severe solar flares can wreak havoc on electrical grids and even kill astronauts who aren't properly protected, that would be a huge benefit for humanity.

But practical pluses aside, *why* is this happening? The seasonal fluctuations suggested that the Sun could be involved somehow, and the solar flare connection confirmed it.

The scientists speculated that solar neutrinos, the nearly massless particles created as by-products of the Sun's fusing of hydrogen atoms into helium, might be causing these variations. The fact that these neutrinos pass straight through the Earth with ease fits well with the fact that the decay rates were changing even at night, when the entire planet was between the radioactive isotopes and the Sun.

Once the researchers conclusively ruled out environmental influences, they were left with the Sun as the only possible cause of the decay variations. They also found that the amount of change varied in time with the Earth's orbit: the effect was greater when the orbit brought the Earth closer to the Sun and thus into contact with more neutrinos.

That's where renowned Stanford physics professor Peter Sturrock entered the picture. Confronted with this mystery, he advised the

researchers to test how the decay fluctuations correlated with the Sun's own rotation. They found that the decay rates recurred every 33 days, which didn't quite fit with the Sun's known surface rotation length of 28 days. But the neutrinos wouldn't be coming from the surface: they would be coming from deep inside the core. Unlikely as it might seem, the Sun's core must be rotating a little slower than its surface, apparently once every 33 days.

All of this relies on some unlikely assumptions and the occasional bold intuitive leap, but the model they propose seems to hang together.

And yet one mystery remains: how are the neutrinos managing to interact with the radioactive particles in this way? It doesn't fit with the known behaviour of neutrinos, and it opens up the very real possibility that some previously unknown subatomic particle is actually behind this bizarre effect.

As Peter Sturrock explains: "It's an effect that no one yet understands. Theorists are starting to say, 'What's going on?' But that's what the evidence points to. It's a challenge for the physicists and a challenge for the solar people, too. [If it's not neutrinos,] it would have to be something we don't know about, an unknown particle that is also emitted by the Sun and has this effect, and that would be even more remarkable."

If these new discoveries hold up, then we've discovered that the Sun changes rates of radioactive decay, that we can predict solar flares before they happen, that the Sun's core rotates slower than its surface, and that maybe even an entirely unknown particle exists and is affecting our world in a tangible way.

Not a bad set of results for what was supposed to be a simple search for some random numbers.

THE INTERCONNECTED SUN

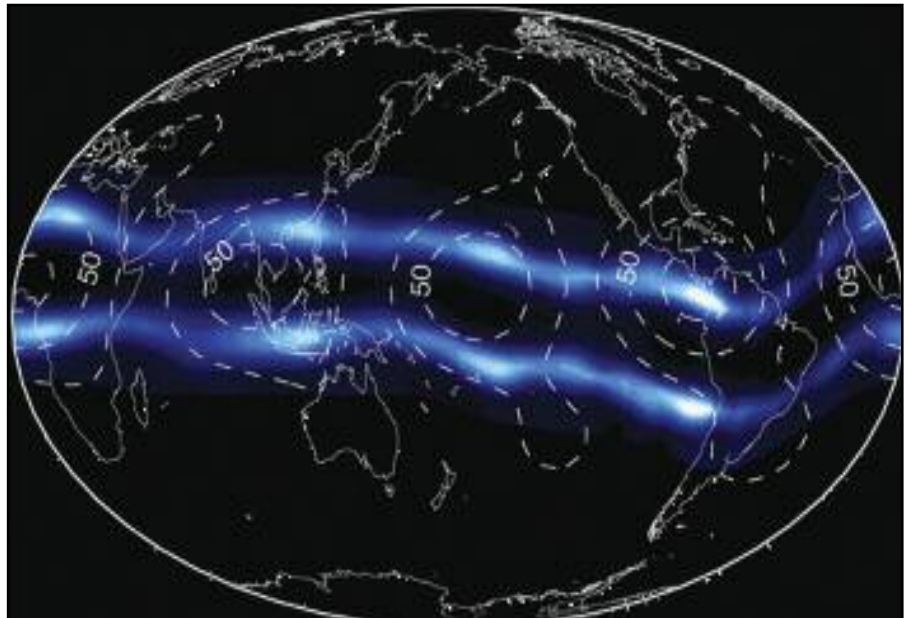

Plasma is often described as the fourth state of matter. Since it makes up more than 99 per cent of the Universe, it should be reckoned to be the first state. The Sun is an example of plasma and its normal behaviour.

Although the general premise is probably thousands of years old—that Earth is somehow an electrical entity—it has only been in the last 100 years that scientists have given serious credence to the possibility that we could be living in a dynamic solar system where electricity plays an important role.

The plasma streams circle the Earth in opposite directions along the equator, carrying positive and negative electric charges.

Since plasma is a charged substance, if it is in motion it will generate an electric current. An electric current flowing through plasma creates a tube-like magnetic sheath that "squeezes" the current to form one or more filaments.

If enough current passes through the circuit, the plasma current filaments will glow, sometimes creating one or more "double layers" of charge separation along the current axis.

Plasma bands in the ionosphere emitting ultraviolet light.
(Source: NASA/University of California, Berkeley)

The Sun's electric field extends for billions of kilometres, influencing the planets in their motions as well as in how they interact with each other. In September 2002, a major premise of the Electric Universe theory was confirmed.

Weather systems on Earth are electrically connected to the field of charged particles, the ionosphere. Dual bands of plasma shining in ultraviolet light were detected by the IMAGE satellite.

Double layers form when a current flows in plasma, and positive and negative charges build up in adjacent regions along the current flow. A powerful electric field appears between the two regions, which accelerates charged particles.

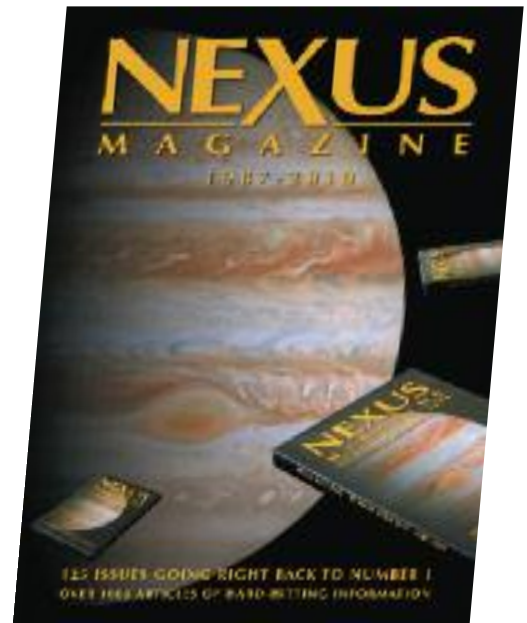

Plasma physicist Hannes Alfvén considered double layers an important cosmic circuit element. ∞

EARTH PRECESSION AND MICRO BLACK HOLES

A connection has been made between a series of unexplained explosions, the Earth's precessional orbit in relation to the Sun, and the inadvertent creation of micro black holes at the Large Hadron Collider in Geneva.

by Olaf Thomas Raabe

otrope@gmail.com

The Explosions

Since the late 1970s, a series of unexplained, very powerful explosions in the atmosphere has concerned scientists and nuclear test ban treaty observers. Some were quite different to the normal meteorite strikes and were so exotic that they have been given names as "events". Some had the energy of small nuclear bombs.

One explosion caused concern at the time when South Africa was suspected of testing a nuclear device in the atmosphere, because a satellite had detected a double nuclear flash at the explosion site. Another in Siberia flattened thousands of trees, on a smaller scale but similar to a more famous explosion almost 100 years earlier over Tunguska, also in Siberia. Meteorite fragments have never been found for these explosions.

The object of the Cando event in Spain crossed the sky very slowly before crashing into a hillside, displacing a large amount of soil and tossing trees 100 metres through the air. Eyewitnesses travelling by car from Santiago de Compostela to La Coruña in the north stated that they "saw the object appear in the right side window" as large as a full moon. They leisurely parked their cars, got out and were able to witness the explosion in the direction of south-southwest. Meteorites simply don't travel "slowly though the sky", as this one did.

It has been speculated that such events may also have occurred in the more distant past, but have only been detected more recently with the deployment of satellites.

It is now possible to link eight such atypical explosions with a single source via new and verifiable mathematical evidence. This evidence is a bit complicated because it relies on probability and on Earth orbits. I'm presenting it in a form most easily understandable to the widest readership.

On average, one such explosion occurs every year or two. In addition to these, there are the normal meteorite strikes. I was able to find documentation on the Internet regarding 11 such explosions since 1979. After eliminating those for which meteorite remnants have been found, I discovered that the following eight remain (listed according to sequential placement on a Standard Earth Orbit diagram):

- 18 January 1994, near the village of Cando in northern Spain; energy estimated at 2,000 tons of TNT.¹
- 19 January 1993, near the town of Lugo, near Ravenna in northern Italy; no energy estimate available.²
- 1 February 1994, Marshall Islands, Pacific Ocean; energy estimated at 11 kilotons (11,000 tons) of TNT.³
- 6 June 2002, Eastern Mediterranean Sea, from Libya to Greece; energy estimated at 26 kilotons (26,000 tons) of TNT.⁴
- 10 September 2005, near the island of Ischia off Naples, Italy; no energy estimate available.⁵

- 12 September 2006, Canterbury Province, New Zealand; no energy estimate available.⁶

- 22 September 1979, southern Indian Ocean; energy estimated at 3,000 tons of TNT.⁷

- 25 September 2002, Vitim River, near the town of Chita, Eastern Siberia; energy estimated by some sources at approximately 2,000 tons of TNT.⁸

A connection becomes clear when these explosions are plotted on a Standard Earth Orbit chart (diagram 1).

For astronomers, one clue is immediately evident: there are pairs in January and in September, one or two days and a year apart. They appear to indicate precession. For non-astronomers, precession is the gradual shift of Earth's orbit due to the 23.5-degree axial tilt in relation to the orbital plane, the unequal distribution of mass and the slightly elliptical orbit around the Sun (giving a slight variation in Earth-Sun distance of

five per cent). The result is that Earth's orbit progresses by about 30,000 kilometres every year, resulting in a "rosette window" pattern of orbit intersection points. The intersection points themselves, however, have never been seen as having any meaning at all—until now.

Here lies the evidence. Plotting the locations of the intersection points on a Standard Earth Orbit results in a trapezium pattern. It is mathematically defined by the Earth's slightly elliptical orbit and the position of the

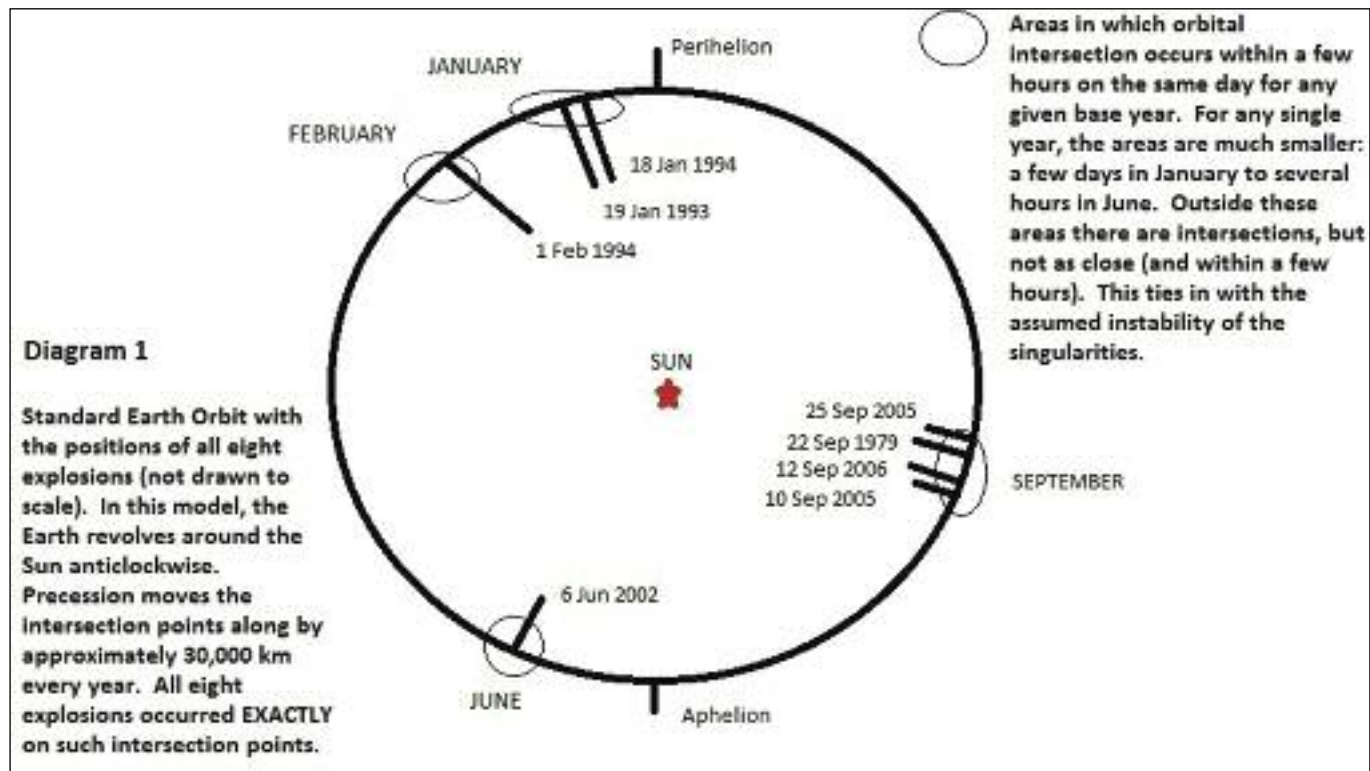

Sun, slightly off centre. Every year, the intersection points wander ~30,000 km further along. With an average radius of ~150,000,000 km between the Earth and the Sun, this difference would not be noticeable on any diagram without great exaggeration. For points outside the intersection areas, the Earth is never in the same location in relation to the Sun within several hours; that is, in relation to a fixed event in an earlier year. For periods further back in time, such as 1979,

1993 and 1994, leap years between the present and the year of the explosion must be considered, as these also move the intersection points along.

I have compared the orbits for many years and searched them for intersection points (diagram 2). There are only 25,771.5 possible orbits; after this amount of time, the ecliptic returns to the original position. There is only one sequential orbital period in these ~25,780

years in which all eight explosions have points at which the Earth intersects the exact same position on the same day within a few hours. It is the orbit of Earth from 9 September 2009 to 2 February 2011 (diagram 3). One such almost exact intersection point, or perhaps even two such points, in any given year could be coincidence. For all eight, however, to be occurring in one year, the probability is close to a staggering two billion to one, even with the most conservative calculations.

There is only one sequential orbital period in these ~25,780 years in which all eight explosions have points at which the Earth intersects the exact same position...

If not only the *days* of explosions but also the *exact times* in relation to intersection points are considered, the likelihood of any coincidence is impossibly small.

It is evident that there is a connection between events on Earth during the orbit from 9 September 2009 to 2 February 2011 and all eight explosions. With readily available 3D-imaging astronomy software, which calculates the Earth's rotation and the position of points on the Earth's surface, it is also possible to establish the geographical area of the source of all these explosions.

The Intersection Points

• **Cando, Spain.** On 18 January 1994, the Cando event occurred near La Coruña in northern Spain "just before 07:15" GMT. The Earth was exactly the same distance from the Sun on 18 January 2010 at 09:52:16 GMT. In 3D simulations, the direction of Geneva, Switzerland, in orbit at the time coincides exactly with the observed direction of the object from north-northeast to south-southwest.

The axis of La Coruña (the software cannot plot the position of the village of Cando, so this approximation is the closest possible) in 1994 and Geneva in 2010 coincides with the observed direction of the object. Because there is very little difference between orbital speeds due to an extended intersection phase (typical

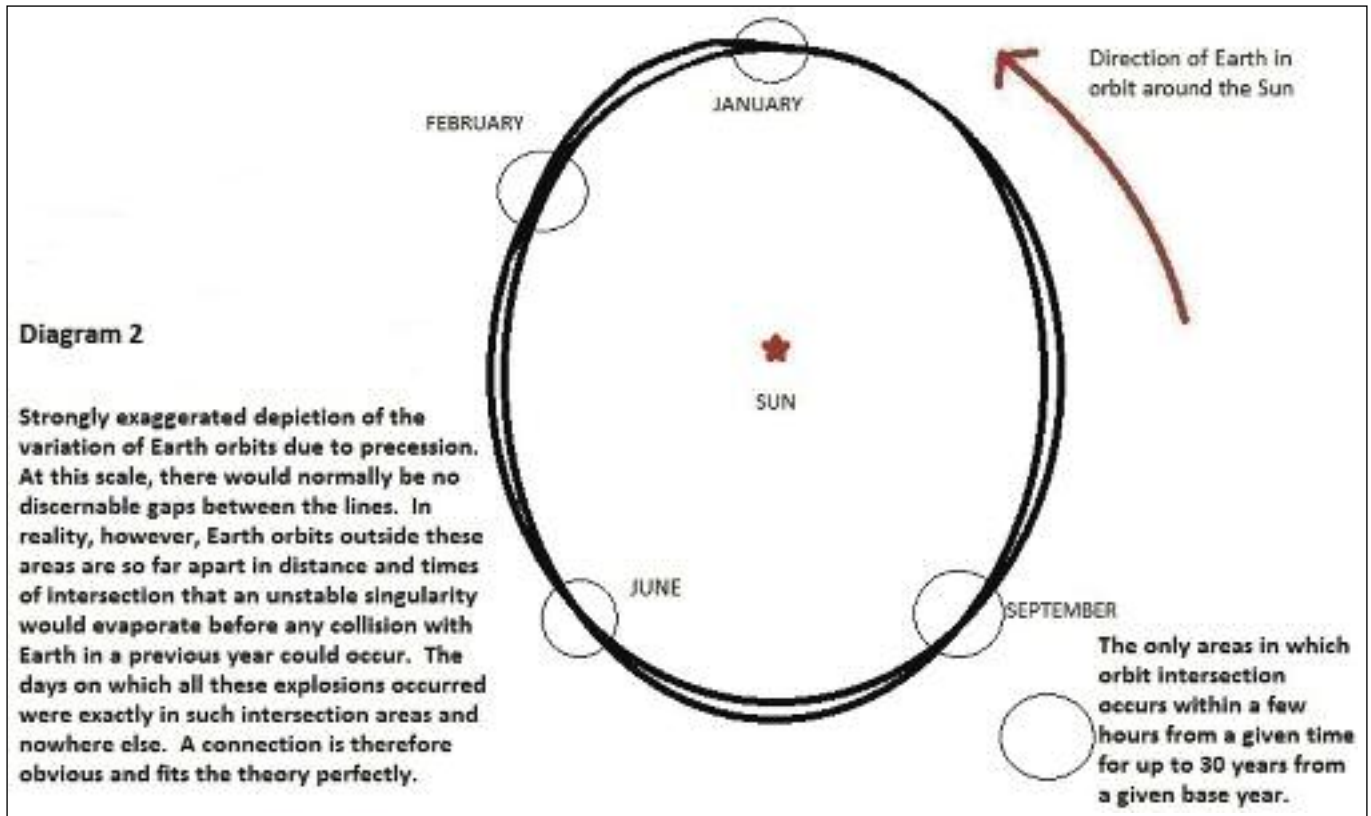

for January intersections), a slow entry velocity of a singularity would result.

There is a partial overlap with the points of Cando and Geneva near the necessary time for creation of a singularity, with the required points being well within the Earth's gravitational field.

• **Lugo, Italy.** On 19 January 1993, an object exploded near the town of Lugo near Ravenna in northern Italy at 00:33 GMT. On 19 January 2010 at 09:13:21 GMT, the Earth was exactly the same distance in relation to the Sun as at the time of the 1993 explosion. Again, in the orbital simulation, there is a partial overlap with the points of Lugo and Geneva near the necessary time for creation of a singularity, with the required points being well within the Earth's gravitational field. However, the simulation does not place Lugo in a direct line with Geneva.

• **Marshall Islands, Pacific Ocean.** On 1 February 1994 at 22:38 GMT, the explosion occurred approximately 300 kilometres south of Kosrae Island in Micronesia. At this time, the explosion site was almost equidistant with Geneva at 07:21:42 GMT on 2 February 2011, during partial intersection, with a difference of 3,593 kilometres, and the 1994 blast site heading directly for the position of Geneva in February 2011. The locations match exactly.

...there is a connection between events on Earth during the orbit from 9 September 2009 to 2 February 2011 and all eight explosions.

• **Eastern Mediterranean Sea.** Nowhere on the Internet could I find reference to the time of this explosion, which is strange because the so-called Eastern Mediterranean event of 6 June 2002 raised top-level concern around the world. It was detected by a US military satellite, which may explain the apparent absence of information regarding the exact time of the event. It was so powerful, with energy estimated at 26,000 tons of TNT, that US General Simon Worden stated that if it had occurred over India or Pakistan instead of over the Mediterranean Sea, it could easily have triggered a nuclear war because of the crisis between these two countries.

I have calculated that at 05:49 GMT on the morning of 6 June 2002 and at 04:32:02 GMT on 6 June 2010, the distance of Earth from the Sun was almost exactly the same during a short precession intersection (the variation was only seven kilometres). In simulations, on 6 June 2002 the location of eastern Libya, the known entry point of the object into the atmosphere, is moving towards the greater area of Switzerland on 6 June 2010.

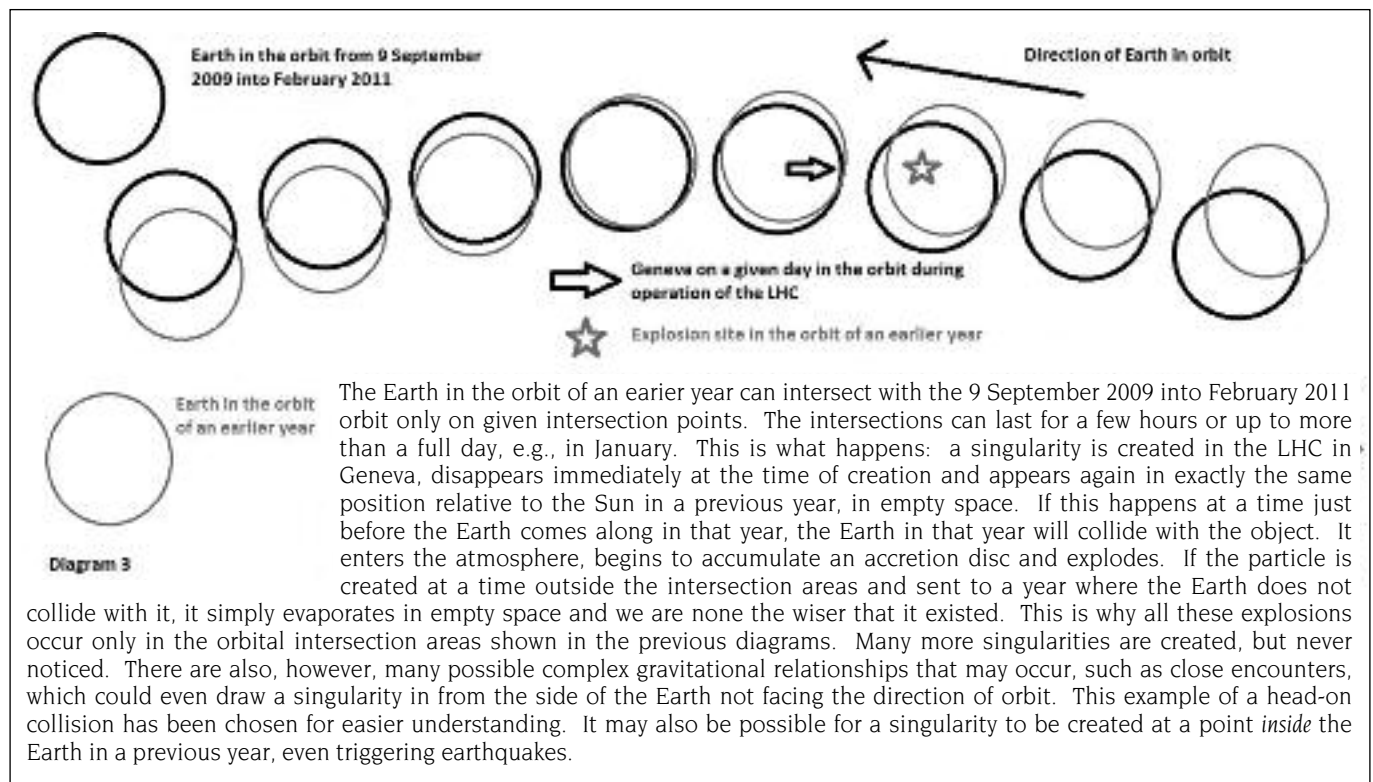

The object exploded on 6 June 2002 near Greece, with the force of a small nuclear warhead. This is without doubt an orbit intersection point with a steep angle of intersection which resulted in the object having a higher entry velocity into the atmosphere.

This caused the greater explosion due to the ability of the singularity to accumulate more accretion disc matter from the atmosphere in a shorter time. The greater the distance travelled, the bigger the explosion. This is explained in my hypothesis on the cause of all the explosions.

• **Ischia, Bay of Naples, Italy.** On 10 September 2005 at 15:11 GMT, a huge explosion was heard and registered over the island of Ischia in the Bay of Naples. Eyewitnesses have not come forward, but the event was very well documented. It is assumed, as is often the case, that the cause was a meteorite; but between 13:43:27 and 13:43:30 GMT on 10 September 2009, the Earth position was almost equidistant from the Sun compared with at the same time in 2005, with a complete orbit intersection overlap occurring later on 10 September 2009. In 3D orbit simulations, the point of the 2005 Ischia explosion is moving directly towards Geneva on 10 September 2009.

• **Canterbury Province, New Zealand.** On 12 September 2009 at 09:23:50 GMT, the Earth's distance from the Sun was exactly the same as at 14:59 GMT on 12 September 2006. In 3D orbit simulations, the point of the 2006 explosion over Canterbury Province on the South Island of New Zealand is moving directly towards Switzerland. This 2006 explosion is not usually referred to in the context of the other more exotic explosions, but the cause becomes just as clear in the simulations. In the local New Zealand media, there were reports of a huge explosion which shook windows over many kilometres and caused concern among residents.

• **Southern Indian Ocean.** On 21 September 2010 [after we go to press; Ed.] at 22:31 GMT, the Earth will be at the same distance relative to the Sun as at the time of the so-called Vela event—the explosion over the southern Indian Ocean on 22 September 1979 at 00:53 GMT. In simulations, the Prince Edward Islands north of Antarctica, near South Africa, the site of the 1979 explosion, is moving directly towards Switzerland on 21

September 2010. The Vela event was the first of this series of unexplained explosions. The satellite Vela 6911 registered a "double nuclear flash", which caused much debate for years and was attributed to possible equipment failure or an illegal South African atmospheric nuclear weapons test. The true cause has never been found—until now.

• **Vitim River, Eastern Siberia.** On 25 September 2010 at exactly 17:57:22 GMT, the Earth will be at the same distance to the Sun as it was on 25 September 2002 at 16:49 GMT. At this time in 2002, a US satellite registered the explosion over the Vitim River in Eastern Siberia, near the village of Bodaybo. In 3D orbit simulations, it is possible to see that, considering Earth rotation and movement along the orbit, the area west of the Vitim River area where the object exploded in September 2002 is moving directly towards the greater area of Switzerland in September 2010. The time transfer of a singularity just before 17:57 GMT on 25 September 2010 would propel it towards the Vitim River area, causing the explosion on 25 September 2002 at 16:49 GMT. How could this be so?

The Link to the LHC

All eight explosions occupy all four possible intersection areas. A connection is therefore obvious. The exact times of all eight explosions—having been shown to have occurred at times when Earth positions were in the rare overlap periods—and the equal solar distances are all easily verifiable.

The 3D orbit simulations, showing a link between the explosion sites and either Switzerland or, in some cases, the exact location of Geneva, provide a direct causal link between the times of the explosions and events from 9 September 2009 to 2 February 2011 (anticipated at the time of writing).

There is a link, but what is this link—and what could possibly be the cause of the explosions? According to Einstein's theory of relativity, even time itself is subject to the same relativity as energy and mass. Experiments with the most accurate clocks have proven that time runs more slowly when these clocks are carried aboard planes flying at supersonic speeds. The differences in times are minimal, but the evidence is proof enough that time is relative. Scientists have calculated that to move even a small space probe back in time, the energy required would be more than the total energy output of our Sun. Time travel is therefore impossible in reality.

However, this is *not* the case for subatomic particles of little or no mass. For such particles, including micro black holes, time transfer is possible with energies substantially under the seven million electronvolts (7 TeV) which the Large Hadron Collider (LHC) near Geneva, Switzerland, is reputedly aiming to achieve.

It must also be explained that there is one more key difference between the time travel of science fiction and time transfer according to Einstein's relativity. The major factor in relation to time-space in our area of the Universe is the Sun, because it has 300,000 times the mass of the Earth. If an object were transferred back in

time, it would not, as in science fiction, remain on the surface of the Earth while everything around it grew older or younger. A subatomic particle, transferred in time, would simply disappear at the point of transfer, only to reappear in exactly the same position relative to the Sun but in empty space. This is because of the Sun's dominant mass: Earth's position is not the determining factor regarding the point to which a particle is transferred. However, if that same orbit position happened to be an orbit intersection point, the Earth in an earlier year would collide with that particle at the time of orbit intersection.

The intersection points of all eight explosions with one single Earth orbit—the orbit from 9 September 2009 to 2 February 2011—are in exactly the time frame during which "the greatest experiment in human history" is being conducted at the LHC, where subatomic particles are being subjected to energies in an

attempt to recreate the conditions of the first seconds of the Big Bang. Scientists are hoping to discover new and totally unexpected effects in this experiment—and may well do.

Could it be that micro black holes—which have been predicted by physicist Stephen Hawking and others and which, according to Hawking, would simply "evaporate" or disappear—actually disappear, only to reappear in exactly the same position in another time? The evidence could indicate this. If the Earth in earlier years has already collided with these micro black holes and caused these eight explosions, then why do these micro black holes explode? I have a full hypothesis predicting and explaining this, but space does not permit elaboration here. Whether or not the hypothesis is correct, the evidence stands as it is. The link is proven. I am only at the beginning of this research; perhaps

The intersection points of all eight explosions with one single Earth orbit...are in exactly the time frame during which "the greatest experiment in human history" is being conducted at the LHC...

others will complete it. But it *has* to be understood because, if these objects are stable for periods of a year or more, in all probability there will be more such "bombs in the orbital path" waiting for the Earth to collide with. However, luckily for us, it appears that they may *not* be stable, because the explosions all occur on intersection points on which the time-transferred singularities only need to exist for a few hours.

As I write this in August 2010, I'm concerned about the next intersection points in September 2010 and January to February 2011. I also need to explain regarding the Cando and Lugo events that the LHC supposedly was not operational in January 2010, but recommenced operations in March 2010 after the initial problems. The data, however, clearly suggest a connection with 18 and 19 January 2010. Was the LHC being tested on these dates?

Since completing this article, I've discovered that another explosion—on 24 January 2007 over Richmond, Virginia, USA, at around 8.00 pm—exactly fits with an intersection point on 24 January 2010, with Richmond heading straight for Geneva at 17:32:35 GMT, the time of equidistance being 23:00 GMT. This would mean that the LHC would have been in operation on that day as well, before the official recommencement in March 2010. More connected explosions may yet be found. This is a work in progress.

More Temporal Transfers Expected

If my theory regarding the unstable nature of time-displaced singularities is not correct and further singularities *have* been created along the 9 September 2009 to 2 February 2011 orbit, we will have begun to collide with them any time from 9 September 2010. We can only hope that this will not be the case, because it is a matter of life and death for us all...

Even if the time-displaced singularities are unstable and further explosions caused by singularities sent to the orbits of 2007 and 2008 did not occur, the possibility that the LHC is creating explosions along the time line is reason enough to stop this experiment and to prevent any attempt to build a new and even more dangerous linear collider. Time transfer caused by colliders may occur in both directions along the time line, which means that we may yet encounter explosions similar to those on the list. The frightening thing is, we simply don't know—but we can't wait decades for the scientific community to reassess the risks.

I understand how difficult this may be for many readers to understand. Temporal transfer? Exploding micro black holes? But the evidence is too strong for it all to be coincidence. One explosion, sure; maybe even

two; but all eight, or nine, considering the Virginia explosion? Most convincing are the 3D orbit simulations which show just how rare orbit intersections are, and also show links between the sites of the explosions and Geneva and/or Switzerland. By the time you read this, I hope to have uploaded videos onto YouTube of various simulations so you can judge for yourself (with the keyword "NEXUS" in the titles for easier searching). I may also have to explain how temporal transfer occurs in colliders as a natural result of the Contracting Matter theory. I'll keep you posted.

∞

About the Author:

Born in West Germany in 1954, Olaf Thomas Raabe has worked in public service in Germany and Australia for many years. With a lifelong interest in astronomy, cosmology and physics, he became suspicious of assurances by physicists

Time transfer caused by colliders may occur in both directions along the time line, which means that we may yet encounter explosions similar to those on the list.

about the safety of the LHC experiments as these are based on the unproven Big Bang theory.

In his opinion, the only theory which fits all the scientific evidence and can explain why micro black holes can be temporally displaced is Contracting Matter theory. The Orbital Precession Intersection evidence is indirect proof of this theory. Tom Raabe can be contacted by email at otropie@gmail.com.

A Must Read!!

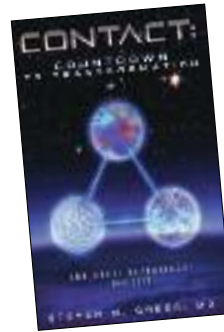

HIDDEN TRUTH: FORBIDDEN KNOWLEDGE

by Steven M. Greer MD

From his sighting of a UFO at an early age, to his amazing near-death experience at age 17, to his unraveling of the secret cabal running the illegal transnational energy and UFO-related projects, to his meetings with a CIA Director, US Senators, heads of state and royalty – you will be moved, shocked and enlightened as you read through this memoir. Journey with Dr Greer as he takes you into the corridors of secret power – beyond the government as we know it – to a shadowy cabal of power-mad controllers, and their hidden agenda.

* New book+DVD by Steven Greer

CONTACT:

Countdown to
Transformation

by Steven M. Greer, MD

This book goes far beyond the usual accounting of objects seen in the sky and takes the reader into a universe of higher states of consciousness, remote viewing and direct Contact with civilizations that interface with thought and awareness as easily as we talk on cell phones. Journey with the CSETI team as they go beyond the veil of light and the resonant frequency of matter and enter into close contact with numerous ET civilizations who eagerly await the coming Transformation on Earth. The accompanying DVD shows the images, sights and sounds of Contact, as it has evolved over the past 17 years. You will learn how this Contact has been made - and how you, too, can become an Ambassador to the Universe!

Russell Targ
Physicist and Leader in the area
of Remote Viewing

Speaking in
Auckland
15th – 17th October

Science, Consciousness &
Spirituality Conference
The Power of Relationship

Leading researchers
and pioneers from
around the globe share
their experiences

Through the Stanford Research Institute (STI), during the 1970s and 1980s Russell Targ carried out investigations of our ability to experience and describe distant events blocked from ordinary perception.

This intuitive capacity was named remote viewing, and the research was supported by the CIA and many other government organisations for gathering intelligence about world-wide activities during the Cold War.

Physicist Russell Targ, during his segment of presentations at the Conference, will describe the very best scientific evidence for extrasensory perception, precognition, intuitive diagnosis and distant healing.

He will also lead a two-hour workshop in which attendees will be given the opportunity to experience many of the above for themselves.

More About The Conference

Other Speakers include:

- **Marilyn Schlitz PhD** - Clinical research scientist, medical anthropologist, writer and thought leader. Her work over the past 3 decades explores the interface of consciousness, science and healing.
- **Dr Larry Dossey** - Physician of internal medicine formerly with the Dallas Diagnostic Association and former Chief of Staff the Medical City Dallas Hospital. He is currently the editor of EXPLORE: The Journal of Science and Healing.

The conference will be held on Friday October 15 at the Hopetoun Alpha in Auckland City, and October 16 and 17, 2010 at the Auckland University of Technology, Akoranga Campus, Auckland.

You have the option to attend: the Friday evening on the 15th of October or, the 2 days of full seminars on the 16th and 17th of October or, the 3 days, the 15th through to the 17th of October (Friday evening and 2 days of seminars)

For more information about the Schedule and to Register,, visit www.mindbody.org.nz or contact Julie Styger at info@hopetounalpha.co.nz

CROP CIRCLES 2010

THE TWENTY-YEAR CURVE

This season's global tally of 110 crop glyphs featured an array of artistic masterpieces including complex mandalas, optical illusions and binary-coded images, and, as usual, fuelled controversial debate among cropwatchers.

Two Decades of Pictograms

This summer, a large annual event known as the Glastonbury Symposium celebrated its 20th anniversary (or 21st, if a smaller prototype event of 1990 is included) in the ancient heartland of Arthurian legends. Perhaps 20 years is slight on some scales, but as something that began as a celebration of the crop circle mystery it was a significant marker, making it the longest-running gathering of its kind.

For something that has been subject to so much dismissal and misrepresentation, the circular puzzle has had an extraordinarily tenacious presence. Although it has roots going much further back, as archive records of circles dating from the 1600s onwards (and photos from the 1930s) clearly demonstrate, it was the early 1990s that saw a surge of new complexity in the fields with "pictograms", after what had once just been circles and rings. With them came all the attendant interest that such a seemingly new and bizarre public novelty was guaranteed to generate, hence the creation of the Glastonbury Symposium and other circle-focused conventions.

Of the early events, the Symposium alone has survived, developing and adapting to other concerns and related phenomena in the years since, and we will return to it later, but the fact that, even after 20 years, painted banners still hang from its venue walls depicting glyphs that originated as anonymous shapes in the fields is an illustration that we were always dealing with something special—and resilient.

For all the debunking since the sobering hit of the first major hoaxing claims in 1991, interest has remained at a relatively steady level amongst a certain demographic of open-minded souls, while the progression of the astonishing shapes themselves has continued to push back the boundaries year upon year. Cereological personalities come and go, ideas and concepts are proposed and retracted, and forums fill with heated exchanges, yet, somehow, the air of mystery wreathed around the enigma never quite blows away. For every new claim (and there are many) that human artistry explains it all, along comes another jarring physical feature or anomalous sighting that doesn't quite seem to fit such easy generalisation.

So here we are, two decades on since British newspapers and televisions were momentarily full of the new wonders in the countryside before cruel cynicism set in to reinforce the dull status quo to the masses. But still, new and mysterious works of art are offered from nowhere each summer to those with eyes to see, and still an audience is found, drawn despite all.

A Later Start in the UK

The crop formations of 2010, then, as with all seasons before, had their own quirks, astonishments and disappointments. Indeed, an unusual lack of punctuality dented the expectations of some who are used to mid-April appearances for the first UK events, traditionally seen as the key entries in the

global tally. (In fact, New Zealand and then Italy jumped in with the first arrivals on 1 February and 30 March respectively, though the Kiwi entry was publicised as a known hoax.) This year, British cropwatchers had to wait until 5 May, when a complex mandala of the orthodox variety finally graced the fields at Old Sarum, near Salisbury, a little further out from the usual Wiltshire epicentre of Alton Barnes and Avebury.

The trend for lesser-known regions of the core county to be visited by glyphs would continue for several weeks before the phenomenon gave in and finally offered activity in the more expected places, with only a formation of wide swirls opposite Stonehenge on 9 May and a six-fold flower design at Silbury Hill on 31 May constituting earlier but isolated nods to geographical tradition. Outside of Wiltshire, a number of other areas benefited from the season's slight redistribution, with patterns being reported in places less known for circles and in counties which have been quieter in recent years, such as Buckinghamshire, Dorset, Essex, Gloucestershire, Hampshire, Lincolnshire, Nottinghamshire, Somerset, Warwickshire and Yorkshire, as well as on the island of Guernsey.

Highlights of the Season

The first crop formation of the year to raise mathematical eyebrows appeared on 22 May as a wheel of binary coding at Wilton in Wiltshire (near the famous windmill, which, curiously, the design also echoed), incorporating plays on π and elements of "Euler's identity" (an equation which contains three basic arithmetic operations that occur once each—addition, multiplication and exponentiation—and also links five fundamental mathematical constants [source: Wikipedia]). The wheel also referenced ASCII coding, which can generate text on a computer, though hopes that it would translate directly, as with the uniquely worded warning in the famous 2002 "alien and disc" emblem, were dashed by its either deliberately obscure or inaccurate rendering, in itself a subject of much "croppie" debate.

A striking eye-bender of radiating stripes and inlaid circles at Liddington Castle, Wiltshire, on 2 June was one of the earlier highlights of the season, while a multiple-bubbled, two-armed design on 7 June near the long barrow (ancient burial mound) of Stoney Littleton in Somerset distinguished itself by being in peas—an

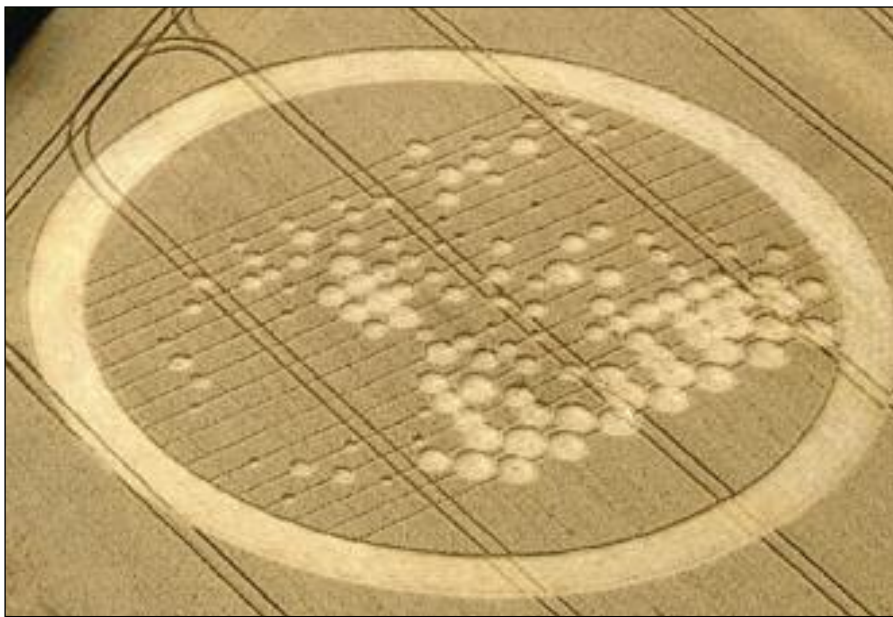

Cley Hill, near Warminster, Wiltshire. Reported 9 July.
Image: John Montgomery © 2010

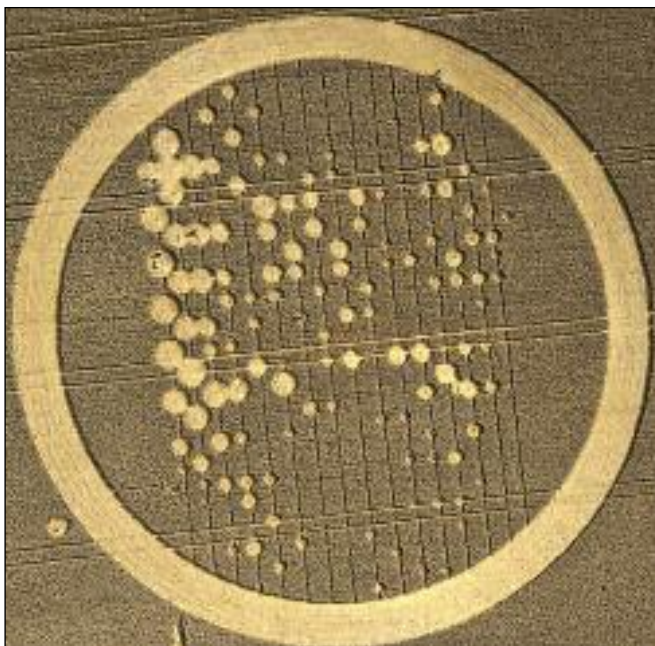

unusual crop for the mystery to work in. As June wore on and gave way to July, an array of clever masterpieces too numerous and complex to describe individually (the accompanying images here say more than words can attempt) kept the faithful entranced.

Roundway Hill, near Devizes, Wiltshire. Reported 25 July.

Wickham Green (north of M4), near Hungerford, Berkshire. Reported 30 July.
Image: Madelien Scholten © 2010

Wickham Green (south of M4), near Hungerford, Berkshire.
Reported 30 July. Image: John Montgomery © 2010

Most striking of the peak entries was the fantastic optical illusion of a three-dimensional multi-faced block of crosses, which arrived on 9 July at Cley Hill near Warminster, Wiltshire—site of the UFO "flap" of the 1960s to early 1970s. Most impressive was the way in which light and shade were suggested by texturing certain parts of the laid crop with "cross-hatching", making for one of the more original and ambitious designs in recent years.

Less traditional in style, but equally bold in ambition, were the two most unusual formations of the season, found two fields away from each other on either side of the M4 motorway at Wickham Green, near Hungerford,

Buckinghamshire, on 30 July. At first they appeared to be obscure abacus-like lines and "beads", but the act of squinting or blurring the images suggested the vague presence of humanoid faces. Superimposing one design on top of the other, however—seemingly the task being set—revealed an incontrovertible visage. *Which* visage has opened up great debate. Some see the face of Jesus Christ, while others see the Mona Lisa or even "the face on Mars". Whichever way, this was sophistication of an impressive kind.

With the fields being harvested rapidly by August and the canvas diminishing, there was still time for a few more high-quality events in Wiltshire, such as the design that brilliantly but oddly resembled an egg-slicer at Woodsend on 3 August,

sophisticated mandalas at Pewsey on 8 August and Horton on 9 August, as well as a longer pictogram at Beckhampton on 13 August, resembling some kind of sun-disc or Roman Catholic monstrance (host-holder). There were also some strange "splodges" throughout the summer, such as the curious radial ring at Stanton St Bernard on 8 August, surely too rough even for the worst land-artist yet too delineated in its basic form to have been caused by the weather, which stimulated yet further debate about the nature of this fascinatingly inconsistent phenomenon.

In the Thick of It

As the summer progressed, there was an inevitable active return of the phenomenon to the more familiar haunts of Alton Barnes and Avebury, though not all were happy with the quality of some of the designs there. Claims of people being seen making formations and a general air of paranoia from certain hard-core croppies spoiled the atmosphere for the sensitive. Internet rants from newly self-elected "experts", voicing unfounded accusations that a string of long-time circle researchers were now, in fact, the ones creating most of the patterns and that there should be a ban on their work and wares, were as ill-considered as they were laughable—and certainly evidence-free. But the ego-bound have always found little platforms from which to pronounce their fantasies in the cerealogical world (something abetted further by the new ubiquity of Facebook), and candidates will doubtless continue to come and go as quickly as others have before them.

Indeed, some of today's enthusiasts would do well to read up on the previous 20 years' research (something that many clearly haven't done), for in so doing they would realise that the very same challenges and lessons

that are being met now, as belief-envelopes are stretched and sometimes burst, are nothing new: it has *all* happened before. It seems a shame that the lessons of the past are rarely built on in the circle world, but then the turnaround of incoming people on the curve of their own personal journeys with the crop formations has become so fast that the soul-searching that once took people decades now seems to complete itself within a couple of seasons or so. Perhaps time really is speeding up. Candidates are either spat out the other end, disillusioned and confused, or emerge matured, embracing the joyfulness of uncertainty. Either way, no one is ever quite the same after crop circles.

But there seems to be no shortage of willing students up for the challenge, and the seemingly indestructible cerealogy-themed Silent Circle Café, now reincarnated in its third home, at Yatesbury, near Avebury, was heaving with visitors from all over the world throughout the summer. New faces mingled, spellbound, with the old familiars, both believers and sceptics, unable to stay away despite themselves. Standing with tea and cake, surrounded by circle imagery and memorabilia, everyone seemed levelled, whether discussing the unusually warm, dry season or arguing over which researchers might have been mind-controlled by the black helicopters or evil psychic entities this year.

From a distance, this little world could be seen as the epitome of "fringe". But on the inside, it all seems to tick over effortlessly with its own internal logic, hermetically sealed yet somehow rather charming for all its storm-in-a-teacup controversies. And there seemed to be no less excitement at news of yet another masterpiece in the fields than ever there was.

Global Activity

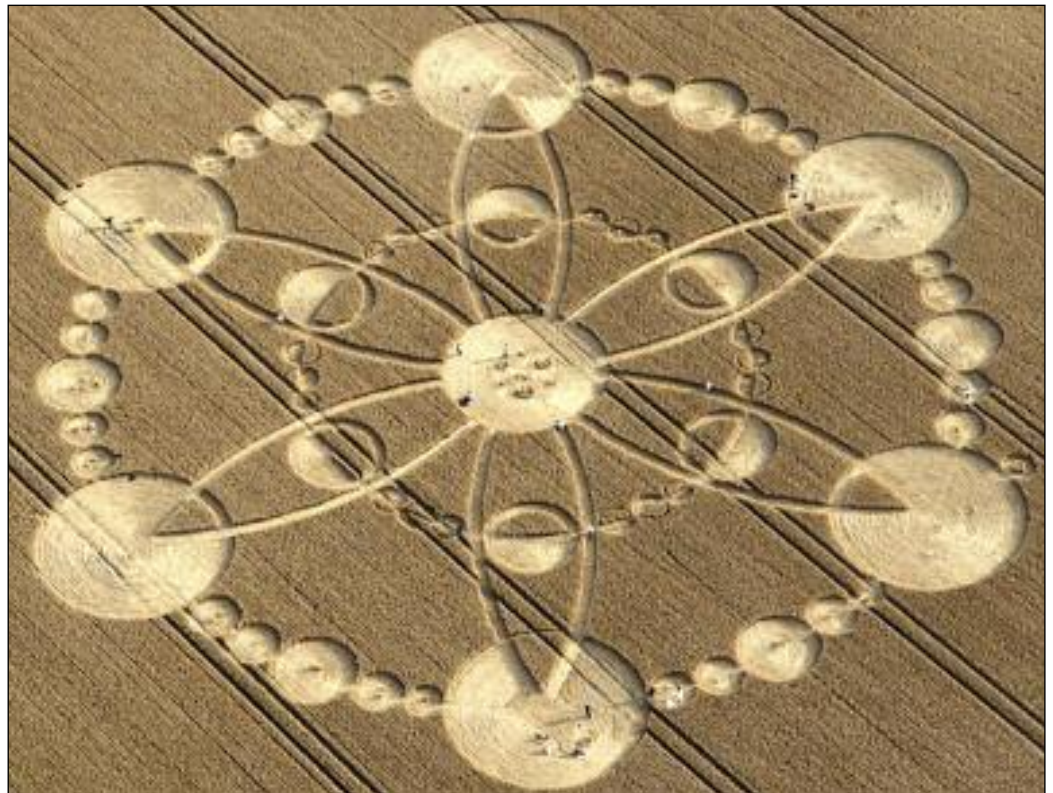

Around the world, the phenomenon did have a life outside of England's ground zero—just. By late August, the UK had been visited by a not unreasonable, if not record-setting, 57 formations; but of 53 global formations outside of English borders, 22 of these were in Italy.

Italy has often been the closest runner, in terms of numbers, to the mystery's epicentre but slipped back in 2009 to just seven events, so this figure of 22

Whitefield Hill, nr Woodsend, Wiltshire. Reported 3 August.
Image: Lucy Pringle © 2010, www.lucypringle.co.uk

was something of a recovery. Though some of the latest Italian efforts admittedly seemed little more than rather unruly doodles, two or three stood out as being in a higher league. One in particular challenged even the best of the UK models, with a huge six-armed floral design arriving at Poirino, in the Torino area, on 13 June. With its outer edge delineated by small beads of circles and its inner parts marked with delicate petals, this ranked for many as one of the best of this year's formations.

Windmill Hill, near Avebury Trusloe, Wiltshire. Reported 27 July.

Stanton Bridge, near Honey Street, Wiltshire. Reported 8 August. Image: Olivier Morel © 2010

Horton, near Devizes, Wiltshire. Reported 9 August. Image: Olivier Morel © 2010

Northdowns, near Beckhampton, Wiltshire. Reported 13 August. Image: Frank Laumen © 2010, www.visible-signs.de

Germany managed to produce 13 crop glyphs in 2010, with a thin spiral at Schneen in Lower Saxony on 30 June and a nine-fold mandala at Oberschleissheim, near Munich in Bavaria, on 16 July providing the best examples.

Overall, world numbers were much as they have been for the past couple of years. Other countries visited included Belgium, The Netherlands and the USA, each with four events of one kind or another, however modest. The Czech Republic, France and Norway had two apiece, while countries such as Croatia, Russia and Switzerland received single visitations. Thus it remains clear that the main attention for these strange designs, for whatever reason, is still being focused primarily on England.

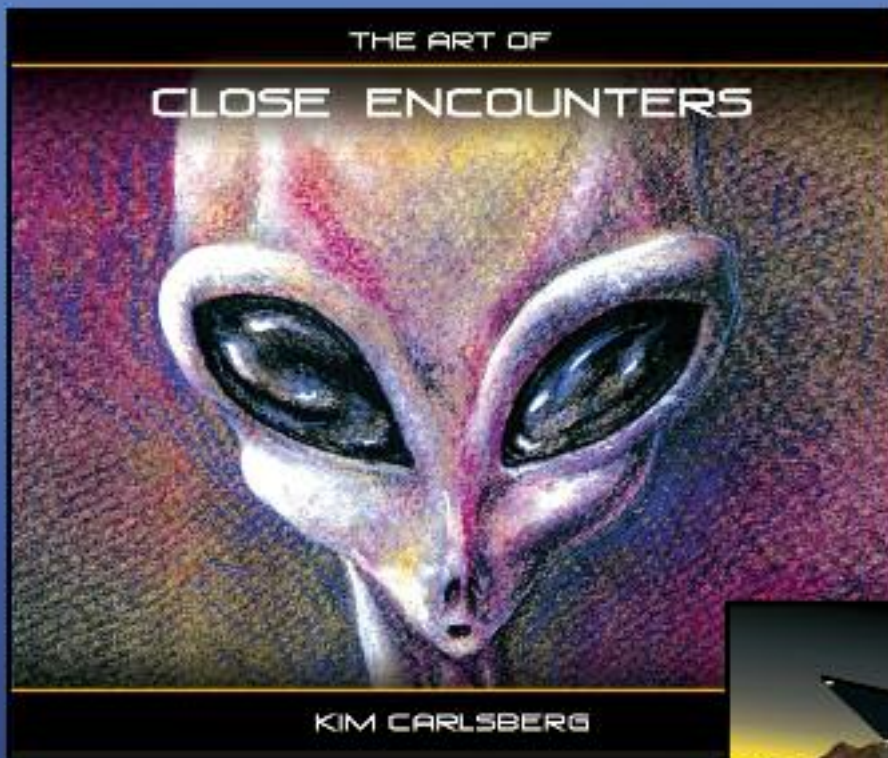

Thoughts on the Past Two Decades

Let us go back to the aforementioned Glastonbury Symposium for a moment. What this report makes clear is that while the circle phenomenon itself has spun into ever more detailed and complex permutations in the fields, some things have stayed the same: the debates, the confusion and the delusions and delights in the minds of those pulled in like moths continue on. But in considering the anniversary celebrations and looking back on the evolution of the Symposium (which, it must be declared here, on a personal level has been an important part of my life for many years), something new *has* emerged in both a significant proportion of its long-time attendees and in the shape of its annual program: an awareness of the need for self-responsibility.

It is fascinating to note that in the early 1990s, at any croppie gathering, there was a tangible and widespread belief from many *aficionados* that what we were being offered in crop circles was a salvation of some kind. To them it was a clear sign that something was coming to *rescue* us: instant enlightenment being offered to a delinquent planet from a benevolent outside force. The glyphs were working subliminally in the backs of our minds, it was thought, triggering processes that would lift us from three-dimensional mundanity to eventually blossom as a new state of consciousness. A cosmic parental authority was here to pull us out of the mire, and all we had to do was wait for the final landing or extra-dimensional revelation and gaze in wonder.

There may be elements of truth in this scenario, of course. Yet something *has* definitely changed around the wide acceptance of some of the lazier presumptions. Looking around the faces in the 2010 Symposium auditorium and hearing the very different tone of the speakers to what was being routinely offered circa 1992, it seems that a fresh realisation has clearly dawned: that if a message of hope gleaned from inspiration in the fields is to become something real, then we are all ourselves going to have to get up and do something directly about uncomfortable situations in the world. Waiting to be saved is no longer enough.

Continued on page 83

A remarkable achievement!

THE ART OF CLOSE ENCOUNTERS - HAS ARRIVED

After a 1988 close encounter in Malibu, California, Kim Carlsberg found herself in a shocking and inexplicable relationship with non-human entities. Carlsberg's journals became *Beyond My Wildest Dreams*, a book which still stands unique in the literature of alien abduction. The private response to her writings was intense in nature and vivid in detail.

Carlsberg's inspired invitation to participate in an encounter anthology gave others the opportunity to share their experiences. The result is a new milestone in the discourse of contact: *The Art of Close Encounters*.

The book is being printed. Order now online, or at the address below and be assured an autographed copy prior to Dec. 1st. Checks payable to: Close Encounters Publishing 567 W. Channel Islands Blvd. #696 Port Hueneme, CA 93041. Call 805.815.8989 for shipping info.

Non-autographed copies are available directly from NEXUS at \$55.00 each including GST and postage: NEXUS Magazine, PO Box 30, Mapleton Qld 4560. Tel: 07 5442 9280 * Great Christmas gift idea!

The Bion Ring

Electro-magnetic Protection

- The Bion Ring, based on the design of an ancient ring discovered in the Valley of the Kings in Egypt in 1860
- thought to have originated in Atlantis
- utilizes geometric forms placed and balanced to a lost system of ancient knowledge.
- The Bion Ring tunes the wearer's subtle energy fields creating a powerful barrier against electro-magnetic, psychic and other stressors

Original ring

-a copy of the original ring was worn by Howard Carter during his excavations of King Tut's tomb

Bion ring design voted most potent human energy assist by one of Europe's leading health/consciousness magazines

recommended by health professionals

Kinesiology, EAV, pulse diagnosis, iridology and now new remarkable daylight photography confirm the Bion technologies to be potent bio-resonance tools promoting rapid healing, and consciousness activation/protection

THE BION RING: REDUCED STRESS, RAPID HEALING, EMOTIONAL BALANCE, ENHANCED MIND FUNCTION AND JOY OF LIFE!

The Bion Pendant

The Bion pendant provides additional protection and can be worn on its own or with the Bion ring for maximum effect, as well as for amplifying the properties of healing gems set within it.

Life Force Muscle Energy Technology

Bion ring in pure silver: \$175
 Bion pendant (22ct gold/pure silver): \$350

THE PROPHECIES OF BENJAMIN SOLARI PARRAVICINI

Benjamín Solari Parravicini, born in Buenos Aires, Argentina, on 8 August 1898, was an artist specialising in plastics. He was a professor at the Liceo de España, manager of the Department of Arts at the Banco Municipal of Buenos Aires, Director of the Exhibition Gallery of the Municipality of Buenos Aires and in 1948 was Secretary of the Association for the Development of Arts. In his time, Parravicini promoted several arts-related projects in Buenos Aires.

It was in the 1930s when Benjamín, also known in his family circle as "Pelón", started to show his extraordinary capabilities. His hands, without any apparent control from him, drew and wrote things that even with the passing of the years would not make sense for him. He had begun to receive his first psychographies.

His most active period was between 1936 and 1940, although his ability stayed with him for life. He

produced more than 700 psychographies composed of a drawing (in most cases) accompanied by a short message as an explanation, and so far most of them have stood out because of their high accuracy.

The prophecies cover the entire fields of human activity—political, social, cultural, spiritual, metaphysical, scientific and technological—and were advanced by this notable clairvoyant, unfairly forgotten in his own country and scarcely known in the rest of the world.

One of the most enigmatic aspects in the life of Pelón was his contact with extraterrestrial beings. Many of his prophecies refer to contact with these ET beings whom he called "astronauts" (*astronavegos*), the "Blue Beings" from the planet Ki-enki, who had already been to the Earth thousands of years ago and will be back "in their enormous fish-shaped red ships".

Because of space constraints, we have omitted many other prophecies of the natural order such as

catastrophes, earthquakes, seaquakes, polar caps thawing, volcanic eruptions, changes in the Earth's rotational axis, floods, etc.

Although many of Parravicini's prophecies concern political order, his vision of the third millennium is encouraging—following the "Great Purification" that humanity will start to suffer at the beginning of the 21st century. The third millennium is about to arrive, he wrote in 1972, and with it the rebirth of the Truth that was.

Shortly before his death in 1974, Benjamín Parravicini handed down to Norberto Pakula, one of his collaborators and friends, his last psychographies, most of them corresponding to 1972 and aimed at the future generations, some of which are shown in this work. The psychographies were published in 1988 in the book *The Prophetic Testament of Benjamín Solari Parravicini*.

(Source: Edited from a posting by Tomás Latino, Grupo Sol, Santa Fe, Argentina, January 2002, <http://tinyurl.com/6rg92>; additional details from Wikipedia)

THE TWILIGHT ZONE

Some of the following messages have been slightly edited from Tomás Latino's Spanish translations for publication here. Many of the translations are unclear in English, but most of the messages are cryptic in any case. Editor.

"The big firefish-shaped starships from the Ki-en-ki will travel to the Earth in a high mission for assistance. They will travel over their already familiar South Pole. They will dwell in the ice until the hour of the hour. Then they will be." (1960)

"Interplanetary ships, invisible to the human eye, are coming right now to the Earth. These beings, invisible to the human eye, have always coexisted on our planet, and they dwell in temples and convents because they are mystics and they try to impose the faith." (1939)

"The atom will arrive, and it will reign." (1938)

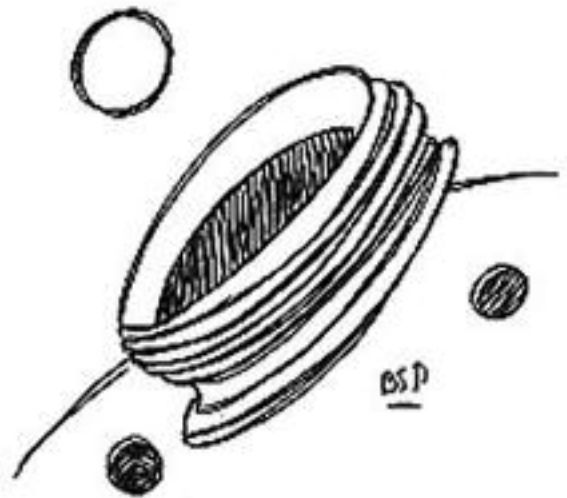

"The amphibious inter-planetary ship will prove the existence of habitable channels inside the Earth. It will submerge in the South Pole and will reappear in the North Pole, just soon afterwards!" (1960)

"In the presence of the constant visits of the extraterrestrial navigators, science will deny; after that, it will doubt; and at last it will say...true it is! And our wisdom has fallen behind. They have been looking at and looking after us for centuries!" (1940)

"The atomic era is near. Russia already plays with it without knowing. After the wars will arrive and will make war, and the war of the wars. Fire of fires will be!" (1937)

"The atom will go so far as to tyrannise the world. The world will be atomised and will go blind. It will fall storms caused by the incursions of man in the atmosphere, new diseases, sex changes, collective madness, general absurdity. The world will go dark." (1934)

"Power duel between Yankees and Russians. Duel for space and terrain conquest. Although it doesn't seem, America will ascend the throne." (1941)

"The moon crater of the seven circular stairs will disclose its secret to the man." (no date)

"Goodness will disappear from the world. Theft and crime will seize the environment. The creatures' chastity will be corrupted by the bad example of denaturalised homes. Weddings will be reduced; even so, the lovers will be admired. Man will always let himself be seduced. They (women) will be the seductive." (1934)

"The papacy will have new rules. What was bad yesterday will be no longer. It will be Protestant in itself, without being. The Protestants will be Catholics, without being. The Pope will go on journeys far from the Vatican, and will arrive in America. Meanwhile, humanity will fall down." (1938)

"The beginning of the end will soon arrive! Man will annihilate his own being. Biology will exclaim that it has discovered how to create life without the necessity of the male being, but with the use of glycerin taken out of the cells. He will start to make beings without a future, but with lives of unknown ways.

"Arriving in that time will be the atomic explosions, and they will cause the destruction of every being; the radiation will kill, and will cause

monsters to be born from every mother, whether animal or vegetable; the mineral will disintegrate. From '66, man will be born with his bones crystallised because of the presence of strontium, and the strontium will cause disaster in his life, will annihilate his brain, will change his genetic sperm, will kill his red corpuscles, will increase the cancerology up to the extreme level that will be a general cancer. The nucleonic power will dominate, and the yellows with the Russians will question power profits in that sense. The 666 will already have arrived with its hands full of nuclear power of mysterious and paralysing beams. With new microbes from electronic centrifuges in artificial comets..." (1936)

"Races which hate each other will join together. The Earth will go into war. India, China, Japan, Russia. Africa will give the world an example. America will be witness, help, palliative and light. North America will be despised. Even so, the world in the moment of the afflictions will cry out for it—but it had suffered and will be no longer." (1937)

"Circles of lights will appear flying high, bringing alien beings from other planets. Yes, they were who came to settle the Earth, it will be said, and it will be well said. Yes, those who were called angels in the Old Testament, or the voice of Jehovah, they will be and they will be seen again, and they will be seen and heard." (1938)

"The seas will be invaded by beings from other worlds who will arrive in their amphibious ships. They will take seaweeds from the Earth to Ganymede and Europa, its twin; there, they are necessary as food. There are no great seas there. They will arrive." (1938)

"Darwin's theory will be no longer, because it will be known that man descended from the planets." (no date)

The following texts from psychographies are without available images:

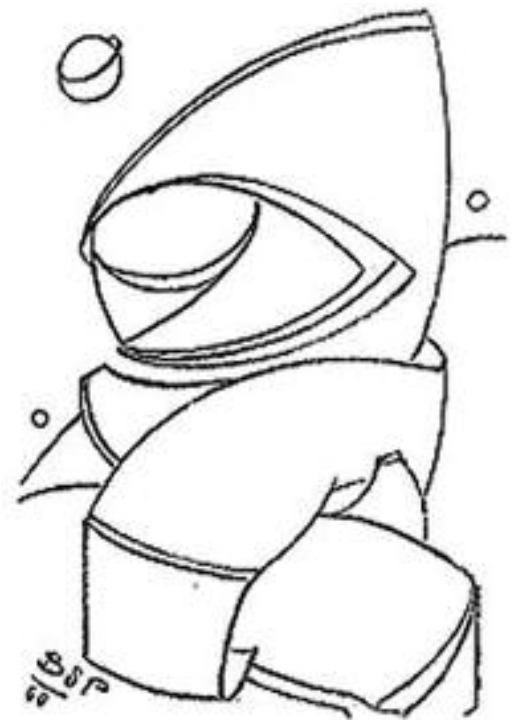

"Man gets ready to visit nearby planets. He is already the owner of still non-defined ships, even in projects. He will arrive, yes, but he will arrive without arriving. He will see without seeing. He will tell without telling. He will return without returning. He will be and will not be, because still...it is not time." (1960)

"Men will arrive at the Moon. They will be there without being. They will see without seeing. They will hear without hearing. They will return without returning. Take care!" (1940)

"The terraqueous astronaut will find a being who without being will be, and even so he will receive help from the being. The terraqueous astronaut will mistake paths and he will come back to the Earth without the mission, but with a new mission. The Cosmos will speak! After the great proof!" (1967)

"The theatre will be distheatre; it will be psychic, material, irreverent, dirty. The naked will be imposed, the sexual aberration, homosexuality, lesbianism and drugged in crimes. The crowd will applaud, corrupted without knowing." (1939)

"Human cosmonauts who stayed away above will give the guideline of a 'certain invisible hand', ruler of the astral universe." (1969)

"The earthly civilisation has a lost civilisation. It was higher than the following. Man of that time was 'adaptable' to the intense Earth heat as well as to the hard cold of his origin. He was electromagnetic; he knew how to follow the high mathematics and astral sciences. This man still dwells on icy Pluto, since as it was said 'he is adaptable!'." (1960)

"The terraqueous navigator will suffer nervous and intestinal disorders after space flights. The genetics will suffer alterations in order to fertilise. Gigantism will be one of them; mind darkness will be another." (1960)

"In the end of the proof. The terraqueous navigator will fly to the Moon. He will carry easy arguments for observation, but even so he will forget the dawn roosters for the lunar awakening. They will be asleep without any remedy, and they will dream at times." (1967)

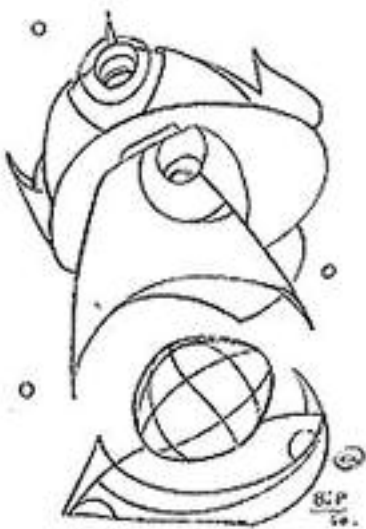

"The wise men in Russia learned to construct astral ships." (1938)

THE TWILIGHT ZONE

"The world will be denaturalised by the power of the domestic screen. All the bad influence will be rudely spread over every home and will be imposed by the advertiser commerce which aims at the crowd. The crowd will become dull, dominated by the disguised orders of easy and better paradises; they will contemplate stupidity and immorality with enjoyment. It will come the day when the bulk crowd will be manipulated like a flock of sheep." (1938)

"Enigmatic religions and lodges, impossible of being, will appear with exotic theories. False holy men will speak about new heaven and new rules to save the soul. They will struggle for the inexistence of good and evil." (1940)

"In the end of time, atheism will impose on man in his material triumph. Good will be moved away. Leisure will run with man. Man will run with crime. Crime will run with the lie, and the lie will carry the war of the nations. Then, the atheist smoke will be plunged into the smoke of the dark darkness and will roll down to the end of the... Without end!" (1960)

"Interplanetary ships come to the Earth in PAX." (year 1960)

"Man always had his price, and he hid that price. In the new consciousness, when man will arrive, he will proclaim his price and he will be bought like shoes or shirts." (1939)

"You ponder what passes... It will be the theft a natural habit in the world and the swindle will be a natural habit. The assault to the neighbour will be a means of life and political sustenance and political assault and...even death!" (1937)

"A country's unfolding. The world will suffer thefts and assaults from organised gangs coming from one country, and they will live on the millions collected from their crimes." (1938)

"Humanity will be embraced by violence. Two brothers will not live together in a room. Not even two friends. Men will kill their wives. Women will kill their husbands and sons, and sons will kill their parents." (1937)

"Invisible war! Without world war being declared, the world will live it without seeing it, and it will become accustomed to it. Labyrinth of habits will blind the world until the big thunder." (1939)

"Extraterrestrial beings watch the manned spires that humans will send into sidereal voyage, and they will kidnap them and frighten them. They, on their return...will keep silent!" (1960)

"Extraterrestrial laboratory satellite, where works for humanity are in progress. Harmful cultures from the Earth are being developed in order to find the way to exterminate them. There is a search for the way to finish off the diseases that ravage, to clean up the toxins that inhabit our atmosphere and the waters. Different kinds of artificial blood and different aids are being produced to help after...the final chaos!" (1940)

"Extraterrestrial women will arrive in the world to be inseminated and they will go back. Men will be kidnapped to be inseminated and they won't come back." (1960)

"Interplanetary navigators, messengers of God, angels yesterday, will arrive in the world, every time in bigger numbers. They will show themselves in different ways with the intention to warn the unconscious man about the danger of the atom. Older and superior civilisations than the actual disappeared as victims of the same power. It will be known!" (1959)

"The interplanetary navigators, invisible to the human eye, messengers of God, will arrive, more and more every time, to avoid the atomic explosion. They will try to impose brotherhood and love for neighbour, and they will even infiltrate mystic meditation and withdrawal from evil among disoriented youth." (1939) ∞

The Truth About Money, Debt, Income Tax, Licenses, Fines And More... That Can Finally Set You Free!

What if income tax was **voluntary**?

Could it be possible that the RBA was **privately owned**?

Do you think banks could **mint money** from **your signature**?

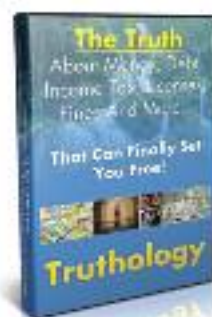

Can you be free from the debt trap without using your **hard earned after tax cash**?

ATLAS RECONNECT

HERE'S A REMARKABLE FACT.

Around 99% of people carry an injury they know nothing about. Something they may well have endured all their lives. Yet it can cause a long list of ailments from poor posture to migraines; depression to digestive problems. We're talking about the misalignment of the Atlas vertebra, the top bone of the spine.

What difference will it make? Think of it as a kink in a hosepipe that is instantly straightened. Suddenly everything flows.

When the head, neck, and spine are in alignment, the trillions of neural pathways that pass from the brain into the body have clear passage. This allows free communication between body and brain. The results can be startlingly wonderful. That's why we invite you to see what we can do for you.

Once your Atlas is in place, your healing processes will start. It's not unknown for our clients to feel a sudden rush of euphoria as long forgotten neural pathways reconnect.

THE ATLAS RECONNECT TEAM CAN HELP YOU TACKLE AN ARRAY OF MEDICAL CONDITIONS. THESE INCLUDE:

- Back problems • A stiff neck
- Migraines and headaches
- Anxiety and depression
- Blood pressure – hypertension • Displaced pelvis • Knee pain, Frozen shoulders, Whiplash
- Muscle contractions
- Chronic fatigue
- Balance problem
- Tinnitus, Slipped disc
- Scoliosis • Shoulder pain
- Trapped nerves.

Reviewed by Ruth Parnell

TWILIGHT OF THE GODS

by Erich von Däniken

New Page Books, NJ, USA, 2010

ISBN 978-1-60163-141-1 (222pp tpb)

Available: www.newpagebooks.com

In his 24th work of non-fiction since the release of his best-selling 1968 book *Chariots of the Gods?*, Erich von Däniken focuses on ruins in the Bolivian Andes, 4,000 metres above sea level: the ancient stone cities Tiwanaku and the nearby, better preserved, Puma Punku.

With reference to late 19th to early 20th century findings (including those of engineer Arthur Posnansky), most of which were pilloried in their day, von Däniken contends that the original Stone Age inhabitants of the region did not have the technological means to extract and tool gigantic stones made of hard igneous diorite. These monolithic structures could only have been created by visiting extraterrestrials ("the gods") (as von Däniken has claimed over the years) way back in antiquity, if the elaborate calendars that arguably track back 17,000 years are any guide. The ancient astronauts are returning to complete their missions and retrieve

artefacts, von Däniken reckons, and he interprets one of the Mayan calendars as saying that December 2012 is the expected arrival date.

With side trips into astrophysics, anthropology as well as genes and memes, von Däniken concludes that we're soon in for "a 'god shock' of major proportions". Time will tell!

LOST KNOWLEDGE OF THE ANCIENTS

edited by Glenn Kreisberg

Bear & Company, USA, 2010

ISBN 978-1-59143-117-6 (241pp tpb)

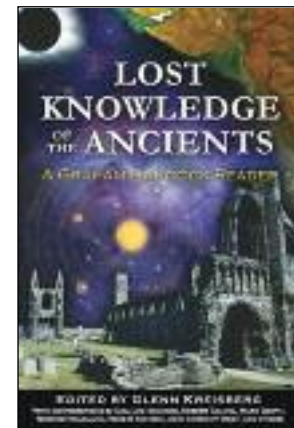

Available: BearandCompanyBooks.com

This collection of essays reflects the paradigm shifts that have been taking place in science and academia for some years now. The essays have been selected by Graham Hancock (*Fingerprints of the Gods*; see 3/04) and edited by engineer and antiquities researcher Glenn Kreisberg, who edits the Author of the Month page at GrahamHancock.com.

Kreisberg provides a thought-provoking introduction on the search for the lost knowledge, and also contributes an essay on electro-magnetism and the ancients. Hancock himself examines new findings about the first Americans, and another dozen contributors are represented. Among the offerings are

musings on paranormal phenomena by geologist Dr Robert Schoch, reflections on the Egypt Code by Robert Bauval, a challenge to the editors of the journal *Archaeology* by Egyptology researcher John Anthony West, and thoughts on the possibility that cosmic rays have affected human evolution by Andrew Collins. Other contributors include Edward Malkowski, Mark Booth, Richard Hoagland, Walter Cruttenden, Scott Creighton, Badrinaryan Badrinaryan, Gary David and Flavio Barbiero.

Altogether, the reflections of these frontier investigators provide a big-picture perspective on the cycle of human existence which challenges orthodox knowledge. If you've not read their works before, this anthology is an ideal place to start.

NEVDON™ Suppliers of Genopathic™ Remedies
Registered member of New Zealand Charter of Health Practitioners

**Need balance within your body and life?
Feeling tired, sore, or have a dis-ease within yourself?**

Genopathic™ remedies can help in the prevention and relief of dis-eases.
Check out our current specials online today.

Genopathic™ remedies are natural products used externally (topically) in a non-intrusive way. They are without alcohol, chemical, synthetic, filler, preservative or animal content. Genopathic™ remedies are formulated to target and change the bodies' electromagnetic frequencies within the blood and nervous system. There are no actual herb or oil traces in the finished product. Every remedy has its own frequency imprint combination within an aqua carrier.

MASS CONTACTS

by **Stefano Breccia**

Author House, UK, 2009

ISBN 978-1-4389-0678-2 (383pp tpb)

Available: www.authorhouse.co.uk

UFO contact has been ongoing for decades in Italy and parts of Europe, yet we hear little about it in the English-speaking world.

Australian researcher Warren Aston drew attention to the extraordinary Italian contacts—*Amicizia*—last edition (17/05), as well as to Stefano Breccia's book *Mass Contacts*.

Breccia, an engineer and a UFO researcher, was entrusted by Bruno Sammaciccia, a key contactee with the Akrij or W56, with his story, and consequently by a German engineer, Hans, with his reminiscences. Many pillars of society—professors, doctors, judges, politicians—had interactions with these advanced alien beings from the mid-1950s onwards. The key component of this contact was friendship, and there were spiritual teachings as well as demonstrations of advanced sci-tech capabilities, e.g., teleportation of objects. Another alien group declared war on the W56, and press reports from late 1978, for example, suggest that there really *were* battles beneath the Adriatic Sea.

Breccia covers other multinational

contact events such as the Ummo Affair, including the Italian Ummites, and discussion of social interaction, astrophysical calculations and technical drawings of UFOs. While by no means definitive, his book takes UFO researchers into new territory.

BEYOND THE HEAVENS

by **Maurizio Cavallo (Jhlos)**

Author House, USA, and Verdechiaro

Edizioni, Italy, 2008

ISBN 978-1-4343-7665-7 (137pp tpb)

Available: www.authorhouse.com;

verdechiaro.com; www.centroclarion.it

It wasn't until 1981, when he was abducted by visiting ETs from the planet Clarion 150,000 light years from Earth, that Maurizio Cavallo realised he'd been a contactee in 1959 as a seven-year-old but had erased all memory of the event. His contacts with these ETs continue to this day, but over the years they've caused him great physical, emotional and psychic torment.

Beyond the Heavens is largely a record of a descent into despair, and yet Cavallo has learned incredible information from these very human-looking aliens (some amazing photos are included); for example, on the origin of the Universe (the Clarions don't give much credence to the Big Bang theory), on humanity's genetic

history, and on advanced science and technology. The Clarions told him they use holographic transmitters to cast geometric figures on the fields via plasma vortexes which make the ground resonate; these are archetypal pictures of single genes. Another theory for the origin of crop circles!

In the mid-1980s, Cavallo discovered his extraordinary talent as a visionary painter and sculptor, writer and musician. Based in Vercelli, Italy, he is also a journalist, university lecturer, speaker and the founder of a research centre (see www.centroclarion.it).

Through Cavallo, the Clarions convey messages of personal empowerment and vibration-raising as our planet is on the verge of possibly cataclysmic changes.

HAVE YOU GOT THE GUTS TO BE REALLY HEALTHY?

by Don Chisholm

Book Pal, Australia, 2010

ISBN 978-1-921681-56-1 (210pp tpb)

Available: nuferm.com/prodbookguts

We are not what we eat but what we absorb, says Don Chisholm, who has travelled the world in search of answers as to why we're not as healthy as we could be. We need to be critical about dietary information, he says, and here he counters 15 health myths on subjects including milk, sugar, coffee, saturated fats and sun exposure. His arguments are cogent and well-sourced.

Next, he looks at water as a healing agent and at probiotics, which keep the internal ecosystem thriving. Adopting nutritious diets, drinking adequate amounts of water and minimising stress are key ways to achieve the goal of real health.

Chisholm also examines what we can learn about our bodies from visual medicine, e.g., iridology, live blood microscopy and thermal imaging.

Having been "to Hell and back", Chisholm has advice on how to identify patterns that lead to illness and how to overcome them. Being healthy is really not so far out of reach, he says, and he encourages us to have the guts to do what it takes.

HEALTHY SUN

by Casey Adams, PhD

Sacred Earth Publishing, Wilmington, Delaware, USA, 2009

ISBN 978-0-9816045-8-9 (251pp tpb)

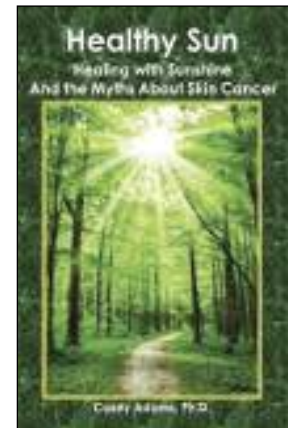

Available: www.realnaturalhealth.com; www.amazon.com/dp/0981604587/

The doomsayers would have us believe that sunlight is dangerous for us, but that's far from the truth. In fact, it's essential for good health. In this comprehensive study, naturalist and health educator Casey Adams, PhD, revisits the central importance that the Sun held for ancient peoples all over the world. Not only did it provide a template for marking the seasons, it also was central to the oldest form of medicine. The ancient Greeks and Romans, for example, used Sun cures to treat infectious diseases like TB.

With reference to a multitude of research studies, Dr Adams explains how solar rhythms, magnetism, light waves and coloured frequencies influence our hormonal and rhythmic cycles. He provides strategies on how we can realign and re-entrain our daily and seasonal rhythms. He also suggests how we can overcome today's synthetic version of the Sun—electromagnetically driven lights and appliances—and strengthen the body's internal

metabolism and its resonance with nature. The advice can be as simple as gazing at the Sun at sunrise and sunset or eating foods of certain colours. Citing many scientific studies, Dr Adams disputes the notion that Sun exposure causes skin cancer and highlights findings that increased vitamin D intake from sunbathing reduces cancer incidence. He analyses the evidence for chemical-laden sunscreens being responsible for increased cancer cell proliferation, and recommends healthy sunbathing strategies without creams and lotions that can become oxidised by the Sun's rays, creating dangerous free radicals.

Healthy Sun is a refreshing take on how we can utilise precious sunlight with care, respect and wisdom.

Did You Know?

Everybody worldwide is infected by at least 12 of over 100 parasites, bacteria, fungi and viruses that can infect humans.

Get rid of them with the ZA-PET™

Our Bioelectronic therapy is based originally on Dr Hulda Regahr Clark's research. She claimed that specific bodily parasites and viruses, often combined with certain toxins may be responsible for a wide range of common diseases. Her protocol of dealing with disease was confirmed at the Albert Einstein College of Medicine by scientists in 1990 resulting in a patent (U.S.#5,186738).

A follow up clinical trial by Prof Henry Lai at the University of Washington confirmed that the zipper selectively kills Cancer cells. (research article at www.drclark.net)

WORLD GNOSIS

by Mark Amaru Pinkham

AUP, Kempton, IL, USA, 2010

ISBN 978-1-935487-08-1 (408pp tpb)

Avail: adventuresunlimitedpress.com

The essential principle of gnosis is "know thyself", but it's always been a dangerous idea to adherents of the patriarchal Right Hand Path. Here, Mark Amaru Pinkham traces the origin of the Left Hand Path of gnosticism from Adam and Eve in the Garden of Eden (in Sri Lanka) to the dispersal via the children of Seth and Sophia, the Johannite gnostics and then the Templars and secret societies such as the Rosicrucians.

Pinkham (*Guardians of the Holy Grail*, 11/06) also enlightens us on ET missionaries from Sirius, the Pleiades and Orion, on previous gnostic civilisations such as Lemuria and Shambhala, and on gnostic streams nurtured by the Druids, the Yezidi of Iraq, the Cathars and other sects.

The time is coming, he says, for the Right and Left paths to be reconciled in a new Third Era of a World Gnostic Civilisation. Key to this unification is the establishment of the gnostic alchemical path, where institutions and society encourage individuals to complete the spiritual evolution that is their birthright. Pinkham gives practical tips on practices such as yoga, meditation and correct eating and living that can assist in self-knowledge and transcendence.

This is a powerful book that gets us in touch with the omnipresent Spirit.

APPROACHING CHAOS

by Lucy Wyatt

O Books, Ropley, UK, 2010

ISBN 978-1-84694-255-6 (340pp tpb)

Available: www.o-books.net

As our modern civilisation approaches a tipping point, we'd be well advised to look to our ancient past for lessons on how to survive the coming climatic, ecological and economic crises. In this intriguing and well-researched work, Lucy Wyatt (who lives on an eco-farm in Suffolk, England) examines how civilisation got started in the first place and how it was re-established following a series of natural catastrophes. One such event, c. 3195 BC, may have involved a comet strike that caused the Earth's axis to wobble and resulted in a Great Flood, which then led to a diaspora and the re-seeding of civilisation in new locations.

Back in these ancient times, people had a more unified physical and metaphysical awareness, Wyatt says, and their priests and rulers utilised a knowledge of spiritual alchemy drawn from earlier shamanic practices. They built mounds and pyramids to tap into the Earth's resonance for ritual and even practical purposes such as electricity provision. The ancient Egyptians, Wyatt concludes, discovered ultrasound and how to use it to fashion and raise stone blocks. Possibly at the juncture between the Bronze and Iron ages, this knowledge was lost and civilisation took a backwards step. Tribal wars, culminating in the era of the Roman Empire, ruled the times and monotheistic religion eventually won out. However, various gnostic sects and later the Knights Templar tried to recover and protect the spiritual alchemical formula.

Wyatt suggests that in order to rediscover the ancient science and survive into the future, we need to apply quantum mechanics principles, create a world that's in harmony with nature and adopt Hermetic wisdom based on the idea of unification. We can bring in a new age if we so wish.

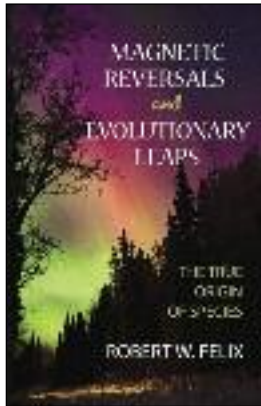

REVIEWS

MAGNETIC REVERSALS AND EVOLUTIONARY LEAPS

by Robert W. Felix

Sugarhouse Publishing, USA, 2009
ISBN 978-0-9648746-7-1 (190pp tpb)
Available: www.iceagenow.com

Carbon falls from the sky, the result of interaction between the Earth's magnetic field and the solar wind. But so do radiogenic elements such as iridium and strontium, and even oil and bitumen. These elemental rains are most prolific during magnetic field reversals which happen about every 11,500 years, or half a precessional cycle. Robert Felix (*Not by Fire but by Ice*, 7/02) has analysed the best evidence from a range of fields to conclude that ice ages, extinction events and creation bursts coincide with, if not are *caused* by, magnetic field reversals—and not just of the Earth, but of the Sun.

Felix also cites evidence for major electromagnetic disruptions that have hit the planet with the force of hundreds of thousands of Tunguska blasts, in line with the Electric Universe theory. Not all planetary magnetic reversals are that drastic: the intensity may depend on where the Earth is in its orbit, and on the Sun's position in its galactic orbit.

Evolution is not orderly, says Felix, but takes giant leaps when radiation kick-starts mutations in surviving species and sparks new life-forms into existence. The next reversal could be imminent, considering that the rate of decline of the Earth's geomagnetic field strength is

speeding up. Felix's book is crucial in providing missing links in our understanding of natural cycles. Read it before it's too late!

ANCIENT EGYPT 39,000 BCE

by Edward F. Malkowski

Bear & Company, USA, 2010
ISBN 978-1-59143-109-1 (299pp tpb)
Available: BearandCompanyBooks.com

Highly sophisticated technology beyond mere copper and stone tools was used to craft the Giza monuments and tunnels as well as the temples along the Nile's west bank, yet no evidence of it has been found. That absence of evidence is telling, says researcher Edward Malkowski (*Before the Pharaohs*; 13/06). The hardest of stones, granite, was used for the monuments because it would endure for the longest time. But what if those high-tech tools had perished ages ago, having already created their masterpieces?

The advanced culture possessing these tools could have existed as much as 40,000 years ago, but was buffeted by cataclysms including those that coincided with the end of the last ice age and caused dramatic climate changes. Malkowski refers to the Geminga supernova event of 41,000 BCE that affected Earth for the next 30,000 years, and a galactic centre explosion, as proposed by Dr Paul LaViolette, that began c. 16,150 years ago and took thousands of years to play out, as recalled in the so-called Turin Papyrus. The survivors in Egypt regrouped as the Shemsu-Hor, the followers of Horus, carrying on something of their heritage but not the technology.

The Giza pyramids and the Nile temples existed before these events, Malkowski says, and the predynastic and dynastic Egyptian cultures were built up around this much more ancient culture. Other Nile pyramids were a poor attempt to emulate the majestic heights of a long-lost age—that of Civilisation X, as Malkowski refers to it in his controversial book.

What is memon®?

memon® is a revolutionary range of energetic transformers

which act to restore your environment to its natural state, free from man-made stressors. memon® was invented over 20 years ago in Germany and is distributed throughout Europe, the USA and now Australia.

How it works?

All memon® transformers work on the same basic principle of generating a counter acting wave to neutralize the environmental impacts from EMF, RF or geopathic sources.

Products for all applications: There are a range of memon® products for; mobile phones and laptops, vehicles, trucks and boats, drinking water, pools and spas. The four system combi transformer acts to harmonize the effects of EMF, RF and geopathic stresses, as well as generate negative ions for home and office environments.

Independent testing: memon® technology has been independently tested by research laboratories and government agencies across Europe and America. **ALL tests have shown dramatic environmental improvements.**

More information:

- For your complimentary memon® revolution DVD
- A compilation disk of case studies, test results and testimonials
- To arrange a no obligation inspection at your home or office, or
- Details on becoming a memon® Distributor in your area.

THE CROSS OF BETHLEHEM

by **Ro'i Tov**

Ro'i Tov, 2009 (www.roytov.com)
ISBN 978-1-4392-5770-8 (336pp tpb)
Avail: Amazon.com; booksurge.com

Ro'i Tov, a Christian-Israeli refugee and an anti-Zionist, is seeking resettlement under the 1967 Geneva Protocol in a nation with no diplomatic ties with Israel. His book is a gripping read, but is hard to obtain: certain vested interests are attempting to see to this.

Tov charts an extraordinary journey of isolation on a kibbutz, awakening to Christianity, being conscripted into the Israeli Defence Force (becoming a lieutenant), having a career in science and business, and attracting the undue attention of Israel's secret services.

His sense of moral outrage over Israeli intransigence towards the Palestinians has made him an enemy of the state. It didn't help that he wouldn't cooperate in illegal military technology transfers to Israel, or that he let it slip to a Mossad agent—the son of the Jewish terrorist who blew up the King David Hotel in Jerusalem in 1946—that he intended writing a book to expose Israel's lies.

Following attempts on his life, in 2002 Tov left Israel and became a stateless refugee, travelling through Southeast Asia, the USA and South America with the Mossad and CIA in pursuit. His intelligence and wisdom shine through in his dramatic real-life story that aims to have freedom, justice and peace come to the fore.

THE ENERGY SOLUTION REVOLUTION

by **Brian O'Leary, PhD**

Bridger House USA, 2009 (2ed)
ISBN 978-0-9799176-4-6 (270pp tpb)
Avail: www.brianoleary.info/TheEnergySolutionRevolution.html

We could be living in a world of clean, free energy, but it will take radical social, political and economic change to achieve this, says scientist-philosopher and former NASA *Apollo* astronaut Dr Brian O'Leary. His new book includes extracts from his previous essays and books on our energy future as well as engaging new material. For starters, he outlines decades of suppression in free energy research, where proof of concept has been shown but so many scientists/engineers/tinkerers have been forced to stop their work, have been denigrated, ostracised, bought out and even assassinated on orders from "the powers that be", intent on retaining the dirty energy paradigm.

Next, Dr O'Leary examines what the new energy revolution can offer, even at the local level, in the face of our climate crisis and our dependence on hydrocarbons. These unconventional energy options may include cold fusion, vacuum or zero-point energy, advanced hydrogen chemistries and thermal extraction—and could be added to existing renewable energy choices such as solar electric and tidal power. Transformation of our energy culture to one based on new energy is essential for our survival, he urges, and it's imperative that society become informed enough to want to implement R&D programs urgently. This is a wake-up call to scientists, environmentalists and politicians.

Finally, Dr O'Leary confronts the tyranny that would keep us enslaved in capitalistic self-interest, wars, ecocide and dirty energy—a tyranny that has stepped up a few notches over the past few years. A peaceful transformation with a clean energy solution is what we need to restore sustainability and sensibility, he says in his pressing call to action.

REVIEWS

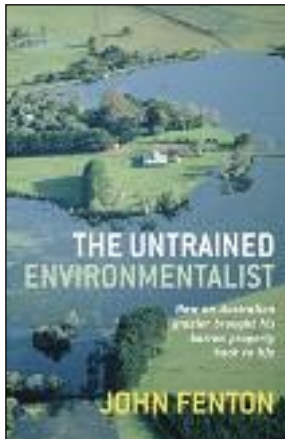

THE UNTRAINED ENVIRONMENTALIST

by John Fenton

Allen & Unwin, Australia, 2010

ISBN 978-1-74237-019-4 (320pp tpb)

Available: www.allenandunwin.com

In 1957, at twenty-one, John Fenton took over his family's degraded grazing property in southwestern Victoria. Over the decades, John, his wife Cicely and family transformed it into a lush, productive, ecologically sustainable farm by planting trees for windbreaks and shade, creating lakes and forest stands, restoring wetlands and establishing wildlife reserves. The photographs documenting the transformation over the years show stunning comparisons.

Initially the Fentons were derided by their neighbours, but it didn't take too long for their property, "Lanark", to show positive signs of recovery. In time, the huge enterprise took its toll on John and Cicely: many times they asked if they were sacrificing their economic livelihoods for the sake of saving the environment.

John Fenton admits to being an untrained, even accidental environmentalist, but he's learned so much over the years that he's passed on to his children as well as to fellow graziers, students, agriculturalists, scientists and academics. To him, farmers are *custodians* of the land they tend, and he thinks there's a case for governments to provide incentives and funds for farmers to restore their land when costs might be prohibitive.

Fenton's experience, recounted with anecdotes and grounded, practical advice, is an inspiration for those who want to work the land in harmony with nature.

THE SELF-SUFFICIENCY BIBLE

by Simon Dawson

Watkins Publishing, London, 2010

ISBN 978-1-906787-68-4 (323pp hc)

Avail: www.watkinspublishing.co.uk

Whether you're aiming to become more self-reliant in the city or in the country, there's something here for you whatever your needs or circumstances. *The Self-Sufficiency Bible* is written by Simon Dawson, a former London real estate agent who in 2000 left the fast lane and, with his wife Debbie, bought eight hectares on Exmoor, Devon. They grow their own fruit and vegetables, raise livestock and teach courses on self-sufficiency, smallholding and basic butchery. In 2008 they received an award in a "Local Food Hero" campaign—a reward on a long learning curve.

Sure, knowing how to look after farm animals and prepare cuts of meat may not be for everyone, but the information is here, spelled out with easily understandable text and illustrations. For the green of thumb, there's advice on planning, planting and harvesting a kitchen garden or even a window box if you're a city dweller with limited space.

Simon Dawson has a down-to-Earth waste-not, want-not philosophy, so he has plenty of handy hints on recycling and harnessing renewable energy as well as on curing and preserving foods and foraging in the countryside for edible greens. There's advice on baking, brewing and dairying, natural health/beauty solutions, arty-crafty pursuits including basket-weaving and clothes-making, and creating nutritious home-cooked meals. Plus, there are tips on how to involve the kids. Simon Dawson writes with an infectious joy and passion in this practical, modern approach to self-sufficiency and sustainable living.

Compiled by Duncan Roads

THE FRIENDSHIP CASE

The extraordinary experience of alien contact in Italy in the 1960s

Available: www.mysterycollection.it

An extraordinary Italian case of alien contact with humans, kept secret for half a century, has finally come to light. In Pescara, from the mid-1950s to the late 1970s, a group of human-looking extraterrestrials made direct contact with a large number of people. The project was called "Friendship" or *Amicizia* (see article in 17/05). The people were taken onto the ETs' bases and even on board their craft. Most of the people involved belonged to Italian high society—among them, the famous Italian Consul Dr Alberto Perego. Witnesses of these incredible experiences are at last ready to go public. The exclusive footage and photos that they've collected are simply amazing.

The Friendship Case will change your mind about the interaction between humans and extraterrestrials.

SCIENCE ART FOUNDATIONS FOR HUMAN SURVIVAL

A Lecture by Robert Pope

Gaia Films © 2010

Available: Science-Art Research Centre, 90 Bonny Doon Road, Uki NSW 2484, Australia

Available: www.science-art.com.au

This forum explores the relationship between science and art, and

proposes a way forward for humanity by re-examining and upgrading our basic scientific beliefs and practices.

Professor Robert Pope, from the Science-Art Research Centre based at Uki in northern NSW, has published new fundamental physics principles based on the ancient Greek Science for Ethical Ends to balance the fundamental physics principles of Sir Isaac Newton's mechanical description of the Universe.

ONE ANSWER TO CANCER

Fair Go Productions © 2010

Available: Fair Go Productions, PO Box 1400, Mudgeeraba Qld 4213, Australia, tel (07) 5530 2939, website www.oneanswertocancermovie.com

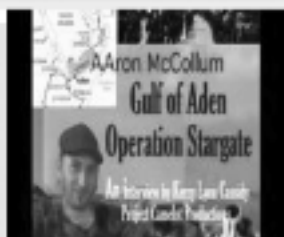

This film, *One Answer to Cancer*, is about two cancer salves. One, known as Aldara®, doesn't cure and has even killed people, yet it is still enthusiastically prescribed by doctors.

The other cancer salve—a herbal paste called Black Salve—is safe and effective and has never harmed anyone in thousands of years of use. Yet it is illegal and is suppressed by governments.

This film is packed full of amazing testimonials

from people who have reclaimed their good health. They have eliminated invasive breast cancers, deadly Ewing sarcoma, terminal thyroid cancer, bowel cancer and an array of skin cancers, even large melanomas. In their interviews, men and woman describe exactly how they used this natural salve.

This film shows you precisely how to make this life-saving salve for yourself and your loved ones.

GULF OF ADEN: OPERATION STARGATE DVD

Aaron McCollum Interview w/Project Camelot- January 2010

\$24.20 Post Paid

Breaking news, MUST see!... Aaron McCollum is a very bright straight-shooter, who is coming forward at this time to raise awareness regarding what he believes is going on in the **Gulf of Aden cover-up**.

He considers himself to be a third generation member of the **MK-Ultra Project Talent**, the same project that Duncan O'Finioan and Dave Corso were a part of. Specifically, he was involved from a young age in a top secret program called **Project Seagate**. More about this to come in a

second interview, as he will try to gather more pertinent information from other associates. He is a former leader of a special unit for the U.S Coast Guard, and is coming forward at great risk because he firmly believes the time to speak out is now.

In this revealing interview Aaron McCollum discusses: Somali pirates in the Gulf of Aden is a false flag operation for something much, much bigger going on in that area, an underwater base being used for genetic engineering, that the stargate opened up officially on January 5 2010, drug-running operations, are these ETs friendly or evil that have opened up the stargate, the Dolphin-Human alignment frequency, the possibility of Dolphin DNA being infused with Aaron's DNA, the galactic war for this prize planet, the disappearance of his contacts, and his continued heavy surveillance, I lack the emotion of fear; I am not afraid, I need to do this! **Pal HD (High Definition) 1 hr:26 mns**

*Please note, that your purchasing will help in making regular donations to **Project Camelot's** fantastic work.

MUSIC

Reviewed by Richard Giles

MUSIC OF THE HONEY GATHERERS

by Paban Das Baul

Riverboat Records/World Music Network, UK, 2010 (54mins)
Distributors: **Australia**—The Planet Company, tel (02) 9283 8250; **UK**—World Music Network, tel (0)20 7498 5252, www.worldmusic.net

Born in 1961 in West Bengal, India, Paban Das Baul is well known for the inspired lyrical beauty of his songs and his genius in improvisation on the *dubki* (a small tambourine), creating trance-like states in his listeners. There are some beautifully melancholic, enigmatic songs here. *Music of the Honey Gatherers* conjures up an intense world of song, and sensuality as wild and unpredictable as India. Paban's compositions are subversive, devotional and mystical. My favourite track is "Guru To Dayal", lasting eight minutes. Beautiful, wandering Baul songs of adventure.

INFINITE SKY

by Wendy Grace

Coorabell Music, Australia (45mins)
Distributor: **Australia**—Coorabell Music; www.wendygrace.com

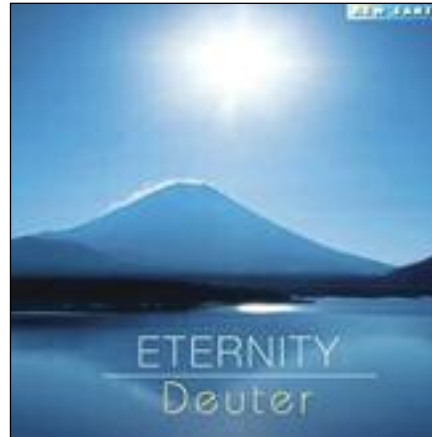

Wendy Grace is a pioneer in new Australian music and was companion to Chris James in their musical journey workshops. This CD of her original songs was recorded at the Music Farm in the hinterland of Byron Bay, NSW. It features Mary Doumany on concert harp and Riley Lee on *shakuhachi* (Japanese bamboo flute). Her style is expressive of her harmonious approach to music. Songs like "Eyes of Love", "Uluru" and "Whale Dreaming" convey her connection to nature and the involvement in the journey home that we all make to our place of love. The album is gentle and involving, inspiring you to relax and bring out your creativity. Wendy currently holds workshops on the Joy of Singing.

ETERNITY

by Deuter

New Earth Records, 2009 (74mins)
Distributors: **Australia**—Brumby Books and Music; www.newearthrecords.com

Deuter is one of the great musicians of the last 15 years in the New Age field. The flute is one of his favourite instruments, and on this album he has Chinese *erhu* and Japanese *shakuhachi* as well as cello, singing bowls, twinkling chimes, and layers of absorbing synthesised atmospherics. On each track, Deuter weaves his magic spell. "East of the Full Moon" features soft moods with the emotive beauty of the flute and smooth keyboard sounds fluttering behind. A total relaxation album.

A NEW DAY

by Laya Project

EarthSync, 2010 (2CDs, 60&66mins)
Distributors: **Australia**—The Planet Company, tel (02) 9283 8250; **India**—EarthSync, www.earthsync.com

Earthsync, based in Chennai, India, E again documents music from regions affected by the 2004 Asian tsunami in the Laya Project (see 16/03). Included here are global hits from earlier albums and remixes of classic pieces. The musicians include Bhakti Brothers, Shaman's Dream, Desert Dwellers, Bombay Dub Orchestra, MIDival PunditZ, Karsh Kale, Kaya Project, Cheb i Sabbah and more. *A New Day* is a diverse, cross-cultural mix of creative, sensitive, traditional and post-modern. A buzz-along electronica treat on two CDs.

FREE CD, valued at \$37,
and Special Report Reveal...
"How to Meditate
INSTANTLY!"

If you'd like to meditate as deeply (actually more deeply) than a Zen monk, literally at the touch of a button, this may be one of the most important messages you will ever read. Here is why...

Based in part on Nobel Prize-winning research on how "complex systems" (human beings, for instance) evolve to higher levels of functioning, a mental improvement program has been created utilising a powerful audio technology called HoloSync®.

A precise combination of audio signals gives the brain a very specific stimulus that creates states of deep meditation — and causes the creation of new *mind-enhancing* neural connections between left and right brain hemispheres.

Now a New CD and Report Reveal ...

- The scientific evidence proving how HoloSync® increases the production in the brain of many vital neuro-chemicals that can slow ageing.
- How to achieve super-deep meditation, at the touch of a button.
- How to dramatically reduce stress.
- How to create remarkable emotional changes at the deepest level.
- How to improve your emotional health.
- How to brighten your creativity and problem solving ability.
- How to have more restful sleep.
- How to boost your intelligence.
- How to increase your focus, concentration and learning ability.
- How to enhance your memory.
- How to increase your motivation and confidence.
- How to have more happiness and "flow" in your life.
- How to heal emotional blocks.

The complete report on this amazing new technology and HoloSync® CD, worth \$37, are FREE to Nexus readers for a limited time.

The Imperial Anatomy of Al-Qaeda

Continued from page 15

was originally the computer file of the thousands of mujahideen who were recruited and trained with help from the CIA to defeat the Russians".⁸⁰ Thus, "Al-Qaeda" was born as an instrument of western intelligence agencies.

This account of Al-Qaeda was further corroborated by a former French military intelligence agent, who stated that "[i]n the mid-1980s, Al Qaida was a database" and it remained as such into the 1990s. He contended that "Al Qaida was neither a terrorist group nor Osama bin Laden's personal property". He further stated: "The truth is, there is no Islamic army or terrorist group called Al Qaida. And any informed intelligence officer knows this. But there is a propaganda campaign to make the public believe in the presence of an identified entity representing the 'devil' only in order to drive the 'TV watcher' to accept a

unified international leadership for a war against terrorism. The country behind this propaganda is the US and the lobbyists for the US war on terrorism are only interested in making money."⁸¹

The creation of Al-Qaeda was thus facilitated by the CIA and allied intelligence networks, the purpose of which was to maintain this "database" of Mujahideen to be used as intelligence assets to achieve US foreign policy objectives throughout both the Cold War and into the post-Cold War era of the "new world order".

Author's Note:*

For a comprehensive analysis of the history, origins and nature of Al-Qaeda, see Peter Dale Scott's *The Road to 9/11: Wealth, Empire, and the Future of America* (University of California Press, 2007), which provided much of the research in the above article.

About the Author:

Andrew Gavin Marshall is a Research Associate with the Centre for Research on Globalization (CRG) in Montreal, Canada. He is co-editor, with Michel Chossudovsky, of the recent book *The Global Economic Crisis: The Great Depression of the XXI Century* (available at the website <http://www.Globalresearch.ca>).

His previous articles in NEXUS are "The Rise of the Global Scientific Dictatorship" (17/05), "A New World War for a New World Order" (17/02) and "The Financial New World Order" (16/04-05).

Editor's Note:

This article is edited from part one of a three-part series "The Imperial Anatomy of Al-Qaeda: The CIA's Drug-Running Terrorists and the 'Arc of Crisis'".

Hemp: Our Lifeline To The Future

Continued from page 21

About the Author:

Dr Andrew Katelaris graduated with a Bachelor of Medicine from the University of Sydney in 1985 and in 1992 was awarded a doctorate by the University of New South Wales for a research thesis in immunopathology. He has over 20 years' experience in hospital-based medicine and surgical and forensic pathology.

Dr Katelaris became involved with industrial hemp during the 1980s, with research aimed at preserving Australian natural forests. He discovered the suppressed history of industrial hemp and began to link up with hemp activists around the world. In 1988, Dr Katelaris visited Wageningen University in The Netherlands, where he learned of progress with non-wood paper production, and he also visited hemp producers in France.

On his return, he and other

activists began a campaign to establish hemp in Australia. He teamed up with documentary filmmaker Barbara Chobocky to produce *Billion Dollar Crop*, the first mass-circulation television exposé of cannabis prohibition, which generated significant public support.

As a result, a research licence system was established, allowing agronomic hemp trials. Diverse growing sites were tested and experience was gained, e.g., in increasing fibre yield by manipulating planting sites at different latitudes.

In collaboration with Southern Cross University (Lismore, NSW, campus), Dr Katelaris obtained a licence to cultivate high-THC cannabis for phytochemical analysis and stability testing on extracts, in preparation for a compassionate cannabis access scheme. This program was terminated for political reasons, and Australia has yet to establish any compassionate access

scheme, as operates in many countries around the world.

Dr Katelaris's current research interests include improved methods of hemp agronomy, better seed-harvesting methods and the development of hemp building materials (hempcrete) suited to Australian conditions. He is committed to developing greater public awareness of the benefits of hemp seed nutrition.

Of special interest is the place for hemp seed nutrition during pregnancy and childhood and the therapeutic use in managing inflammatory conditions, behavioural disorders and depression.

NEXUS published Dr Katelaris's article "Fibre Hemp: A New Industry for Australia?" in 1995 (vol. 2, no. 15).

Dr Katelaris can be contacted by mail at PO Box 3261, North Turramurra, NSW 2074, Australia, or by email at sativaseed@gmail.com.

The secrets of the Rosicrucians have enlightened men and women for centuries, not just

to the mysteries of human existence, but also to the potentialities that each individual is capable of. This knowledge is available to you today. You will discover the powers of mental creation, learn simple yet profound methods of meditation, harness the ability of projection of thought and personality, and much more. You will be shown techniques proven over centuries. But more importantly, you will access tools to make your life both profound and practical, and give you skills for self mastery – to be who you are and all you can be. Because Rosicrucians believe life is a personal and private journey, you can become a Rosicrucian student through home study. To find out if the Rosicrucian Order can benefit you, get our booklet *Mastery Of Life*, free and without obligation, by writing to: The Rosicrucian Order PO Box 1087 Burwood North 2134, or phone 02 9518 3444 or by visiting us at www.amorc.org.au

Some Big Lies of Money, Medicine and Science

Continued from page 42

truth is that students don't learn the delivered material and everyone only learns what they learn.

One could dramatically change the order in which courses are delivered and it would make no measurable difference in how much students learn. Students deliver nonsense, and professors don't care.

Obedience and indoctrination are all that matter, so the only required skill is bluffing. Students know this and those who do not don't know what they know, don't know themselves.^{8,9,10}

Pick any expert opinion or dominant paradigm: it's part of a racket. We can't know the truth because the truth is brutal. ∞

About the Author:

Denis G. Rancourt, PhD, was a tenured and full professor at the University of Ottawa in Canada. He was trained as a physicist and practised physics, Earth

sciences and environmental science— areas in which he was funded by a national agency and ran an internationally recognised laboratory. Dr Rancourt has had over 100 articles published in leading scientific journals. He developed popular activism courses and was an outspoken critic of the university administration and a defender of student and Palestinian rights. He was fired for his dissidence in 2009 (see <http://www.academic.freedom.ca>).

Dr Rancourt can be contacted via his blogsite, <http://activistteacher.blogspot.com>.

Editor's Note:

Dr Rancourt's article was first published as "Some Big Lies of Science" at <http://tinyurl.com/2cq2gqa>.

UFO DISCLOSURE

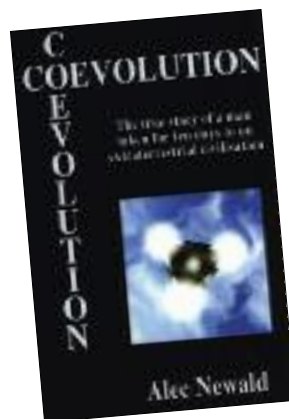

DISCLOSURE

by
Steven M. Greer MD

For the first time ever, over five dozen top-secret military, government, intelligence and corporate witnesses to secret projects tell their true stories which disclose the greatest covert program in world history. This explosive testimony by actual government insiders proves that UFOs are real, that some are of extraterrestrial origin and that super-secret programs have energy and propulsion technologies that will enable humanity to begin a new era.

A true story!

The true story of a man taken for ten days to an extraterrestrial civilisation

by Alec Newald

Alec Newald set off on what should have been a 3-hour drive from Rotorua to Auckland in New Zealand. He arrived in Auckland feeling tired and confused, but was even more confused to learn that Monday was now Thursday ten days later, and that he had no idea of what had happened in the meantime! When Alec did retrieve his memories of those missing ten days, he realised his life had changed forever.

Crop Circles 2010: The Twenty-Year Curve

Continued from page 62

This didn't seem so clear in the excited haze sparked by the arrival of the first pictograms, yet now it seems obvious. The evolving content and tone at the Symposium over the last two decades reflects the curve clearly when one observes the stages traversed: the "stamp-collecting" phase which began things, and the mulling of evidence; the speculation as to the hidden hand behind many of the formations, and the inherent hope for something coming to help us; the disillusionment at the lack of revelation or official disclosure as the years went by; the insight that perhaps the message all along was simply to "wake up" and look around us with new eyes at all the other mysteries and concerns around the world and ponder our responsibility towards exposing or healing them; the new embracing of both light and dark subjects as two sides of the

same coin, from Earth energies to 9/11 truth issues; the consequent growth of a new self-aware consciousness and the realisation of the collective power that could be wielded with a critical-mass awakening; the consideration of 2012 and beyond; and the growing awareness that global change might be a self-fulfilling prophecy, whether the ancient cycles and entwined predictions carry weight or not.

This 20-year curve demonstrates, both in the glyphs and in the minds of those monitoring them, that we *have* been offered a kind of salvation after all—one inspired from the journey that each of us must take within ourselves to understand and embrace this still enigmatic and compelling phenomenon. ∞

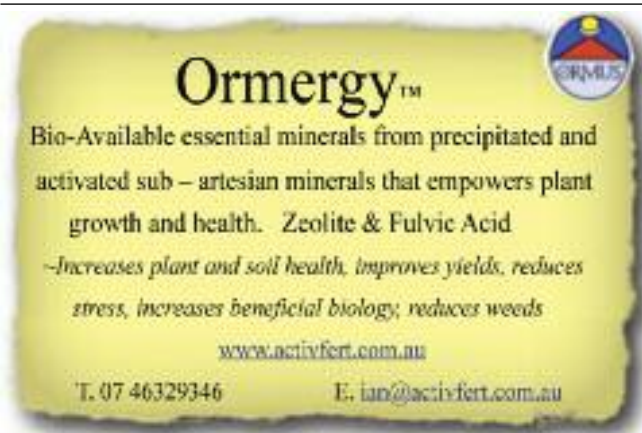

About the Author:

Andy Thomas is one of the world's leading mysteries researchers and is the author of *The Truth Agenda: Making Sense of Unexplained Mysteries, Global*

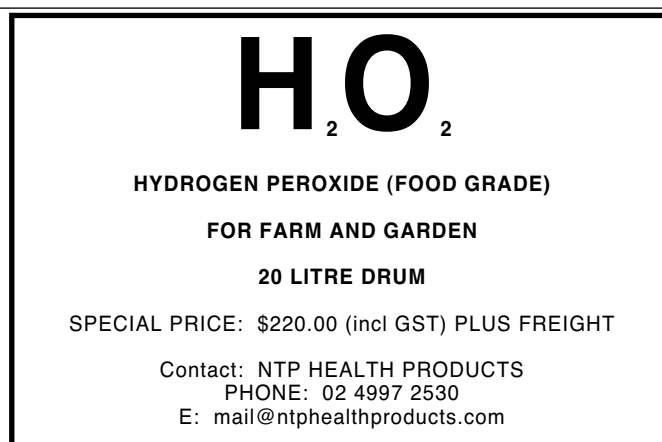

Cover-Ups and 2012 Prophecies (Vital Signs Publishing, 2009), one of the best overviews and analyses of alternative views on the current global situation. Andy is also the author of five books on the crop circle phenomenon, including *Vital Signs*, considered by many to be the definitive guide. A chapter on Andy's circle work is featured in Patricia Cori's new book, *Beyond The Matrix: Daring Conversations with the Brilliant Minds of our Times* (North Atlantic Books, 2010). Andy lectures widely around Britain and the world, and he has often been a guest on mainstream TV and radio.

For more information about Andy Thomas and his work, visit his websites <http://www.truthagenda.org> and <http://www.vitalsignspublishing.co.uk>. Andy can be contacted by email at info@vitalsignspublishing.co.uk.

For more details about the Glastonbury Symposium, visit <http://www.glastonbury-symposium.co.uk>. To view the 2010 season's crop circle images, including the ones featured in this article, go to <http://www.cropcircleconnector.com>.
